Sessions But No Sales: *Conversion, Not Traffic*

The video pops, the store gets flooded, sessions pour in, and almost nobody buys. The instinct is to blame the product. Usually it is neither the product nor the traffic.

MODULE 8.2

Sessions But No Sales: It's *Conversion, Not Traffic*

Here is the situation that breaks people's spirit: the video pops, the store gets flooded with visitors, sessions are pouring in, and **almost nobody buys**. The instinct is to think the product is bad or the traffic is junk.

> *"Usually it is neither. Lots of sessions and no sales is almost always a conversion problem, not a traffic problem."*

You proved the traffic works, the views and the clicks happened. **What failed is what happened after they landed.**

WHY THE REFRAME MATTERS

It points you at the right fix. When traffic is high and sales are low, you do not go chasing a new product or more views. **You look at the website and the offer, because that is where the leak is.** The next modules are the plumbing for that leak.
