WSODOWNLOADS.IN

Introduction

Bring your imagination to life — one AI video at a time.

In a world where content creation is moving faster than ever, AI video tools have opened the door to an entirely new way of storytelling. Whether you're a filmmaker, digital marketer, YouTuber, or complete beginner, **Google VEO 3** offers a powerful new way to create cinematic videos without ever picking up a camera.

VEO 3 isn't just another text-to-video tool. It's the most advanced generative video model Google has released — capable of producing **realistic movement, dynamic camera angles, immersive environments, and even synced voice audio**, all from a simple text prompt.

But here's the catch: just like with any powerful tool, the results you get depend on how well you use it.

That's why I created this guide — to give you everything you need to **master Google VEO 3**, even if you've never used an AI video tool before. Whether you're looking to generate:

- **Cinematic short films**
- **Vlog-style talking characters**
- **Social media videos**
- **Ad creatives**
- **Fantasy scenes**
- Or even animated loops for music or ASMR...

This guide will walk you through every step — from setting up your account to writing advanced prompts that bring your vision to life.

WSODOWNLOADS.IN

What You'll Learn in This Guide:

- How to access VEO 3 through Google Flow (and get free credits)
- The key differences between VEO 2 and VEO 3
- What makes Flow the better option for serious creators
- How to write **structured prompts** that get great results
- How to generate realistic dialogue, sound, music, and motion
- How to keep characters and styles consistent across multiple scenes
- How to build content for TikTok, YouTube Shorts, or full-length films
- Prompt formulas, cheatsheets, and real examples included

Whether you're experimenting, building content for clients, or launching a full YouTube channel powered by AI — this guide is your shortcut to success with Google VEO 3.

WSODOWNLOADS.IN

Chapter 1: What is Google VEO 3?

If you've ever wished you could turn your imagination into a short film just by describing it — Google VEO 3 brings you closer than ever.

VEO 3 is Google's most powerful text-to-video AI model, capable of generating **hyper-realistic, cinematic-quality videos** from a simple prompt. Whether you're writing a sentence about a knight in a snowstorm, a cat on a skateboard, or a robot walking through a cyberpunk city, VEO 3 can turn that into a video — complete with **lighting, camera motion, environmental detail, and even synced voice dialogue**.

WSODOWNLOADS.IN

What Makes VEO 3 So Powerful?

Here are some of the standout features that set VEO 3 apart from previous models and competitors:

🎞️ Realistic Motion & Cinematic Camera Work

VEO 3 supports dynamic camera angles like panning, zooming, and bird's-eye views. The movement feels natural — like a shot from a real movie.

🎤 Built-in Audio Generation

Unlike older models, VEO 3 can generate realistic **character dialogue**, **ambient sound**, and even **background music**. No need for separate tools unless you're using reference images (we'll cover that later).

🖼️ Photorealistic Visuals

Characters, objects, and environments are rendered with impressive realism — especially in historical or natural settings. Lighting, weather, and even texture details are beautifully handled.

🎨 Genre & Style Awareness

Want a Pixar-style animation? A gritty war film? A fantasy short? Just describe the

visual style in your prompt — VEO 3 will adapt accordingly.

VEO 3 vs VEO 2 — What's Different?

Feature	VEO 2	VEO 3 (Current Model)
Video Resolution	720p (only)	720p + **Upscale to 1080p**
Audio Support	❌ None	✅ **Dialogue + Ambient Sound**
Character Dialogue	❌	✅
Prompt Accuracy	Basic	Advanced
Credit Cost (per gen)	~10 credits (Fast)	~100 credits (High Quality) or 20 Credits VEO 3 Fast Gen
Use Case Suitability	Demos, tests	**Social content, filmmaking**

WSODOWNLOADS.IN

Note About Limitations

As incredible as VEO 3 is, it's still an evolving tool. Some known limitations include:

- Occasional **subtitle overlays** in generated videos (fixable with editing)
- Character consistency can vary unless you apply the right techniques (covered later)
- Some scenes may render in a **video game-like aesthetic**, especially in fantasy settings
- Videos are still short (generally under 10 seconds unless extended with tricks)

✅ What Can You Use VEO 3 For?

- AI Short Films
- Character Vlogs (e.g. Bigfoot, Stormtrooper, Anime Girl)
- TikTok/YouTube Shorts
- Product Ad Mockups
- Fantasy World-Building
- POV Narratives
- ASMR, Loops, and Storytelling Scenes

WSODOWNLOADS.IN

Chapter 2: How to Access VEO 3

Two ways to unlock Google's most powerful AI video tool.

Google VEO 3 isn't publicly available on a standalone platform. Instead, you access it through **Google's AI ecosystem** — specifically via **Gemini** or **Google Flow**. Each has its strengths, but if you're serious about control, creative freedom, and scene-building… **Flow is the better option.**

In this chapter, you'll learn how to get access — including a **30-day free trial** — and understand the key differences between Gemini and Flow.

WSODOWNLOADS.IN

Option 1: Access via Gemini (Quick & Simple)

If you're already using **Gemini Advanced**, you may have access to VEO 3 through Gemini Labs.

✅ **Steps:**

1. Go to: https://deepmind.google/models/veo/
2. Click **"Try in Gemini"**.

⚠️ **Limitations:**

- Gemini access is limited to preset demos or simplified prompt formats.
- No timeline control, no project management, no camera or model options.
- Best for quick tests, **not full creative projects**.

📌 **Note: Free Daily Generations in Gemini**

When using Gemini to create VEO 3 videos:

- You can generate **up to 3 videos per day**

- These **do not cost any credits**
- Great for testing ideas or generating simple, quick visuals

🎯 Option 2: Access via Google Flow (Recommended)

Google Flow is where the real magic happens. It's a visual editor and creative suite where you can:

- Write advanced prompts
- Choose VEO 3 or older models
- Use reference images
- Upload assets
- Organize projects
- Access Flow TV (prompt inspiration hub)

WSODOWNLOADS.IN

🚀 How to Get Started with Flow (Step-by-Step)

✅ Step 1: Visit Flow

Go to: https://deepmind.google/discover/veo

Click **"Try with Flow"** to launch the Flow interface.

✅ Step 2: Create or Sign in to a Google Account

You'll need to use a Gmail or Workspace account to sign up.

✅ Step 3: Start a Free Trial

Click **"Get Google AI Pro"**

- Plan: **$19.99/month**
- **Includes 1,000 credits**
- **First 30 days are free**

✅ Step 4: Open Your Dashboard

Once inside Flow, click **“Create with Flow”** → **“New Project”**

You’re now ready to start generating your first video.

🧠 Gemini vs. Flow — What’s the Difference?

Feature	Gemini	Google Flow (Recommended)
Prompt Control	Basic	✅ Full scene control
Use of VEO 3	Limited access	✅ Full access
Reference Images	❌ Not supported	✅ Upload + animate
Scene Builder	❌	✅ Interactive workspace
Dialogue Generation	Basic	✅ Detailed character dialogue
Access to Prompt	❌	✅ Built-in via Flow TV

WSODOWNLOADS.IN

Chapter 3: Why Use Google Flow?

The creative control center for serious VEO 3 video makers

While Gemini is great for quick demos or beginner experimentation, **Google Flow** is where professional-level AI video creation really happens.

Think of Flow as your **AI production studio** — a visual workspace where you can organize your ideas, generate cinematic videos with precision, and control every part of the process from **camera motion** to **dialogue** to **sound**.

If you're planning to create:

- Multi-scene video stories
- Consistent characters
- Product ads or vertical reels
- YouTube videos or TikToks
- High-quality cinematic content

Then **Flow is the platform you need**.

WSODOWNLOADS.IN

🧩 What Makes Flow So Powerful?

🎛️ Full Prompt Control

Unlike Gemini, Flow allows you to write complex, multi-element prompts — including lighting, environment, character motion, genre, camera angles, and more.

🧵 Scene-by-Scene Organization

Create multiple scenes within a single project. You can build stories frame by frame,

with room to test variations.

🖼️ Upload Reference Images

Use **“Frames to Video”** to animate your own images, control aspect ratios, or preserve a character’s appearance. You can even use the **green screen trick** for better consistency.

🔁 Model Selection

Switch between:

- **VEO 3** for high-quality, cinematic results with audio
- **Fast mode (VEO 2)** for quicker, credit-efficient tests
- **Ingredients to Video** for multi-element animation (limited support)

📺 Flow TV – Your Built-In Prompt Playground

Browse **Flow TV** to watch videos made by other creators and click “Show Prompt” to see exactly how they were generated.

- Choose categories like:
    - Short Films
    - Fantasy Scenes
    - Sci-Fi Environments
    - Vlogs & POVs
- Click “Grid View” for fast inspiration browsing

🔊 Audio Capabilities

Flow supports:

WSODOWNLOADS.IN

- Spoken dialogue (text-to-video only)
- Ambient sounds
- Background music (customizable in the prompt)

🖥️ A Quick Tour of the Flow Interface

Feature	Purpose
New Project	Create, label, and organize your video scenes
Prompt Box	Write detailed text prompts with full customization
Settings Panel	Choose model (VEO 2/3), resolution, and output options
Image Upload	Add reference images to use with Frames-to-Video
Flow TV	Browse example videos + view their prompts
Credits Display	Shows remaining credits and cost per generation

WSODOWNLOADS.IN

Chapter 4: Understanding VEO 3 Capabilities

Get to know what VEO 3 can—and can't—do, so you're ready to craft the best prompts from day one.

✅ 1. Resolution & Upscaling

- VEO 3 generates native videos at **720p**, but you can **upscale to 1080p** using Flow's download options.
- Though not perfect, it delivers cleaner visuals with dynamic scenes—just be aware of occasional imperfections like slight graininess in fine details.

✅ 2. Video Duration

- The current maximum length per clip is **8 seconds**.
- For longer videos, use features like **"Add to Scene"** in Flow or edit together multiple clips externally.
- This short format works well for TikTok-style content, intros, loops, or scene snippets.

✅ 3. Native Audio Generation

- One of VEO 3's standout features is true **audio integration**—capable of generating:

VSODOWNLOADS.IN

    - **Spoken dialogue** (lip-synced)
    - **Ambient sounds** (wind, traffic, nature)
    - **Music or sound effects**
- You can prompt for mood-specific audio, e.g., “soft piano music” or “wind rustling through leaves.”

✅ 4. Cinematic Camera & Motion

- VEO 3 supports advanced camera directions (pan, tilt, zoom, bird’s-eye, POV).
- Characters and objects move with impressive realism: physics-aware animation that feels like live footage.
- Prompt structure is key—without telling the AI how to move the camera or subjects, static shots may result instead.

✅ 5. Genres, Styles & Visual Control

- You can request styles such as *cinematic film*, *anime*, *Pixar-3D*, or *sci-fi*.
- Control color grading (muted, pastel, gritty), lighting (harsh moonlight, soft sunlight), and genre conventions (horror, comedy, epic).
- Style prompts should be placed early in your prompt for better weighting.

WSODOWNLOADS.IN

✅ 6. Credits & Cost

- VEO 3 *High Quality* uses around **100 credits per generation**—makes each video valuable.
- Flow offers **Fast Mode (VEO 2)** for quick, cheaper testing (~10 credits per gen).
- Consider ideas and rough drafts using Fast Mode before spending credits on polished VEO 3 versions.

✅ 7. Character Consistency & Limitations

- VEO 3 can produce relatively consistent faces and characters—but **not perfect**.
- Visual consistency improves with techniques like:
    - Detailed character descriptions
    - Reference image uploads (green-screen or Frame-to-Video)
    - Feeding back in consistent image assets via Flow
- Expect variation—you'll learn to manage it later in the guide.

WSODOWNLOADS.IN

✅ 8. Known Limitations

- Audio sync can sometimes be imperfect.
- Some fantasy scenes may look "video-game stylized" even with cinematic prompts.

- Generates an invisible **SynthID watermark** in each frame—useful for ethics but may affect commercial use.
- Non-U.S. users might see delays in full feature access depending on rollouts.

🧭 Who Should Use VEO 3?

VEO 3 is ideal for creators who want:

- Short, visually rich clips with **dialogue and ambient sound**
- Cinematic styles with **camera movement**
- Quick ads, intros, product promos, or ASMR loops
- First-person or POV storytelling

If you're building longer narratives, multi-character scenes, or product demos, VEO 3 + **Flow** empowers you to push creative limits—while staying within production constraints.

📝 Quick Reference Table

Feature	Support in VEO 3
Resolution	720p native → 1080p upscaling
Max Duration	8 seconds per clip
Audio	✅ Dialogue, ambiance, music
Camera Control	✅ Pan, tilt, zoom, POV angles

WSODOWNLOADS.IN

Style Flexibility	✅ Cinema, anime, 3D, etc.
Cost (High Quality)	~100 credits per gen
Fast Mode Available	✅ VEO 2 for drafts (~10 credits)
Character Consistency	🟡 Possible with prompt/image tech
Watermarking	✅ SynthID digital watermark

Your path to VEO 3 mastery starts here—understand its power and limits, so you can write prompts like a pro in the next chapters.

WSODOWNLOADS.IN

Chapter 5: ✍️ Writing Prompts — The Basics

Mastering the language that controls the visuals. .

What Is a Prompt and Why It Matters

Your words are the camera, director, actor, and editor — all in one.

In Google VEO 3, a **prompt** is more than just a description. It's a **creative blueprint** — telling the AI what to show, how to shoot it, what mood to create, and even what sounds to include.

If you've used image generators before, you might be familiar with prompts like:

> "A dragon in the clouds, cinematic, dark tones"

But video prompts — especially in VEO 3 — require **more clarity**, **more structure**, and **more direction**. Why? Because now, you're not just creating a still image. You're asking the AI to **animate**, **light**, **direct**, and even **perform** the scene.

🎬 A Prompt in VEO 3 Does All This:

- **Chooses your subject and their appearance**
- **Directs the camera** (angle, motion, zoom)
- **Sets the lighting and time of day**
- **Defines the environment and mood**
- **Controls movement and emotion**
- **Adds voice, background sound, and music**

WSODOWNLOADS.IN

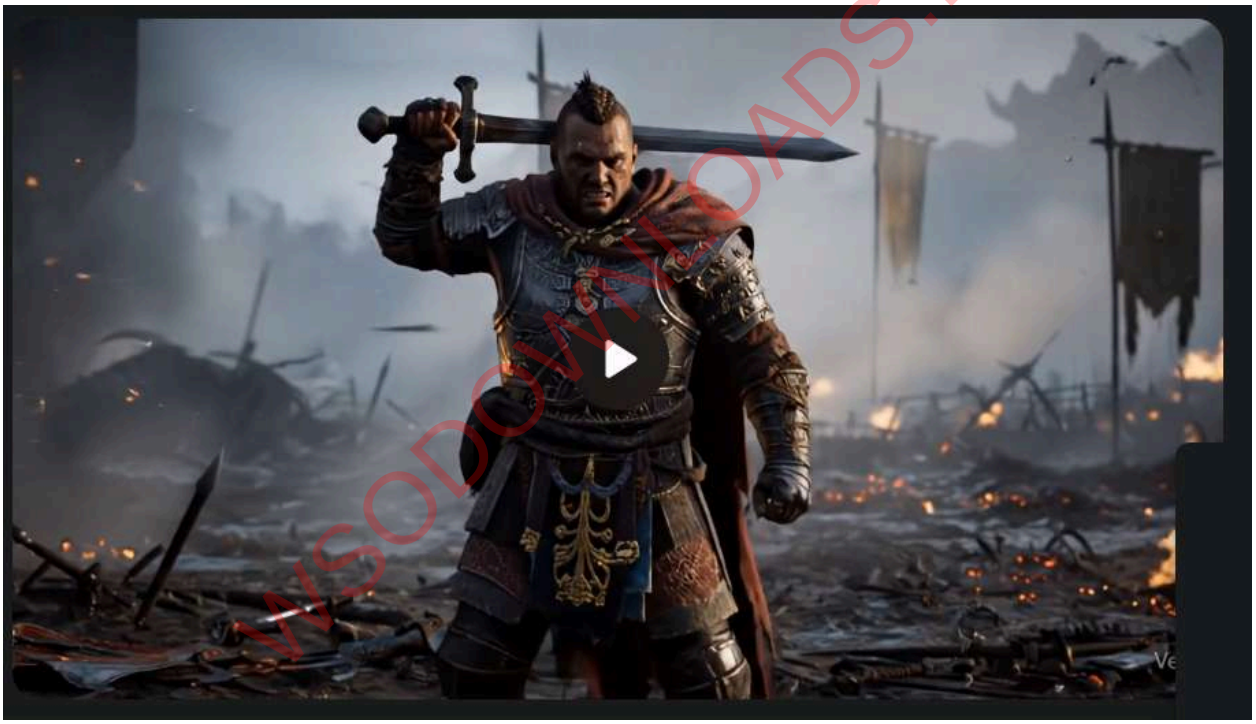

❌ Why Weak Prompts Fail

Let's compare:

🔻 **Basic Prompt:**

> "A warrior on a battlefield"

That might generate something... but the result will likely be stiff, awkward, or look like a video game cutscene.

WSODOWNLOADS.IN

Here's the Video:

🎬 Battlefield_Warrior_Video_Ready.mp4

As you can see, it's animated and looks like a video game.

✅ **Better Prompt:**

> "A wounded warrior kneeling on a scorched battlefield. The camera slowly

zooms in from a high angle. Smoke rises in the background. The atmosphere is tense, lit by fading orange twilight. The video has a gritty cinematic war style. The warrior breathes heavily and looks around in pain. The color palette is dark, with muted oranges and blackened grays."

This gives VEO 3 something to work with — characters, emotion, visuals, movement, tone, and environment.

WSODOWNLOADS.IN

Here's the video:

🎬 Video_Ready_Scorched_Battlefield.mp4

Now, you can clearly see the difference. It's more realistic and looks like a real movie scene.

🧠 Think of a Prompt As:

- Your **script**
- Your **director's vision**

- Your **cinematographer's shot list**
- Your **composer's mood board**

Chapter 6: Text to Video Prompt Formula Guide

Build cinematic prompts piece by piece like a professional storyteller

Before you can master AI filmmaking, you need to think like a director. This chapter breaks down each part of the structured VEO 3 prompt formula and teaches you how to apply it creatively.

> 🔧 **Formula Reminder**:
>
> **[CHARACTER] + [ACTION] + [CAMERA ANGLE] + [LIGHTING] + [GENRE/STYLE] + [MOTION] + [ENVIRONMENT] + [COLOR PALETTE]**

🔹 SECTION 6.1: CHARACTER

🔍 What It Does:

This defines your main subject. VEO 3 will shape the entire video around the character description.

🛠️ Prompt Tips:

- Use **distinct physical traits** (hair, skin, height, outfit)
- Define **expression, vibe, and posture**
- Add optional cultural or historical context

✅ Examples:

- A muscular Viking warrior with a braided beard and fur cloak
- A schoolgirl with short blue hair, wearing a Japanese uniform

WSODOWNLOADS.IN

- A robot with glowing blue eyes and a sleek chrome body
- An elderly man with sun-weathered skin in desert robes

🔹 SECTION 6.2: ACTION

🔍 What It Does:

Specifies **what the character is doing** or how they are positioned.

🛠️ Prompt Tips:

- Think in **verbs** (walking, kneeling, holding, shouting)
- Add emotional context or pacing

✅ Examples:

- Raises his axe and shouts toward the sky
- Drawing a sword while stepping forward
- Running across a rooftop under moonlight
- Floating weightlessly in space

WSODOWNLOADS.IN

🔹 SECTION 6.3: CAMERA ANGLE

🔍 What It Does:

Controls where the viewer is watching from. It's what makes a scene cinematic instead of flat.

🎥 Common Camera Angles to Use:

Camera Angle	Prompt Keyword	Use For
Close-up	*close-up shot of*	Facial expressions, emotion
Wide shot	*wide-angle view*	Full character + setting
Low angle	*shot from below*	Power, intimidation
High angle	*shot from above*	Vulnerability, smallness
Over-the-shoulder	*OTS shot of*	Conversations, POV effect
Bird's-eye view	*top-down shot*	Map-like or godlike views
First-person	*first-person POV*	Immersive, vlog-style clips
Dolly/Tracking	*camera follows from behind*	Movement-based sequences

✅ Examples:

- A low-angle shot from behind the Viking, emphasizing his strength
- A bird's-eye view of the battlefield from above
- First-person POV running through a rainy alley

WSODOWNLOADS.IN

- Over-the-shoulder shot of a detective looking at a clue

🔹 SECTION 6.4: LIGHTING

🔍 What It Does:

Sets the **mood**, time of day, and tone of the video.

☀️ Lighting Types:

- Soft golden sunlight at dawn
- Cold blue moonlight
- Harsh industrial fluorescent lighting
- Warm candlelight from a fireplace
- Flickering neon reflections in puddles

✅ Examples:

- Harsh golden sunlight spills through storm clouds
- Bright sunlight streams through broken windows
- A dimly lit tavern with a single lantern swaying
- Lightning flashes illuminate the mountains briefly

WSODOWNLOADS.IN

🔹 SECTION 6.5: GENRE / STYLE

🔍 What It Does:

Tells VEO 3 the **visual tone and cinematic style** to follow.

🎬 Common Styles:

- Cinematic film style
- Fantasy epic style
- 2D anime with expressive features
- Pixar-like 3D animation
- Noir detective film
- Gritty war drama
- Retro sci-fi VHS look
- Documentary realism

✅ Examples:

- Styled like an epic historical battle sequence
- Shot like a post-apocalyptic anime opening
- A dramatic war film with handheld-style camera movements
- Looks like a 1980s horror flick with grainy effects

WSODOWNLOADS.IN

🔹 SECTION 6.6: MOTION

🔍 What It Does:

Adds **movement to the subject or environment**, making it feel alive.

💨 Examples of Motion:

- His fur cloak flutters in the wind
- Hair moves slowly in underwater currents
- Rain pelts against the glass window
- Leaves swirl around their feet
- Dust rises as the knight walks forward

✅ Examples:

- His fur cloak flutters in the wind
- Rain pours down and splashes on the stone floor
- Sparks fly as the machine powers up
- The wolf lowers its head and snarls

WSODOWNLOADS.IN

🔹 SECTION 6.7: ENVIRONMENT

🔍 What It Does:

Builds the **world** around your character. Critical for immersion.

🌍 Prompt Tips:

- Describe geography + weather + structures
- Use emotional adjectives (abandoned, vibrant, haunted)

✅ **Examples:**

- A crumbling stone fortress on a snowy cliff
- A narrow Tokyo alley glowing with neon signs
- A misty forest filled with glowing mushrooms
- A battlefield littered with broken armor

🔹 **SECTION 6.8: COLOR PALETTE**

🔍 **What It Does:**

Influences the **emotional tone** through visuals.

🎨 **Common Palettes:**

- Warm golden tones (hopeful, nostalgic)
- Cool blues and grays (cold, futuristic)
- Desaturated/monochrome (gritty, serious)
- Pastel colors (dreamy, lighthearted)
- High contrast neon (cyberpunk, energy)

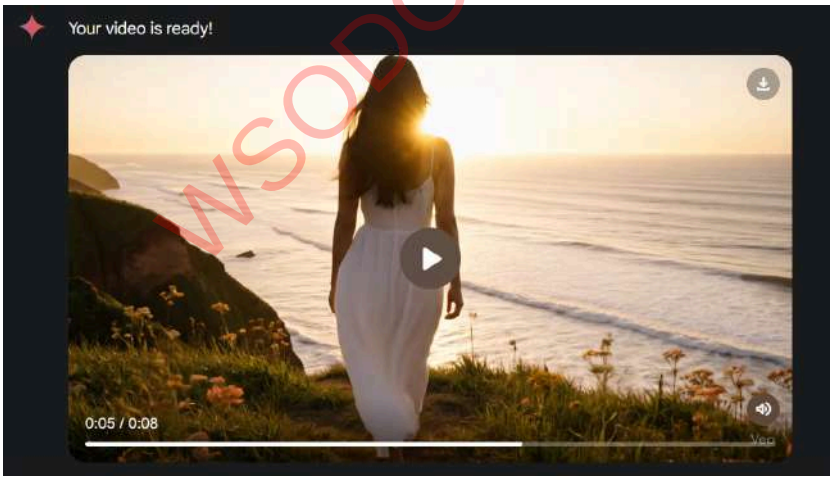

WSODOWNLOADS.IN

✅ **Examples:**

- Dark earth tones and muted steel with crimson highlights
- Rich golden sunlight with red-brown earth tones
- Neon pink and purple dominate the cityscape
- Muted olive and gray tones give it a war documentary feel

Final Prompt Example (All Elements Combined):

> "[A young woman in a flowing white dress] [stands barefoot at the edge of a cliff]. [A low-angle shot from behind her with the camera slowly pushing forward]. The golden sunrise casts soft light over the ocean waves below. The scene is styled like an indie drama film. Her dress billows gently in the wind. The cliffs are covered in tall grass and blooming wildflowers. The color palette includes warm yellows, faded greens, and soft peach tones."

Video_Ready_Cliffside_Sunrise.mp4

Now, as you can see this video looks like it was shot by a pro videographer. This is the power of writing good prompts.

WSODOWNLOADS.IN

Chapter 7: VEO 3 Complete Prompt Formula [Audio & Dialogue Scenes]

Teach your characters to speak and your world to sound alive.

🔊 Why This Formula Is Different

VEO 3 can generate **dialogue**, **ambient sounds**, and **music** — but these only work when you're using **Text-to-Video** (not Frames-to-Video). That means your prompts need to be written in a way that clearly tells VEO 3:

- Who is speaking
- What they're saying
- How they're saying it
- What background audio should exist

Just like directing an actor, you need to tell the AI both the **lines** and the **delivery**.

WSODOWNLOADS.IN

🧩 Prompt Formula for Dialogue Scenes

[CHARACTER] + [ACTION] + [CAMERA ANGLE] + [ENVIRONMENT] /LIGHTING] + [DIALOGUE] + [TONE OF VOICE] + [AMBIENT SOUND or MUSIC] Optional]

Or

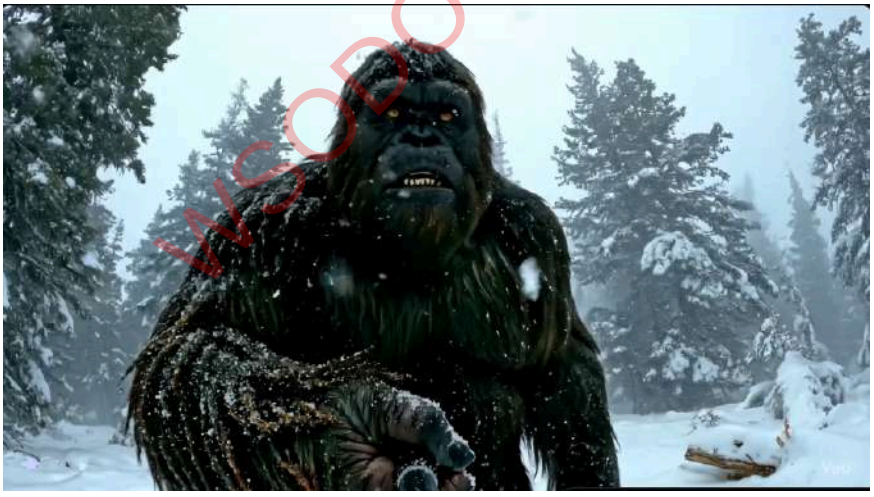

[CHARACTER] + [ACTION] + [CAMERA ANGLE] + [ENVIRONMENT]

/LIGHTING]. [Character] says in [Tone of Voice] + [Dialogue]

Example Breakdown: [CHARACTER = Bigfoot, a towering, ancient-looking bipedal ape, with **matted, deep forest-green fur and piercing amber eyes] + [Action =** walking in a forest holding a selfie stick and talking to the camera**] + [CAMERA ANGLE=** selfie camera angle shot**] + [ENVIRONMENT] /LIGHTING =** a dense forest during a severe blizzard, with heavy snowfall reducing visibility to almost zero, wind whipping through the trees, and branches creaking under the weight of accumulating snow**]. [Bigfoot] says in [Tone of Voice= A deep, gravely, and highly resonant Scottish male voice] + [Dialogue=** Guys, It's too damn cold today and my legs are freezing, honestly **]**

Bigfoot, a towering, ancient-looking bipedal ape, with **matted, deep forest-green fur and piercing amber eyes** walking in a forest holding a selfie stick and talking to the camera selfie camera angle shot a dense forest during a severe blizzard, with heavy snowfall reducing visibility to almost zero, wind whipping through the trees, and branches creaking under the weight of accumulating snow**. Bigfoot says in a deep, gravely, and highly resonant Scottish male voice.** Guys, It's too damn cold today and my legs are freezing, honestly**.**

WSODOWNLOADS.IN

Video: Bigfoot_a_towering_202506301544_otxha.mp4

Now, let's change the character, voice type and the scene.

Bigfoot, towering, shaggy dark reddish-brown fur, primate-like face, intelligent dark eyes running very fast through the forest while holding a selfie stick, looking panicked and slightly out

of breath, selfie camera angle shot, shaky and fast-paced, in a dense temperate rainforest, with blurred trees rushing past, A hiker is chasing him with a Gun in his hand. **Bigfoot says in a shakily, resonant, and slightly gruff British male voice:** Guys, they found me and they are gonna kill me. Shitting in their tent was a bad idea.

Video = Bigfoot_towering_shaggy_202506301605_1yaox.mp4

A big fluffy bear with sunglasses and a GoPro harness bolts out of a tent, holding a half-eaten peanut butter jar and a selfie stick in one paw. Selfie camera angle from left side, as soon as it gets out, 2 hikers on the right side are seen tied with the trees. Bear says in an old southern american male voice, Whew! These generous humans let me sample their entire pantry. Hospitality ain't dead, boys!'

Video = A_big_fluffy_202506301639_dq4vw.mp4

This formula adds two new elements:

- 🎙️ **[DIALOGUE]** — The exact line(s) you want the character to say

AI SORA DOWNLOADS.IN

- 🎭 **[TONE OF VOICE]** — Emotion, accent, or delivery style (e.g., nervous, whispering, angry)

🔹 SECTION 7.1: DIALOGUE

🔍 What It Does:

Instructs the AI to generate a speaking character with synced lip movement and matching expression.

✅ Examples:

- “Today… we take back the throne!”
- “I haven’t seen a sunrise like this in 30 years.”
- “Welcome back to Yeti Adventures — today, we’re ice fishing!”
- “Are the rumors about war in the Outer Rim true?”

> ⚠️ **Note:** Avoid using quotation marks in the prompt (they sometimes trigger subtitles). Just include the sentence clearly in plain text.

WSODOWNLOADS.IN

🔹 SECTION 7.2: TONE OF VOICE

🔍 What It Does:

Sets the **emotion**, **accent**, or **energy level** of the spoken dialogue.

🎭 Prompt Tips:

- Combine tone + character type

- Add emotion to create nuance
- Can affect performance more than words

✅ **Examples:**

- Nervous young man stammering his words
- Confident commander shouting with intensity
- Elderly woman whispering in a tired voice
- Child speaking with excitement and curiosity
- Sarcastic tone with casual delivery

🔹 **SECTION 7.3: AMBIENT SOUND / BACKGROUND MUSIC**

🔍 **What It Does:**

Makes the world feel **immersive** by layering background audio.

🎧 **Sound Options to Prompt:**

- Ambient sounds: birds chirping, waves crashing, wind rustling, footsteps
- Background music: soft piano, epic orchestral, lo-fi beats, eerie drones
- Specific sound events: thunderclaps, echoing cave reverb, marketplace chatter

✅ **Examples:**

WSODOWNLOADS.IN

- The sound of ocean waves crashing below
- Calm lo-fi piano playing in the background
- Thunder rumbles in the distance
- Street noise and occasional car horns

🧱 **Full Prompt Example (With Audio & Dialogue):**

> **Prompt:** "A young man in a futuristic flight suit stands on a landing platform at sunset. The camera pushes in slowly from chest height. The scene is lit by the warm glow of a setting alien sun. The video has a sci-fi drama tone. He looks out at the sky and says, 'I don't know what's out there… but I'm ready to find out.' His tone is quiet, but determined. Wind howls in the background and low ambient synth music plays."

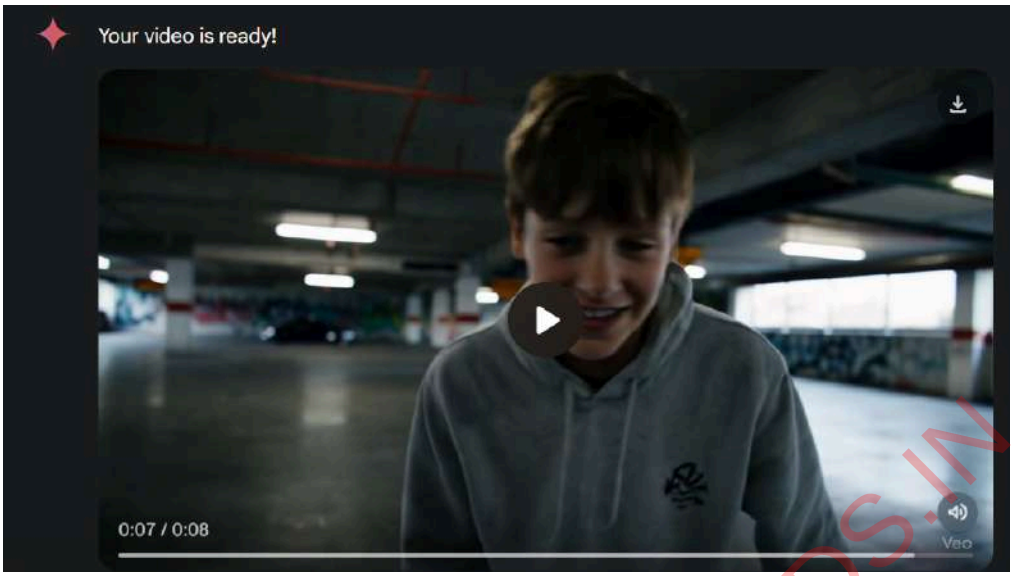

🎧 **BONUS TIPS:**

- Place **dialogue lines near the middle** of your prompt
- Don't overload your scene with too many background sounds — choose 1–2 max
- If the speech sounds off, try rephrasing the line or changing the tone of voice
- Dialogue **only works in text-to-video**, not when using reference images

Prompt: A teenage boy in a gray hoodie falls while skating through an empty underground parking garage. The camera follows in a fast dolly shot from behind, then cuts to a low-angle close-up as he stands up, brushing dust off. Harsh overhead lighting casts sharp shadows. The scene has a gritty, raw urban feel. He grins and says: *"That*

WSODOWNLOADS.IN

one's going in the highlight reel." His tone is sarcastic and confident. You hear echoing footsteps, wheels rolling, and distant bass thumps from a nearby car.

Skateboarding_Highlight_Reel_Ready.mp4

Prompt: A mother in a house robe pours tea in the kitchen and leans on the counter. A tripod-style medium shot shows her as she says: *"You've barely eaten. Is everything okay at school?"* Her tone is soft and concerned.

And her teenage son, seated at the table with a hoodie on, pushes scrambled eggs around with his fork. The camera cuts to a side-angle close-up as he replies: *"It's just exams. I'm fine."* His tone is tired and dismissive.

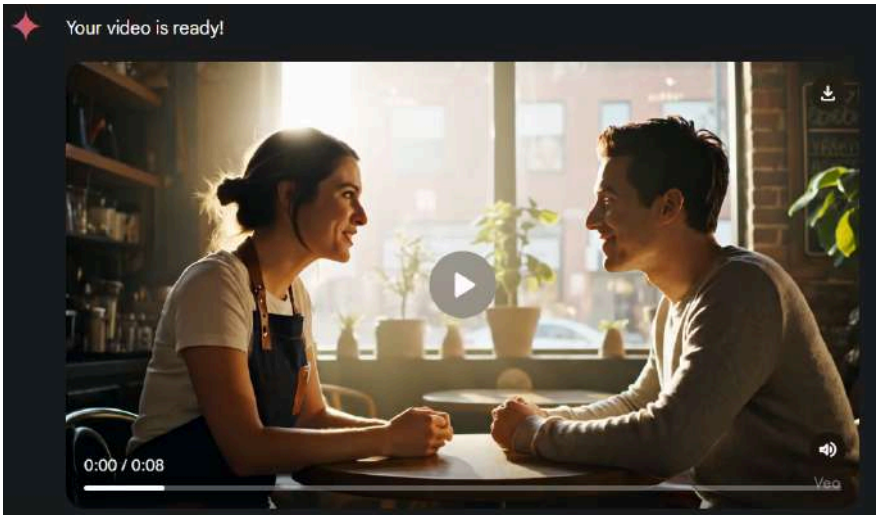

Lighting: warm interior kitchen lights with morning sun peeking in. Style: family drama. Environment: modest kitchen. Ambient sound: kettle steaming, birds chirping outside.

Exam_Stress_A_Family_Drama.mp4

Prompt: A barista and a regular customer sit across from each other at a small café table. The front-facing camera shot frames them both from the waist up. Late morning sunlight spills through the window behind them. Style: slice-of-life with natural light. Environment: cozy urban café. Ambient sound: soft jazz, milk steaming, light chatter.

The barista says: *"You always order the same thing."* (Tone: teasing)
The customer replies: *"And you always judge me for it."* (Tone: playful)

WCODOWNLOADS.IN

The_Usual_Order_Banter.mp4

Prompt: A young man in a hoodie holding a mic and an older man in a suit stand under a streetlamp in a busy plaza. A medium side-by-side shot captures both. Lighting: cool evening light, flickering neon in the background. Style: fast-cut social media clip. Ambient: city noise, people passing, car horns.

The interviewer asks: *"Has AI affected your job?"* (Tone: curious)
Stranger replies: *"Yeah, I got replaced by a chatbot that says 'per my last email' 10x faster."* (Tone: sarcastic)

Chapter 7: Character Consistency in VEO 3 Videos

Create recognizable, recurring characters that your audience will remember. Now, keeping the character consistency is much easier than the human characters. For animals simple animal character descriptions work but for human characters, you need to be more detailed.

🔍 Why Character Consistency Matters

If your character changes appearance from scene to scene — different fur color, hairstyle, outfit, or face — your video loses continuity and trust. Whether you're building a comedic series, a cinematic short film, or a talking animal vlog, keeping your character visually consistent is key to immersion and storytelling.

Think of it like a movie actor: same costume, same face, same attitude — across all shots.

🎯 What Can Break Consistency?

Here's what often causes inconsistency in VEO 3:

- Slight changes in phrasing across prompts
- Over-describing or changing outfits/moods
- Including too many random traits in every scene
- Not referencing the same *core features* every time

WSODOWNLOADS.IN

✅ Core Traits You Must Lock In

To make your character recognizable, pick and repeat these traits:

Trait	What to Specify

Species / Race	Human, bear, alien, robot, monkey, etc.
Physical Features	Fur color, skin tone, eye color, size
Outfit / Accessories	Scarf, backpack, helmet, cloak
Face / Expression	Goofy smile, sad eyes, grumpy look
Voice Style	Accent, tone, gender, attitude
Posture / Vibe	Confident, awkward, clumsy, elegant

🐻 Example: The Bear Influencer

Scene 1: A big fluffy bear with sunglasses and a GoPro harness walks slowly through a dense forest, holding a selfie stick. Selfie-style camera angle from front, slightly tilted. Light rays pierce through trees. Bear says in an old southern American male voice: “I ain’t had a decent snack in three days. If I find one more pinecone, I’m gonna cry.”

Video = A_big_fluffy_202506301836_lljym.mp4

WSODOWNLOADS.IN

Scene 2: A big fluffy bear with sunglasses and a GoPro harness suddenly stops walking in the forest and points the selfie stick toward a colorful tent visible between the trees. Selfie camera angle from the left, zooming in slightly as he spots it. The bear's eyes widened with excitement. The big fluffy bear says in an old Southern American male voice: "Oh sweet gravy — is that a tent? Please tell me they packed snacks!"

Video = A_big_fluffy_202506301835_d00l5.mp4

Scene 3: A big fluffy bear with sunglasses and a GoPro harness bolts out of a tent, holding a half-eaten peanut butter jar and a selfie stick in one paw. Selfie camera angle from left side, as soon as it gets out, 2 hikers on the right side are seen tied with the trees. Bear says in an old southern american male voice, "Whew! These generous humans let me sample their entire pantry. Hospitality ain't dead, boys!'

Video = A_big_fluffy_202506301838_ngcgq.mp4

WSODOWNLOADS.IN

Scene 4: A big fluffy bear with sunglasses and a GoPro harness walks casually through a forest trail holding a selfie stick. He suddenly stops and tilts the camera slightly to the right, revealing Bigfoot standing behind a tree, also holding a selfie camera and vlogging. Selfie-style camera angle from the bear's front-left. The big fluffy bear says in an old Southern American male voice: Dang… didn't think I'd run into the forest's second-most handsome vlogger today.

Video = A_big_fluffy_202506301820_spxcx.mp4

🧠 Pro Tip:

Copy your base character prompt and paste it **at the start of every new scene you write**. Treat it like a casting note — the AI model needs that repetition to stay visually locked in.

🚫 Avoid These Mistakes:

- Changing outfits between scenes ("a red hoodie" ➜ "a camo jacket")
- Swapping emotional tone without reason ("awkward" ➜ "angry")
- Adding extra accessories or items randomly
- Rewriting prompt from scratch instead of pasting the master description

---

WSODOWNLOADS.IN

✅ Summary

Do This	Avoid This
Lock in physical + outfit traits	Changing fur color or gear randomly
Use the same sentence to describe character in every prompt	Rewriting from memory each time
Keep voice, tone, and attitude identical	Mixing accents, changing personalities

WSODOWNLOADS.IN

Chapter 8 - Mastering Camera Angles, Shots & Movements in VEO 3

Camera angles affect how the viewer feels about the subject. With VEO 3, you can simulate **cinematic perspectives** by simply describing the angle in your prompt.

✅ General Prompt (Base Scene Used for All Examples)

> *A young man with a red hiking jacket stands on a grassy hilltop overlooking a vast valley. The wind rustles his hair as he gazes into the distance. Morning fog lingers in the background. Style: cinematic nature documentary. Ambient: soft wind, distant birds.*

Now, we'll reuse this exact prompt and **only change the camera angle** for each example to demonstrate the difference.

🎯 1. Eye-Level Shot (Neutral, Balanced Perspective)

> *Camera at eye level with the man.*
> **Effect**: Feels grounded and natural — like the viewer is standing with him.

🦅 2. High Angle Shot (From Above, Makes Subject Small)

> *High angle shot looking down at the man from above the hill.*
> **Effect**: Creates a sense of vulnerability, insignificance compared to nature.

🪜 3. Low Angle Shot (From Below, Makes Subject Powerful)

WSODOWNLOADS.IN

Low angle shot from the grass, looking up at the man as he faces the valley.
Effect: Makes him appear confident, heroic, or awe-inspiring.

🐛 4. Worm's-Eye View (Extreme Low Angle, Emphasizes Scale)

Worm's eye shot from near the ground, framing the man with tall grass in the foreground and the sky above.
Effect: Adds drama and grandeur to the landscape and subject.

🕊️ 5. Bird's-Eye View (Overhead, Tactical, Wide)

Bird's-eye shot directly above the man standing still on the grassy hilltop.
Effect: Emphasizes his isolation in the environment and gives geographical context.

🎭 6. Over-the-Shoulder Shot (Great for Dialogue or Reaction)

Over-the-shoulder shot from behind the man, looking out over the valley.
Effect: Creates intimacy — puts the viewer in his shoes, sharing the view.

🌀 7. Dutch Angle / Tilted Frame (Unstable, Tense)

Tilted shot of the man as he stands unevenly on the hill, horizon slightly slanted.
Effect: Adds tension, unease — good for mysterious or off-balance moods.

Shot Types – Framing the Story

Shot types define how much of the subject and environment is visible. With VEO 3, you can control this by describing the **distance**, **framing**, and **what's in view**.

WSODOWNLOADS.IN

📸 1. Wide Shot (Establishing the Scene)

Wide shot of the man standing alone on the hilltop, with the valley stretching out behind him.
Effect: Shows scale, environment, and mood. Ideal for setting the scene.

🎒 2. Medium Shot (Balanced Human Focus)

Medium shot of the man from the waist up, hill and sky in the background.
Effect: Adds emotion while maintaining environmental context. Good for monologues or vlogs.

😮 3. Close-Up (Emotional Detail)

Close-up shot of the man's face, eyes focused on the horizon, hair moving in the breeze.
Effect: Creates emotional connection. Highlights subtle expressions.

🔍 4. Extreme Close-Up (Micro Moments)

Extreme close-up of a tear forming at the corner of his eye as wind brushes his cheek.
Effect: Intense focus on detail — creates intimacy or drama.

🧍‍♂️🧍‍♂️ 5. Two-Shot (Interaction Focus)

Wide two-shot of the man and a woman standing together on the hilltop, both facing the valley.
Effect: Perfect for dialogue or shared experience between characters.

WSODOWNLOADS.IN

👁️ 6. POV Shot (First-Person View)

> *POV shot walking toward the cliff edge, arms and boots visible below. The valley opens up ahead.*
> **Effect**: Feels immersive. Puts the viewer inside the character's shoes.

🤳 7. Selfie Shot (Social, Personal Style)

> *Selfie video of the man holding the camera at arm's length with the valley behind him. He smiles and says: "This was so worth the climb." (Tone: happy, proud)*
> **Effect**: Personal and engaging — great for vlog-style content.

🎥 8. Tracking / Follow Shot (Dynamic Framing)

> *Tracking shot from behind as the man walks along the hill ridge toward the sunrise.*
> **Effect**: Adds motion, maintains composition around subject.

Camera Movements – Bringing Scenes to Life

Camera movements add dynamism and realism. They replicate how real-world filmmakers move the camera to follow action, build tension, or reveal beauty.

VEO 3 responds well to movement keywords when you describe **how the camera moves**, not just what's in the scene.

↔️ 1. Pan Shot (Left or Right)

> *The camera slowly pans right or left across the hilltop, revealing the man as he turns toward the valley.*

↕️ 2. Tilt Shot (Up or Down)

VSCODOWNLOADS.IN

The camera tilts up from the man's boots to his face as he stands still on the hill.

🚶 3. Tracking Shot (Follow)

The camera tracks behind the man as he walks along the ridge, the valley unfolding beside him.

⬅️➡️ 4. Dolly Shot (In or Out)

The camera dollies in slowly toward the man's face as he looks into the horizon.

⬆️ 5. Crane / Jib Shot (Vertical Move)

The camera cranes up from the base of the hill to reveal the man standing tall at the peak.

🎯 6. Zoom Shot (Simulated Optical Zoom)

The camera zooms in slowly from a wide shot to focus on the man's eyes.

📸 7. Handheld Motion

Handheld-style shot as the man adjusts his backpack, camera gently swaying with each motion.

WSODOWNLOADS.IN

Chapter 9: Google VEO 3 Viral Video Prompts & Templates

Welcome to the viral content lab.

This chapter features a curated set of **viral video formats** specifically designed for **Google VEO 3** — including their **exact prompt structures** and **fully written example prompts**. You'll find most of the most categories of the viral videos you probably seen on the internet by now.

From **ASMR slicing videos** and **selfie-style vlogs** to **street interviews** and **cinematic animal adventures**, each format includes:

- A consistent **prompt template**
- **Three full-length example prompts** ready to generate high-engagement clips
- Categories optimized for virality, relatability, humor, or shock value

Whether you're creating content for YouTube Shorts, TikTok, Instagram Reels, or viral ad reels, this chapter gives you **copy-paste prompt formulas** and creative fuel to turn simple AI clips into scroll-stopping gold.

VSODOWNLOADS.IN

🎥 Section 8.1: Bigfoot & Yeti Vlogs

These prompts are built for hilarious, chaotic, and surprisingly human-feeling vlogs from two mythical creatures: Bigfoot and his questionable sidekick, Yeti.

Tone: Comedic, expressive, unpredictable
Style: Handheld selfie-style vlog camera
Goal: Blend realism with absurd humor for viral short-form content
Use Case: TikTok, YouTube Shorts, Reels

A selfie video of [CREATURE NAME & DESCRIPTION] in [LOCATION/Environment]. He holds the camera at arm's length, and his hairy arm is clearly visible in the frame. The style is YouTube Vlog like. The creature [describe action, e.g., running, sneaking, pressing button]. He then turns the camera toward [describe what's in the background or other character]. He says in a [voice tone/accent] voice: "[Dialogue]"

Sounds(optional): [ambient + specific sounds, e.g., wind, footsteps, monster growl, alarm]. No subtitles.

A selfie video of Bigfoot, towering, shaggy dark reddish-brown fur, primate-like face, intelligent dark eyes, in the Nevada desert at night, holding a selfie stick at arm's length. His long hairy arm is clearly visible in the frame. The style is YouTube Vlog like. The bigfoot is sprinting with his companion — a large white Yeti with icy blue eyes and thick fur. They both race toward a fortified gate marked “AREA 51.” Bigfoot slaps a huge red button. He turns the camera back to his face and says in a breathless British male voice: “We touched it! We actually touched it! We’re legends now, lads!”

Sounds: desert wind, running footsteps, beeping alarm in background. No subtitles.

A selfie video of Bigfoot, towering, shaggy dark reddish-brown fur, primate-like face, intelligent dark eyes, running down a sterile sci-fi hallway inside Area 51. He holds the selfie stick at arm’s length, his hairy arm visible. The white Yeti runs behind him, looking terrified. The camera bounces slightly with movement. The style is YouTube Vlog like. Bigfoot glances back, then spins the camera briefly to show two small gray aliens chasing them with glowing stun batons. He says in a panicked British male voice: “They are NOT fans. They are monsters trying to kill us!”

Sounds: alarm sirens, alien shrieks, stomping footsteps, metallic clanging. No subtitles.

A selfie video of Bigfoot, towering, shaggy dark reddish-brown fur, primate-like face, intelligent dark eyes, running breathlessly through a desert canyon at dawn. He holds the camera at arm’s length while glancing behind. His companion Yeti sprints beside him. As he pans the camera, a hovering silver UFO can be seen rising in the distance behind them. The style is YouTube Vlog like. He looks at the camera, wide-eyed, and says in a deadpan British male voice: “So… we *may* have stolen a teleporter.”

Sounds: wind, rapid footsteps, low UFO hum, sand crunching. No subtitles.

Full Video = 🎬 Bigfoot Alien Adventure.mp4

WSODOWNLOADS.IN

🎥 Section 8.2: ASMR Object Slicing Videos

This section explores how to use VEO 3 to create visually stunning and audibly satisfying ASMR-style videos. These videos are perfect for audiences who love satisfying, meditative visuals combined with high-quality sound design.

Tone: Slow, satisfying, peaceful
Style: Macro cinematic, silent room with crisp slicing sounds
Goal: Create viral sensory content for TikTok, YouTube Shorts, and Instagram Reels
Use Case: Relaxing reels, loop-worthy visuals, aesthetic edits

A hyper-realistic ASMR video shot in extreme macro perspective. A razor-sharp knife slowly slices through [OBJECT TYPE] — The object rests on a rustic wooden cutting board, bathed in warm, cinematic lighting. Each intentional cut delivers a deeply satisfying ASMR audio experience — [describe sound: crisp, wet, metallic, etc.] — echoing in an otherwise silent, meditative space. Sliced piece drops gently to the cutting board. The overall pacing is slow and soothing, crafting a tranquil ASMR experience. No background music. No talking.

Example

A hyper-realistic ASMR video shot in extreme macro perspective. A razor-sharp knife slowly slices through a crystal strawberry made of transparent red glass — subtle inner reflections and smooth edges shimmer under soft light. The strawberry rests on a rustic wooden cutting board, bathed in warm, cinematic lighting. Each intentional cut delivers a deeply satisfying ASMR audio experience — clean glass crackles and sharp slicing. A sliced wedge drops gently onto the board. Pacing is slow and calming. No background music. No talking.

🎥 Section 8.3: Stormtrooper Vlogs (Viral Sci-Fi Style Comedy)

This section focuses on creating **viral first-person vlogs** using a consistent character — the classic Stormtrooper. These videos blend YouTube-style handheld vlogging with Star Wars-inspired humor and dialogue, making them ideal for meme pages, comedy shorts, and sci-fi parody accounts.

Tone: Sarcastic, awkward, chaotic
Style: Selfie-style handheld vlog
Use Case: YouTube Shorts, TikTok humor channels, meme accounts
Key Visual Cues: Stormtrooper armor, slightly scratched gear, handheld camera vibe, expressive body language

A selfie-style video of a standard Imperial Stormtrooper in full white armor and helmet, slightly scratched and weathered from field duty. He holds the camera at arm's length, his white-gloved hand clearly visible. The character is [describe action or situation]. He speaks in a young, energetic American male voice with dry, sarcastic delivery: "[dialogue]". The background is [describe location: desert, ship interior, etc.], captured with realistic camera shake and ambient sounds like ship hums, sand winds, or distant explosions. No music. No subtitles.

Stormtrooper in the Desert After a Crash

WSODOWNLOADS.IN

A selfie-style video of a standard Imperial Stormtrooper in full white armor and helmet, slightly scratched and weathered from field duty. He holds the camera at arm's length, his white-gloved hand clearly visible. The character is standing in a hot, wind-swept desert with a smoldering escape pod behind him. He wipes his visor dramatically and says in a dry, sarcastic tone: "Well, Greg said he could land it manually… and technically, he did." Background includes drifting sand, distant ship debris, and occasional electrical sparks. No music. No subtitles.

Stormtrooper Lost Inside a Ship

A selfie-style video of a standard Imperial Stormtrooper in full white armor and helmet, slightly scratched and weathered from field duty. He holds the camera at arm's length, his white-gloved hand clearly visible. The character is walking quickly through a dimly lit Imperial ship hallway, glancing side to side at confusing signs. He says in a confused, muttering voice: "Okay, deck 9… hallway 3B… wait, where the hell am I? This place is a maze." Footsteps echo. Background shows flickering red hallway lights and emergency sirens. No music. No subtitles.

A_selfiestyle_video_202507011246_dyg19.mp4

WSODOWNLOADS.IN

A selfie-style video of a standard Imperial Stormtrooper in full white armor and helmet, slightly scratched and weathered from field duty. He holds the camera at arm's length, ducking behind a scorched wall. The character peeks out, then quickly ducks as blaster fire whizzes by. He says in a panicked but sarcastic tone: "Okay… I'm pinned down… Greg went to 'flank' the rebels and never came back. I think he flanked into a different timeline." Ambient sound includes blaster shots, distant yelling, and armor clanking. No music. No subtitles.

🏅 Section 8.4: Animal Olympics (Cinematic Viral Shorts)

This section showcases viral prompt templates where **animals perform Olympic-level sports** in ultra-realistic cinematic fashion. These surreal, high-action videos get high engagement due to their humor, creativity, and visual absurdity — perfect for shorts or meme edits.

Tone: Epic, dramatic, or comedic
Style: Cinematic realism with wide-angle or tracking shots
Use Case: Viral reels, parody content, sports-themed edits
Key Elements: Stadium settings, exaggerated camera angles, slow motion, unexpected animal behavior

Base Prompt:

A televised cinematic video of [animal/character description] performing an acrobatic dive into a swimming pool at the Olympics, from a 10m high diving board, with slow-motion flips and spins. The shot starts with a close-up of the character's face for dramatic effect, then switches to a wide-angle aerial shot as the dive begins. Stadium lights shimmer off the water's surface. The crowd erupts in awe. Sound includes loud applause, water splash, and echoing commentator voice. No music. No subtitles.

Example Prompts

A televised cinematic video of a muscular gorilla with a determined expression performing an acrobatic dive into a swimming pool at the Olympics, from a 10m high diving board. The shot begins with a dramatic close-up on his fur-covered face, then cuts to a wide aerial shot as he launches off the board, spinning in the air with surprising grace. Stadium lights shimmer on the water. The crowd gasps in awe. Loud applause, echoing arena acoustics, and muffled announcer voice. No music. No subtitles.

A televised cinematic video of a confident emperor penguin performing an Olympic-style dive from a 10m board. The camera starts with a steady zoom as the penguin waddles to the edge, flaps its wings twice, and leaps off. In slow motion, it performs a graceful mid-air twist before plunging into the pool. Spotlights beam down. The audience bursts into cheers. Sound includes splashing, soft crowd echo, and excited announcer commentary. No music. No subtitles.

A televised cinematic video of a fluffy white goat wearing a red sports scarf performing a professional-level dive at the Olympics. The goat stands confidently on the 10m board, bleats once, then springs into a fast front tuck. Slow-motion captures the rotation, fur rippling, and a perfectly straight water entry. Massive crowd noise and camera flashes

WSODOWNLOADS.IN

follow. Ambient crowd reaction and stadium PA system announcing the perfect score. No music. No subtitles.

Other Activities in Animal Olympics

A televised cinematic realistic video of a [describe animal with detail] performing a professional-level [Olympic sport] inside a massive modern Olympic stadium filled with cheering crowds. The scene is captured in [describe camera movement: e.g., dramatic tracking shot, slow motion dive, close-up spin]. The animal shows surprising form and skill. The video includes ambient stadium sounds like roaring applause, loudspeaker commentary, camera flashes, and background national flags waving. No music. No subtitles.

Orangutan Gymnastics

A cinematic realistic video of a focused orangutan with chalk-covered hands and a custom-fit gymnastics uniform performing a professional-level floor routine in a packed Olympic stadium. Captured with dynamic crane and dolly shots as he executes backflips, spins, and a final pose with arms wide. The crowd erupts in cheers, flashes go off from cameras. Stadium lighting reflects off his sweaty brow. Ambient sounds include cheering, camera shutters, and floor mat impacts. No music. No subtitles.

Elephant Weightlifting Finals

A cinematic realistic video of a massive Asian elephant wearing a weightlifting belt and numbered jersey attempting an Olympic deadlift in a giant, echoing weightlifting arena. The camera starts low-angle, slowly pans up as the elephant lifts a barbell stacked with glowing titanium weights. Slow motion as his muscles flex, trunk curls, and tusks gleam under stadium lights. The crowd gasps, then roars. Ambient sound includes heavy breathing, the judge's whistle, and a loud *clang* as the weights drop. No music. No subtitles.

Cheetah 100m Sprint Finals

A cinematic realistic video of a lean, muscular cheetah with a sleek racing vest crouched in the starting blocks of an Olympic track. Tracking side shot as the gun fires and the cheetah launches forward, its paws pounding the turf at incredible speed. The camera follows at ground level as it overtakes robotic competitors and breaks the finish line ribbon with a roar. The crowd goes wild. Sound includes starting pistol crack, wind rushing, and high-speed paw impacts. No music. No subtitles.

WSODOWNLOADS.IN

🎤 Section 8.5: Street Interview Prompts

This section is all about capturing the humor, awkwardness, and absurdity of man-on-the-street style interviews — but with a twist. You'll find a structured prompt formula and brand-new examples designed to go viral on TikTok, Reels, and YouTube Shorts.

These videos typically feature a dramatic or comedic background, a reporter with a mic, and a highly expressive subject. Perfect for commentary on current events, parody interviews, or surreal humor.

Prompt Template for Street Interviews:

```
A street interview style video. Over-the-shoulder shot of a reporter holding a microphone with a news logo. [INTERVIEWED SUBJECT] giving an interview. Background: [BACKGROUND DESCRIPTION]. Reporter says: "[Reporter dialogue]" [INTERVIEWED SUBJECT] says: "[Subject response]" No subtitles.
```

WSODOWNLOADS.IN

🎬 Example Prompts

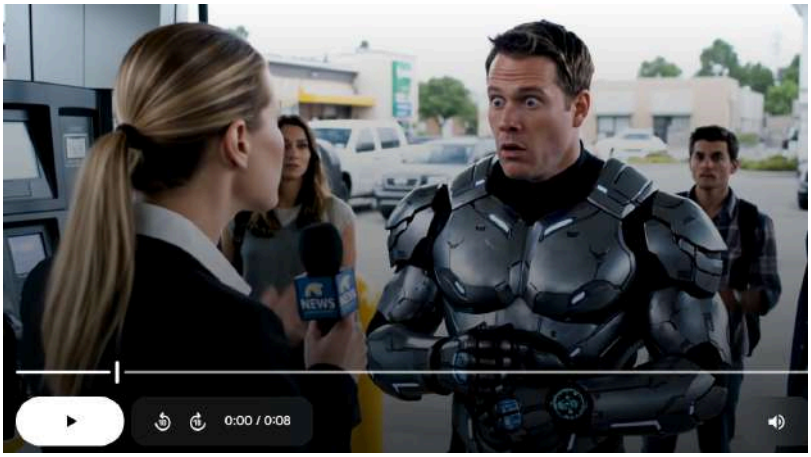

1. Time Traveler at Gas Station

```
A street interview style video. Over-the-shoulder shot of a female reporter holding a microphone with a news logo. A confused man wearing futuristic armor and a holographic watch is giving an interview.

Background: A modern-day gas station with cars refueling, as people stare at him.

Reporter says: "Sir, are you aware this isn't the year 3025?"

The man says with a robotic accent: "Wait… this isn't the fuel depot on Mars 9? Then who filled my quantum tank with… gasoline?"
```

Time_Traveler_s_Gas_Station_Mishap.mp4

Section 8.6: Cinematic Animal Shorts

This section focuses on creating hyper-realistic, story-rich cinematic videos starring animals in unexpected human-like roles. These are perfect for storytelling, parody, or just visually stunning viral clips.

Each prompt uses the cinematic structure to craft scenes that feel like they belong in a movie trailer — except the main characters are animals.

Cinematic realistic [Camera Motion or Shot Type] [Consistent Character Description] [Background] [Action] [Style] [Ambiance] [Time of Day] [Dialogue] [Sound effects] [Voice-over] [Ambient noise] [Music] No subtitles.

Prompt:

Cinematic realistic tracking shot of a silver convertible racing through winding mountain roads. A large, muscular gorilla wearing a red leather jacket grips the wheel tightly, sunglasses reflecting the road ahead.

Background: Sunset-drenched cliffs with pine trees rushing past.

Action: The gorilla shifts gears and glances at the rearview mirror as sirens wail in the distance.

Ambiance: Golden hour, cinematic lighting with lens flares.

Dialogue: The gorilla growls in a deep, cocky voice: “They’re fast… but I’m banana-fueled.”

WSODOWNLOADS.IN

Sound effects: Engine roar, tire screeches. No subtitles.

Prompt:

Cinematic realistic dolly shot following a sleek black cat in a tuxedo walking across a luxury hotel lobby.

Character: Green eyes, tiny earpiece, fluffy tail swaying with purpose.

Background: Crystal chandeliers, wealthy guests, bellhops.

Action: The cat leaps smoothly onto a luggage cart, then disappears behind a curtain.

Time of Day: Night.

Dialogue: Cat in smooth British male voice: “Target acquired. Pigeon in the penthouse.”

Sound: Jazz piano in background, low chatter. No subtitles.

WSODOWNLOADS.IN

Chapter 10: VEO 3 JSON Prompting

What is JSON Prompting?

JSON prompting isn't some mystical AI spell — it's just a more structured way to talk to AI video generators like Google VEO 3.

Instead of giving a single messy sentence like:

> "Make a drink ad that explodes with particles and lands on a rock."

You give the AI a *clear breakdown* of exactly what to show, how it moves, what it looks like, and how the scene should unfold. Like this:

```
{
  "product_name": "Blaze Energy",
  "description": "A glowing can forms from swirling liquid, lands with impact, and ripples energy across a mountain cliff.",
  "style": "cinematic, slow-mo",
  "camera": "orbit shot, macro close-up",
  "motion": "assembles mid-air, lands with energy pulse",
  ...
}
```

WSODOWNLOADS.IN

So what does this do?

By using JSON formatting, you're:

- 🧠 Giving the AI a **step-by-step storyboard**
- 🎬 Controlling the **camera style, lighting, and animation**
- 🎯 Ensuring your product is the **main hero of the scene**
- 🧰 Creating **reusable templates** for different products

Why is it so effective?

The truth is, AI struggles with vague or chaotic input. JSON prompting **breaks things down into logical components**. It mimics how human directors think:
"What is the setting? What's the lighting? What's the motion? What should happen first?"

This results in:
✅ More consistent animation
✅ Higher visual quality
✅ Ads that *actually* look professional

How to Use This Prompt Pack

This section shows you **exactly how to take the prompt template** from this guide and generate stunning CGI-style video ads using **Google VEO 3** (or any compatible platform like Google Flow, OpenArt, etc).

🔧 Step 1: Customize the JSON Prompt

Start by copying the **JSON template** from this guide. Then update the values to match your product.

👉 **Don't forget to describe:**

- Product name
- Product type
- Visual style
- Lighting
- Motion / animation
- Ending scene
- CTA (call to action) effect

Here's a quick example:

```
{
  "product_name": "Digital Assets Energy",
  "product_type": "Drink",
  "style": "futuristic cinematic",
  "lighting": "glowing pink-blue blend",
  "motion": "assembles in air and blasts down with particle trails",}
```

Step 2: Use ChatGPT to Help Build the Prompt

You don't even need to write everything yourself.

WSODOWNLOADS.IN

📌 Use this prompt in ChatGPT:

> “Using this JSON template [paste the template], generate a cinematic CGI-style video prompt for a [type of ad like product reveal or unboxing] of a [product name], describing the motion, setting, camera style, lighting, and atmosphere in a Google VEO 3-compatible structure.”

ChatGPT will output a clean, detailed JSON prompt ready to paste into your AI video tool.

Step 3: Paste Prompt into VEO 3 or Your Preferred Platform

Once you have your JSON prompt:

- Go to Google Flow or OpenArt
- Choose **Text to Video**
- Set model to **VEO 3**
- Select 1080p and desired speed (Fast is cheaper)
- Paste in your full JSON prompt
- Hit **Generate**

That’s it — your cinematic ad starts rendering!

WSODOWNLOADS.IN

Ad Templates – The Backbone of Viral Ads

Before you start creating your own mind-blowing product ads, you need a solid prompt structure — and that’s where templates come in.

Below are **two powerful JSON prompt templates** that I personally use for creating Google VEO 3 video ads. These are beginner-friendly, modular, and can work for almost any product.

General Template:

```
{
 "description": "",
 "product_name": "",
 "product_type": "",
```

```
  "brand_style": "",
  "style": "",
  "camera": "",
  "lighting": "",
  "location": "",
  "time_of_day": "",
  "atmosphere": "",
  "elements": [
    "main product animation idea #1",
    "supporting visual element #2",
    "environment enhancement #3"
  ],
  "motion": "",
  "cta_motion": "",
  "ending": "",
  "text": "",
  "keywords": [
    "aspect ratio",
    "brand",
    "visual effects",
    "camera",
    "mood",
    "no people"
  ]
}
```

WSODOWNLOADS.IN

Template 2: No People Product Reveal Ad

Use this for cinematic floating objects, product reveal sequences, or hyper-stylized ads with no humans involved.

```
{
  "product_name": "Your Product Name",
  "product_type": "e.g., Energy Drink, Perfume, Smartwatch",
  "description": "Short cinematic idea – like a glowing can forming in mid-air and crashing down with particle FX.",
  "brand_style": "Futuristic, Luxurious, Bold, Minimalist, etc.",
  "style": "cinematic, slow motion, glossy, abstract, surreal",
  "camera": "macro close-ups, zoom-ins, orbiting shots, etc.",
  "lighting": "neon glow, ambient shadows, light pulses, rim lighting",
  "location": "Digital chamber, cliffside, cityscape – whatever fits the product",
  "time_of_day": "Twilight, Night, Undefined",
  "atmosphere": "Foggy mist, particles in the air, glowing energy, floral vapor",
  "elements": [
    "Describe 3 to 4 key moments (e.g., 'product assembles mid-air')",
    "Highlight the movement and animation style"
  ],
  "motion": "Main animation sequence (e.g., spins, glows, shoots particles)",
  "cta_motion": "How the logo appears (e.g., zooms in with glitch effect)",
  "ending": "Final scene — product glowing or resting, background pulsing",
  "text": "none",
  "keywords": [
    "16:9",
```

WSODOWNLOADS.IN

"product name",

"cinematic",

"no people",

"CGI animation",

"VEO 3"

]

}

Let me show an example. I have taken this prompt template and pasted in Chatgpt and asked it:

“Using this JSON template , generate a cinematic CGI-style video prompt for a Rolex Watch Reveal, describing the motion, setting, camera style, lighting, and atmosphere in a Google VEO 3-compatible structure”

It Gave me this prompt:

{

"product_name": "Rolex Skycraft",

VEO3 Viral Product Ads Prompts

Let's put the templates into action. Below are real JSON prompts I personally used to generate viral CGI ads — all created using **Google VEO 3** with **zero manual editing**.

You can take these as inspiration, or copy-paste them directly into your workflow and tweak them to fit your product.

Demo videos can be viewed here:
How to Create $100K Viral Ads with JSON Prompting in Google VEO 3

Final Thoughts & Next Steps

Congratulations — you now hold in your hands one of the most practical, creative, and actionable VEO 3 prompt resources available.

Whether you're a solo creator, a studio experimenting with AI, or just someone curious about cinematic storytelling — you've learned how to:

✅ Understand the structure of effective VEO 3 prompts
✅ Maintain consistent characters and voices across videos
✅ Apply professional camera movements and angles to elevate realism
✅ Build engaging sequences using text-to-video formulas
✅ Recreate viral formats like ASMR, vlog-style storytelling, and cinematic scenes
✅ Develop multi-character interactions and dynamic camera-driven storytelling

What Makes a Prompt *Go Viral?*

It's not just about cool visuals — it's about **emotion**, **timing**, and **surprise**. The best-performing prompts often:

- Tell a story in 8 seconds or less
- Feature relatable or absurd characters
- Use dynamic motion to hook the viewer
- End with an unexpected line or moment
- Feel like a "real" video someone could've filmed

💡 Your Next Creative Move

This guide is just the beginning. Now it's your turn to:

- Remix the prompts
- Experiment with new camera angles
- Turn your ideas into visual stories

WSODOWNLOADS.IN

- Share your VEO 3 creations with your audience
- Package and sell your own prompt packs or animations

Whether you're making memes, storytelling shorts, or professional-grade cinematics — the tools are in your hands.
