📌 USING CAMERA MOVEMENTS IN MIDJOURNEY VIDEO

Steps to Start:

1. Open `/create` in MidJourney (use the experimental Video tool if available).
2. Select **"Low Motion"** → **Manual**.
3. In the **Motion Prompt** field, describe the movement (e.g., `slow pan left`).
4. Combine this with your main prompt to include the visual style.

Camera Movement Options

Still Camera

- No movement; the scene stays static like a painting.
- ✅ Prompt: `still camera` or leave motion blank for minimal movement.

Slow Pan Left / Right

- Moves horizontally, revealing the scene gradually.
- ✅ Prompt: `slow pan left` or `slow pan right`.

Push-In

- Camera approaches the subject, adding focus and emotion.
- ✅ Prompt: `slow push-in` or `gradual zoom-in`.

Pull-Out

- Moves backward, showing context or isolation of the subject.
- ✅ Prompt: `slow pull-out` or `zoom out from subject`.

Tilt Up / Down

- Vertical motion to reveal sky, mountains, or ground.
- ✅ Prompt: `slow tilt up` or `tilt down from clouds to ground`.

Tracking Shot (Side)

- Follows the subject sideways for a sense of motion.

- ✅ Prompt: `tracking shot side view` or `sideways tracking motion`.

Orbit / Circular Movement

- Moves around the subject, giving a 3D perspective.
- ✅ Prompt: `orbit camera movement` or `circular dolly`.

Handheld Camera Feel

- Slight shake for realism and texture.
- ✅ Prompt: `handheld camera motion` (⚠ moderate movement only).

Overhead Drone Shot

- Bird's-eye view; floating top-down perspective.
- ✅ Prompt: `aerial shot moving forward` or `drone view`.

Steadicam Walk-Through

- Smooth forward motion, like walking through a space.
- ✅ Prompt: `walking forward` or `steadicam corridor walkthrough`.

Parallax Slide

- Foreground and background move at different speeds for depth.
- ✅ Prompt: `parallax motion` or `foreground slide left`.

Zolly (Dolly Zoom Effect)

- Zoom in while moving backward, creating visual distortion.
- ✅ Prompt: `dolly zoom` or `vertigo effect`
- ⚠ Experimental in MidJourney; may glitch.

Jittery Jumpcut

- Quick, chaotic movements between angles.
- ✅ Prompt: `jumpcut movement` or `jittery fast shake`.

Crane Shot Down

- Camera descends from above for a dramatic reveal.
- ✅ Prompt: `crane down` or `descending shot`.

Dolly Through Object

- Moves through portals, doorways, smoke, etc.
- ✅ Prompt: `dolly through` or `move through fog`.

360° Spin

- Rotates fully around a point.
- ✅ Prompt: `360 spin around` or `circular pan`.

Whip Pan

- Rapid left/right motion for action effects.
- ✅ Prompt: `whip pan right` or `quick pan motion`.

First-Person Gliding

- Simulates drone or FPV camera flight.
- ✅ Prompt: `first-person glide` or `flying POV`.

Zoom-Pulse

- Subtle zoom in/out to mimic breathing motion.
- ✅ Prompt: `pulse zoom` or `zoom drift`.

Time-Lapse Drift

- Simulates slow-moving time-lapse.
- ✅ Prompt: `time-lapse motion` or `slow drift through time`.

Bonus Tips 🔧

- Use speed modifiers like `fast`, `slow`, `gradual`, `subtle`, or `jittery`.
- Combine movements for complex effects (e.g., `slow pan left` + `push-in`, `drone overhead` + `orbit motion`).
- Add mood descriptors: `slow tilt up — melancholic`, `tracking shot — dreamy`.
