AI Content Workflow:

Use this weekly system to turn real-life moments into scroll-stopping content in less than 1 hour a week.

✅ Step 1: Start with Real Life

Ask yourself:
What's happening this week?

Examples:

- Launching a product or offer
- Shipping orders
- Creating a new product
- Daily routine or restock
- Answering FAQs or DMs

Your real life = content gold.
If you're packing orders, animate your label printer. Launching something? Turn it into a dreamy balloon in the sky.

✅ Step 2: Choose One Visual Element

Pick ONE thing to work with:

- A product photo
- A behind-the-scenes moment
- A scene or mood
- Even just a "vibe" or aesthetic

Then ask:
“How can I twist this into a scroll-stopping visual using AI?”

Use tools like:

- MidJourney
- Kling AI for animated visuals

✅ Step 3: Focused Creation Sprint (30–45 min)

Set a timer. You're doing a **mini creative sprint**:

- Create 1–2 visuals (photo or video)
- Write a caption using ChatGPT
- Export and schedule your content

Optional tools:

- Canva or Adobe Express
- Metricool, Later, or Planoly for scheduling
- ChatGPT (with your content tone saved) for captions

✅ Step 4: Save What Worked

Don’t start from scratch every time.

- Save winning prompts to a Google Doc, Notion, or Notes app
- Create a *Prompt Bank* you can reuse (just swap the product/topic!)
- Add them to your **custom GPTs** (Visual or Copy) so AI gets smarter every week

---

✅ Step 5: Use Your Two GPTs

If you've set up your:

- **Visual GPT** (trained on your aesthetic)
- **Content GPT** (trained to write in your voice)

Use them! Let them do the heavy lifting.

📅 Weekly AI-Powered Routine Example

Day	Task	Time
Monday	Pick real-life moment & visual idea	10 min
Tuesday	Create AI image or animation	30 min
Wednesday	Write caption & schedule	20 min
Thursday	Post, repurpose to other platforms, save prompts	15 min

---

🧠 Final Tips

- Keep it simple: One post a week from real life is enough
- AI is your assistant, not your brand
- Consistency > Perfection
- You can always reach out with questions 💌
