A VISUAL REFERENCE FOR HUMAN EYES

The Ultimate GPT Image 2 Guide.

BY

Tianyu Xu

linkedin.com/in/tianyuxu

PREFACE · 01

Why this guide.

> **A visual-first reference. Every page surfaces an image and the keywords that produced it.**

OpenAI's GPT Image 2 has surpassed Google's Nano Banana 2 and become the default image model for many people. Based on relentless testing, it is essentially **the most powerful image model to date**.

My methodology is **single-variable testing**: hold the character constant, change one keyword, see what changes. Each plate that follows lists the keywords used.

A TASTE OF SINGLE-VARIABLE TESTING — 9 looks, one keyword ↗

PREFACE · 02

How to use it.

This is a guide for human eyes.

See the keyword, see the example, then use it. You could feed this guide to an AI, but I think we learn better by **looking** and testing our own prompts.

Read it in a few minutes, or come back later and use the styles as **visual references**. The images are mostly 1:1 for layout convenience; GPT Image 2 works at any aspect ratio.

WHAT THIS GUIDE WILL SHOW YOU

Five disciplines ↗

CONTENTS

Five chapters.

One character reference, thirty-three single-variable tests, grouped into five disciplines. Highlighted words are the operative keywords.

01 **Photography** 8 PLATES · SHOT, CAMERA, LIGHT, ERA

02 **Art & Medium** 7 PLATES · HISTORY, STYLE, FORMAT

03 **Storyboard** 11 PLATES · PANELS, POSTERS, TYPE

04 **Mockup** 7 PLATES · APP UI, WEBSITES

05 **Infographic** 5 PLATES · CHEAT-SHEET STYLES

PART 01 · 08 KEYWORDS

Photography.

Change the apparatus that made the photograph. Swap the shot type, the camera, the lens behaviour, the emulsion, the filter, the light, the era. Same character, different mood.

shot type · camera brand · camera effect · film stock · filter · lighting · decade · product angle

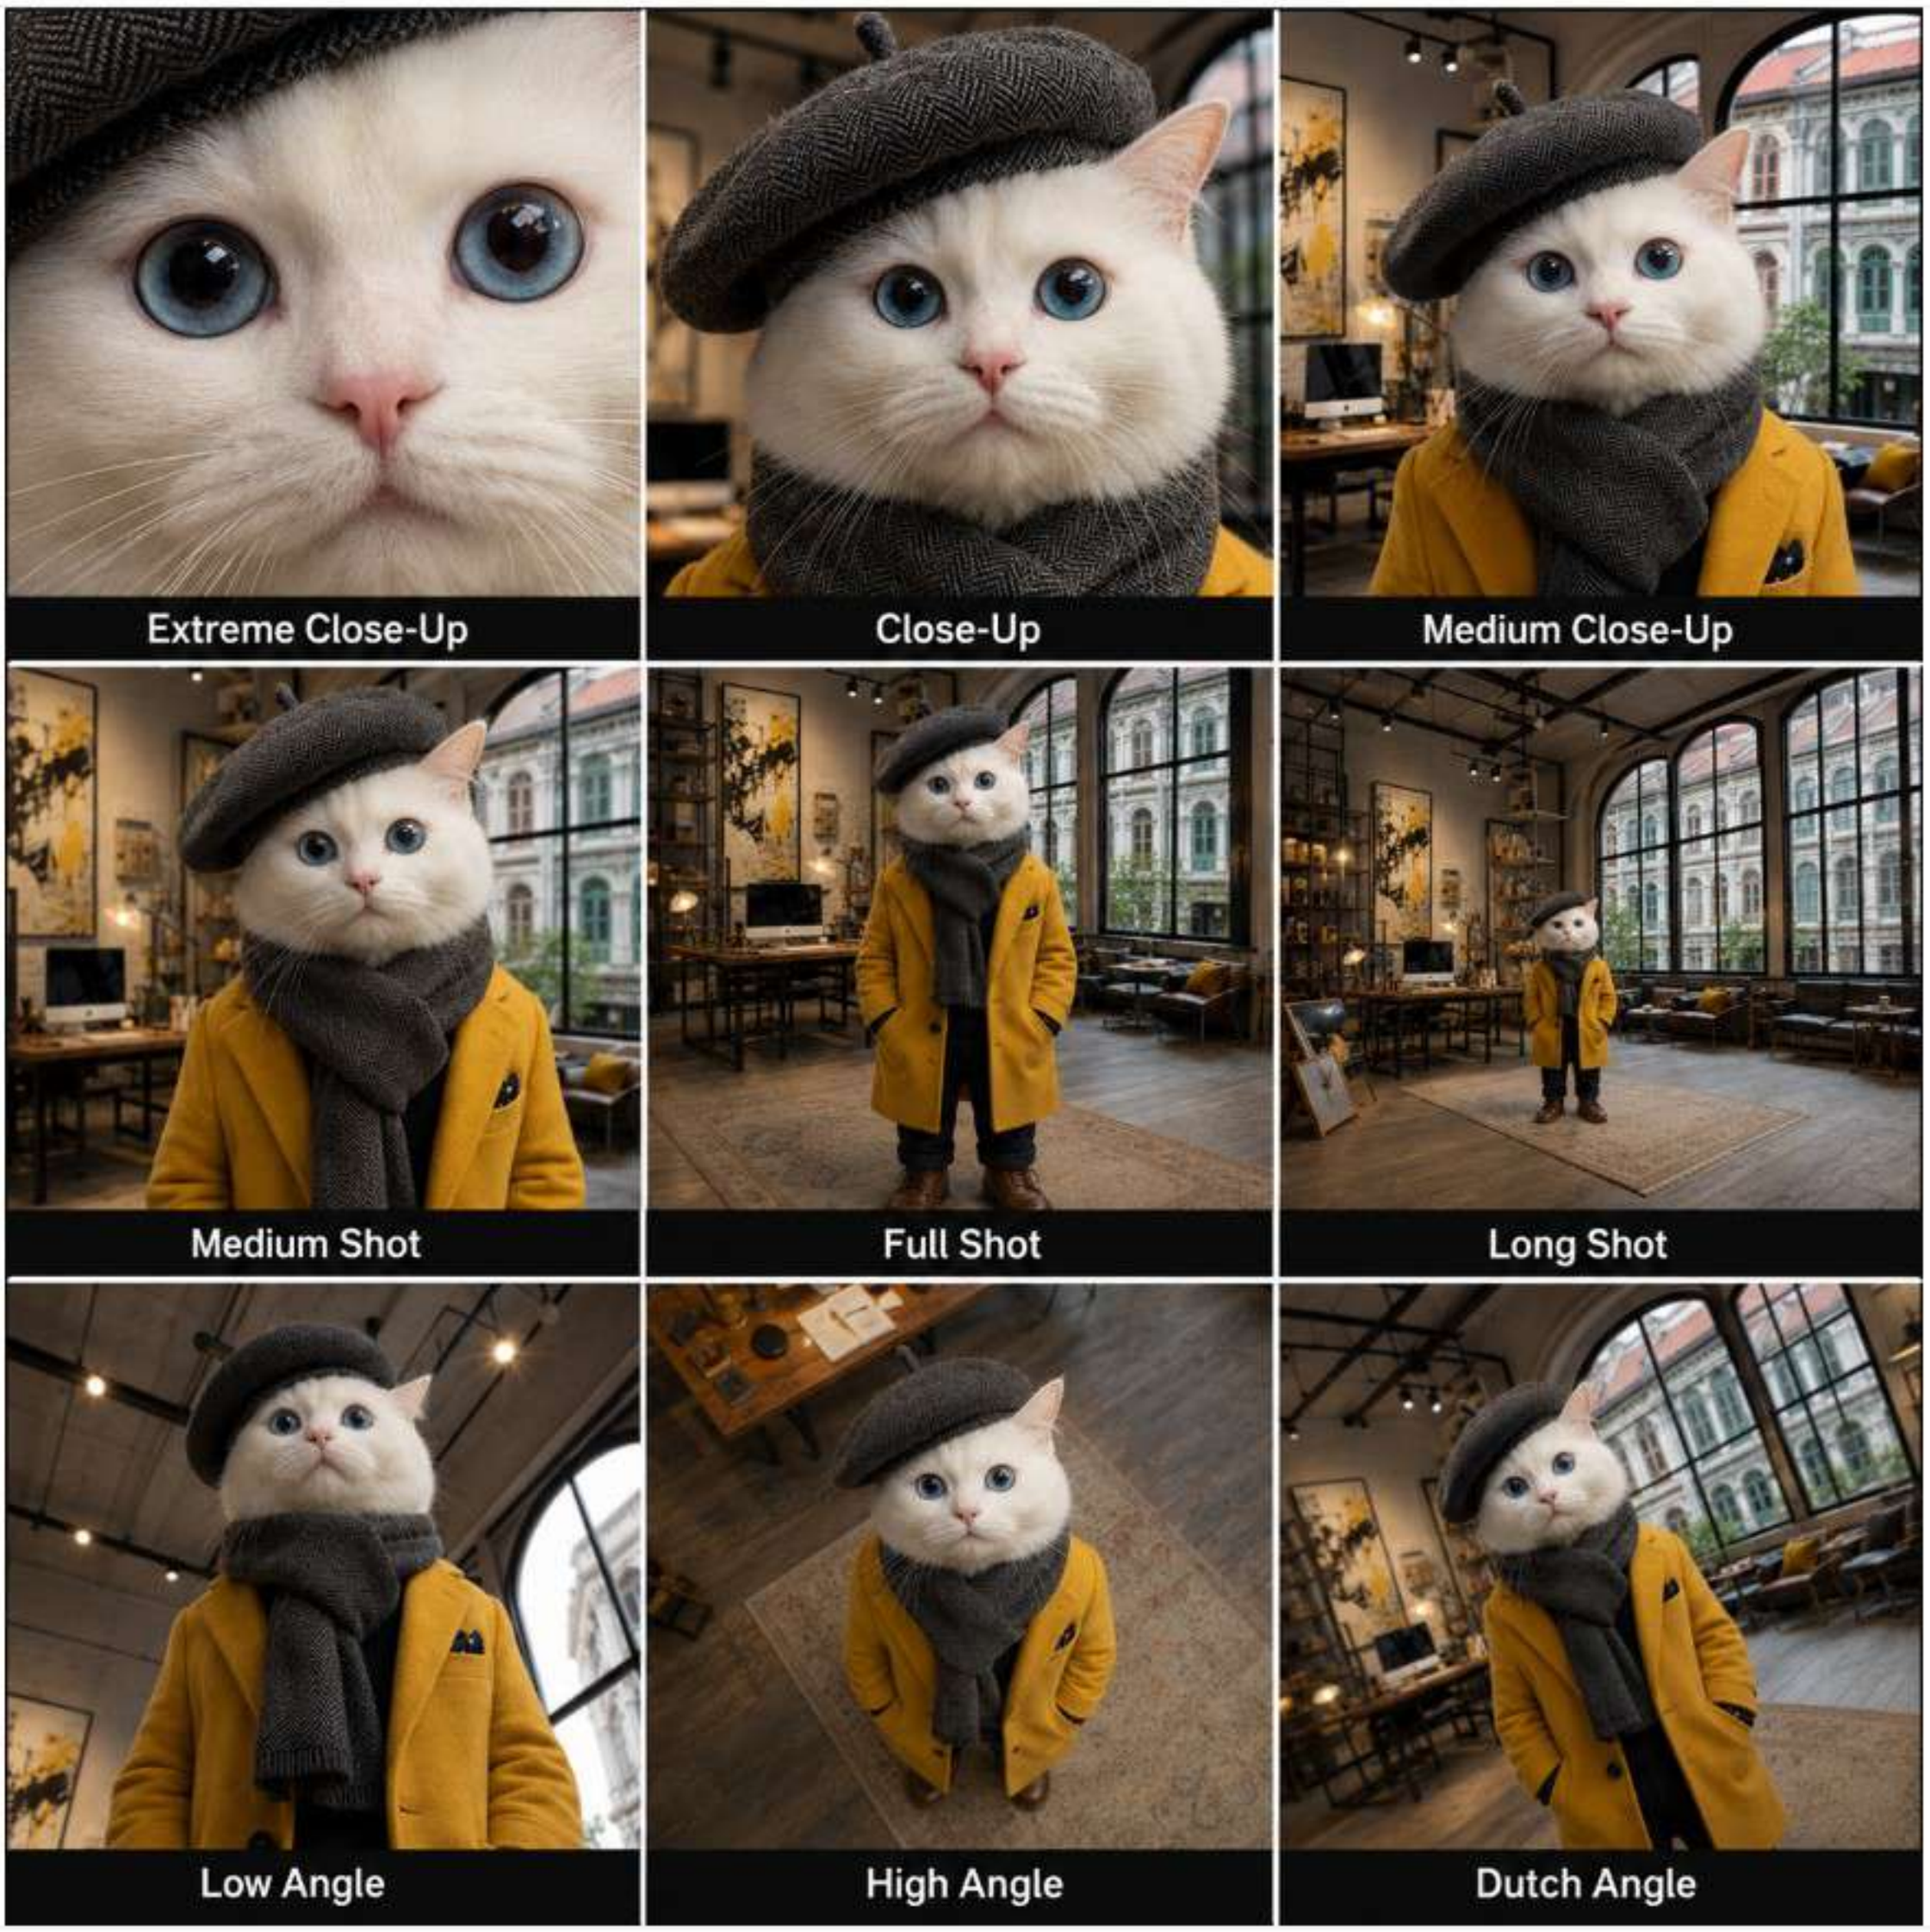

PLATE 01 · 9-UP GRID

The most fundamental keyword in cinematography. Change the **shot type** and you change how the subject reads: intimate, neutral, or environmental.

keywords: extreme close-up · close-up · medium close-up · medium shot · full shot · long shot · low angle · high angle · dutch angle

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

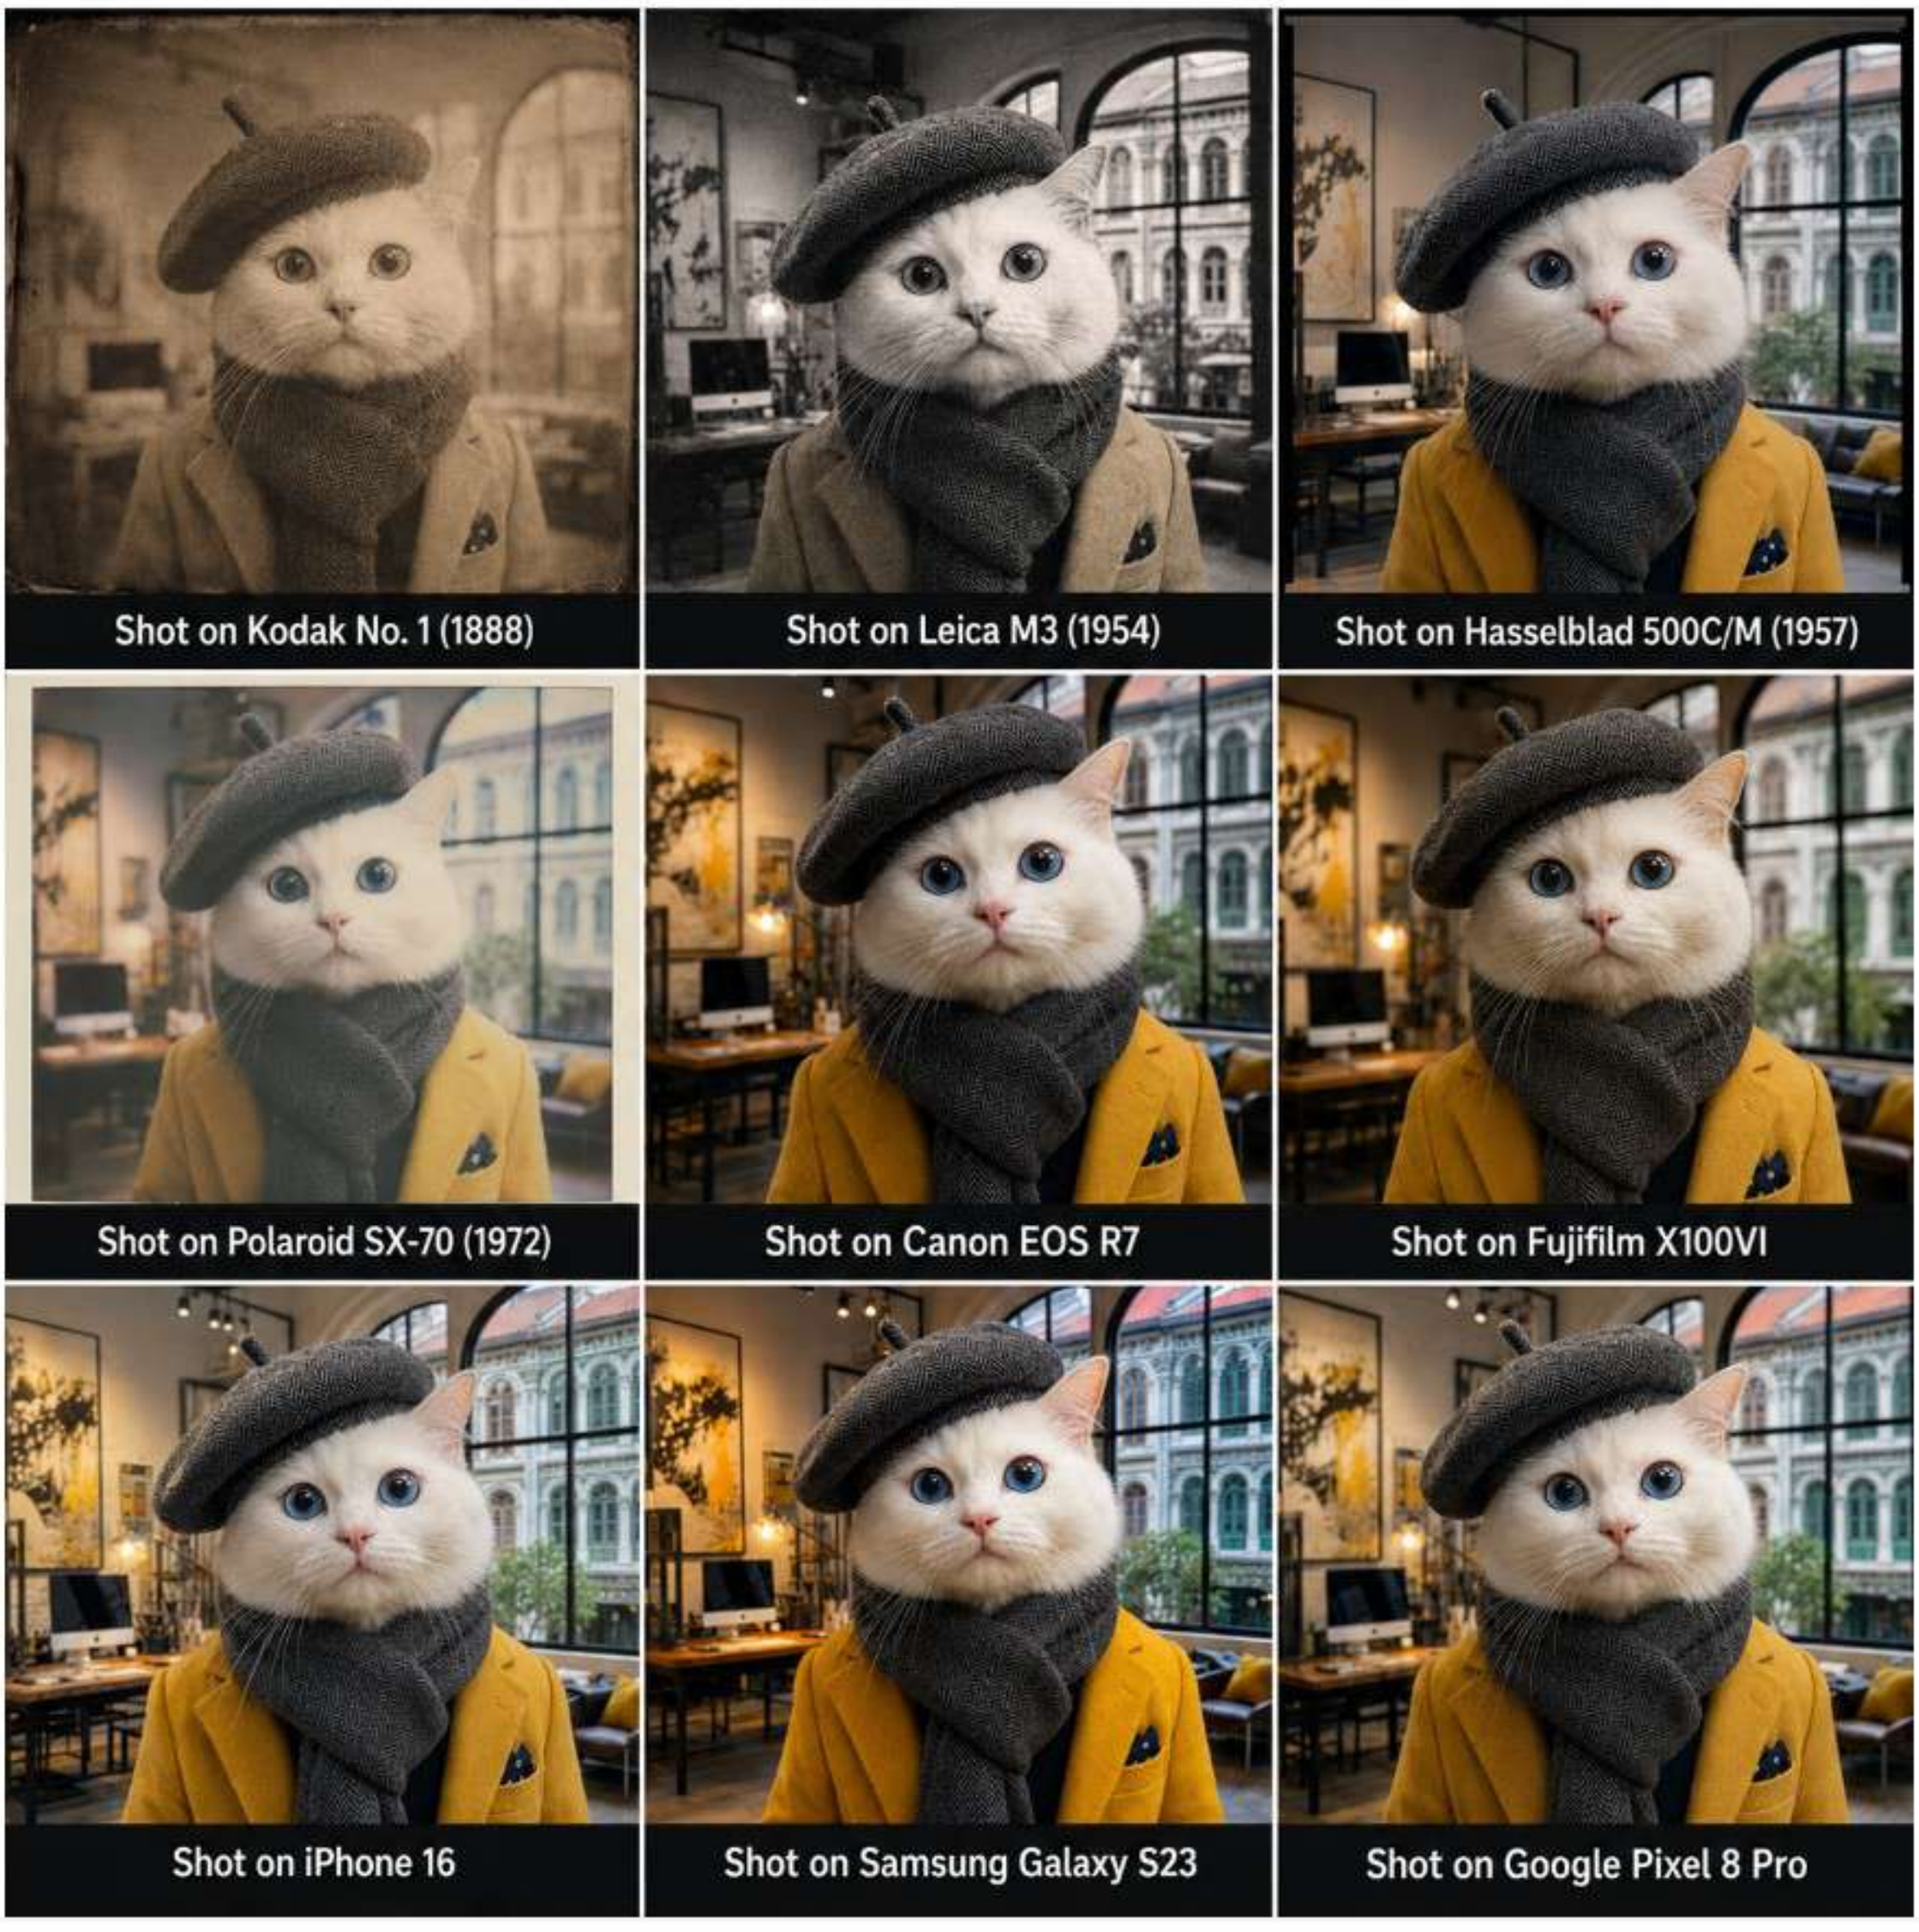

PLATE 02 · 9-UP GRID

Naming a real **camera brand** and model brings its sensor, lens character, and era into the frame. A Leica M3 reads documentary; an iPhone 16 reads contemporary.

keywords: Kodak No. 1 (1888) · Leica M3 (1954) · Hasselblad 500C/M (1957) · Polaroid SX-70 (1972) · Canon EOS R7 · Fujifilm X100VI · iPhone 16 · Samsung Galaxy S23 · Google Pixel 8 Pro

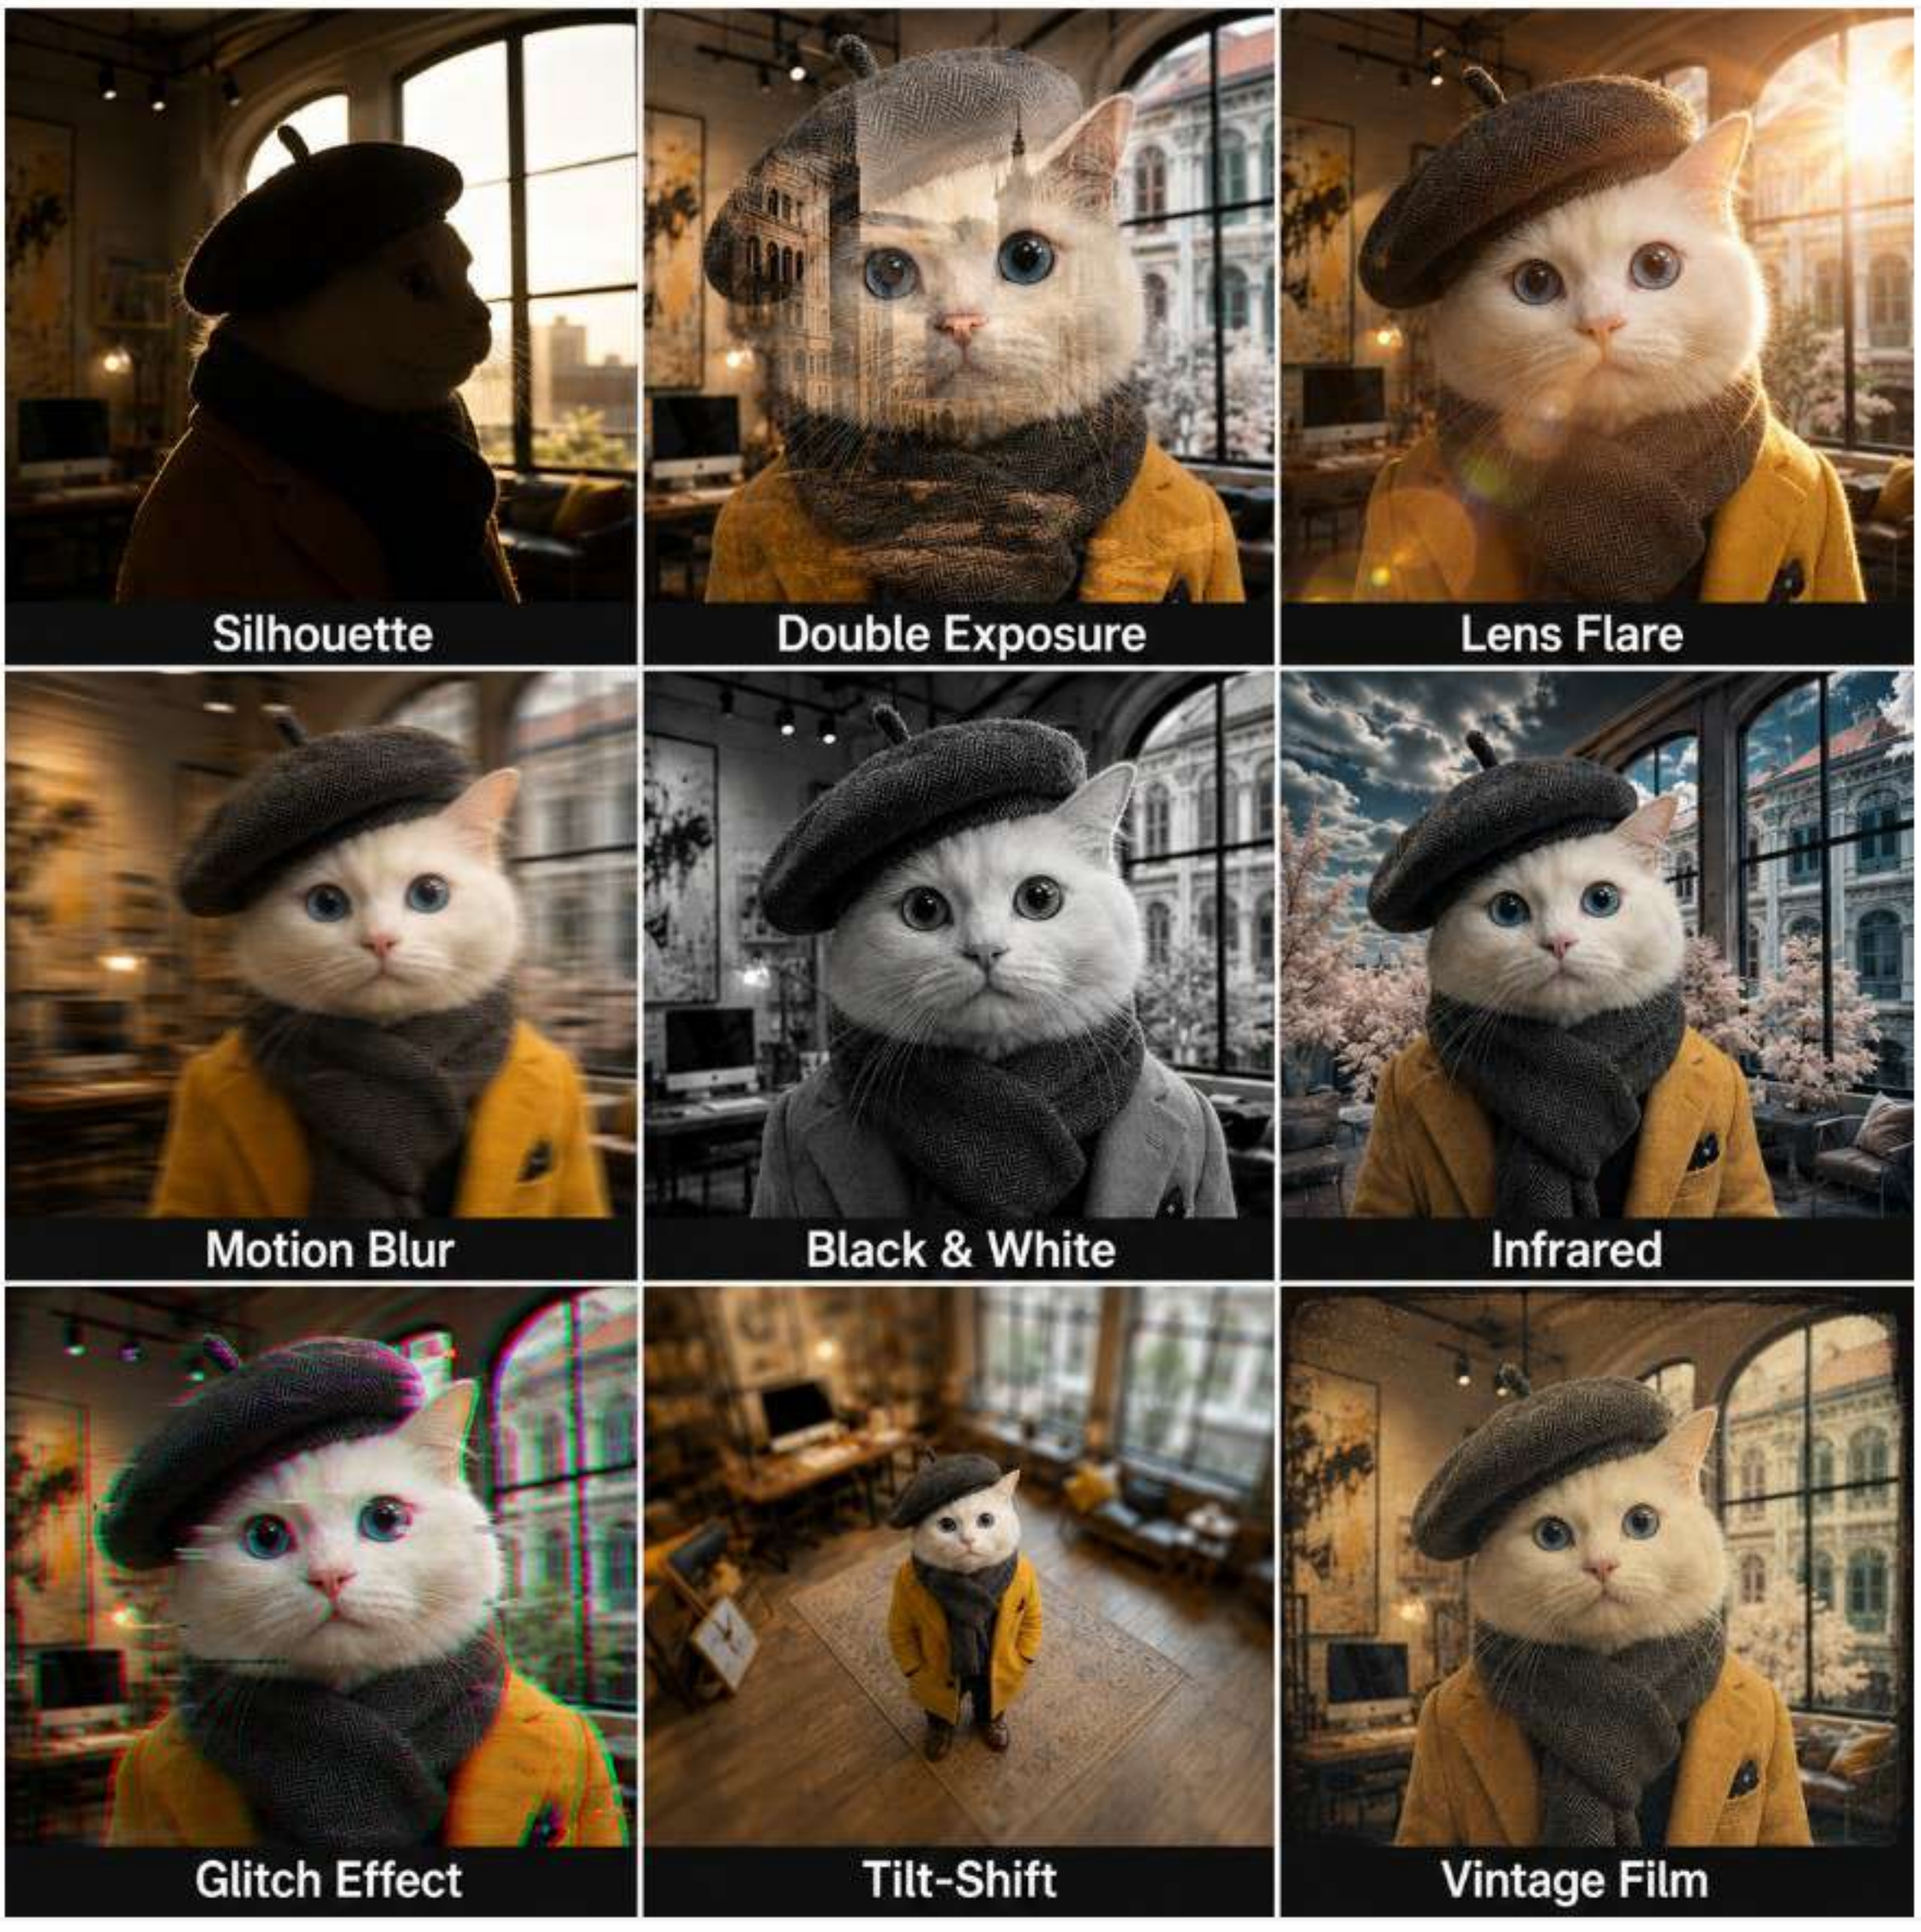

PLATE 03 · 9-UP GRID

Effects that live inside the camera itself: exposure tricks, lens artefacts, post-process texture. The **camera effect** is the cheapest way to add drama to a flat capture.

keywords: silhouette · double exposure · lens flare · motion blur · black & white · infrared · glitch effect · tilt-shift · vintage film

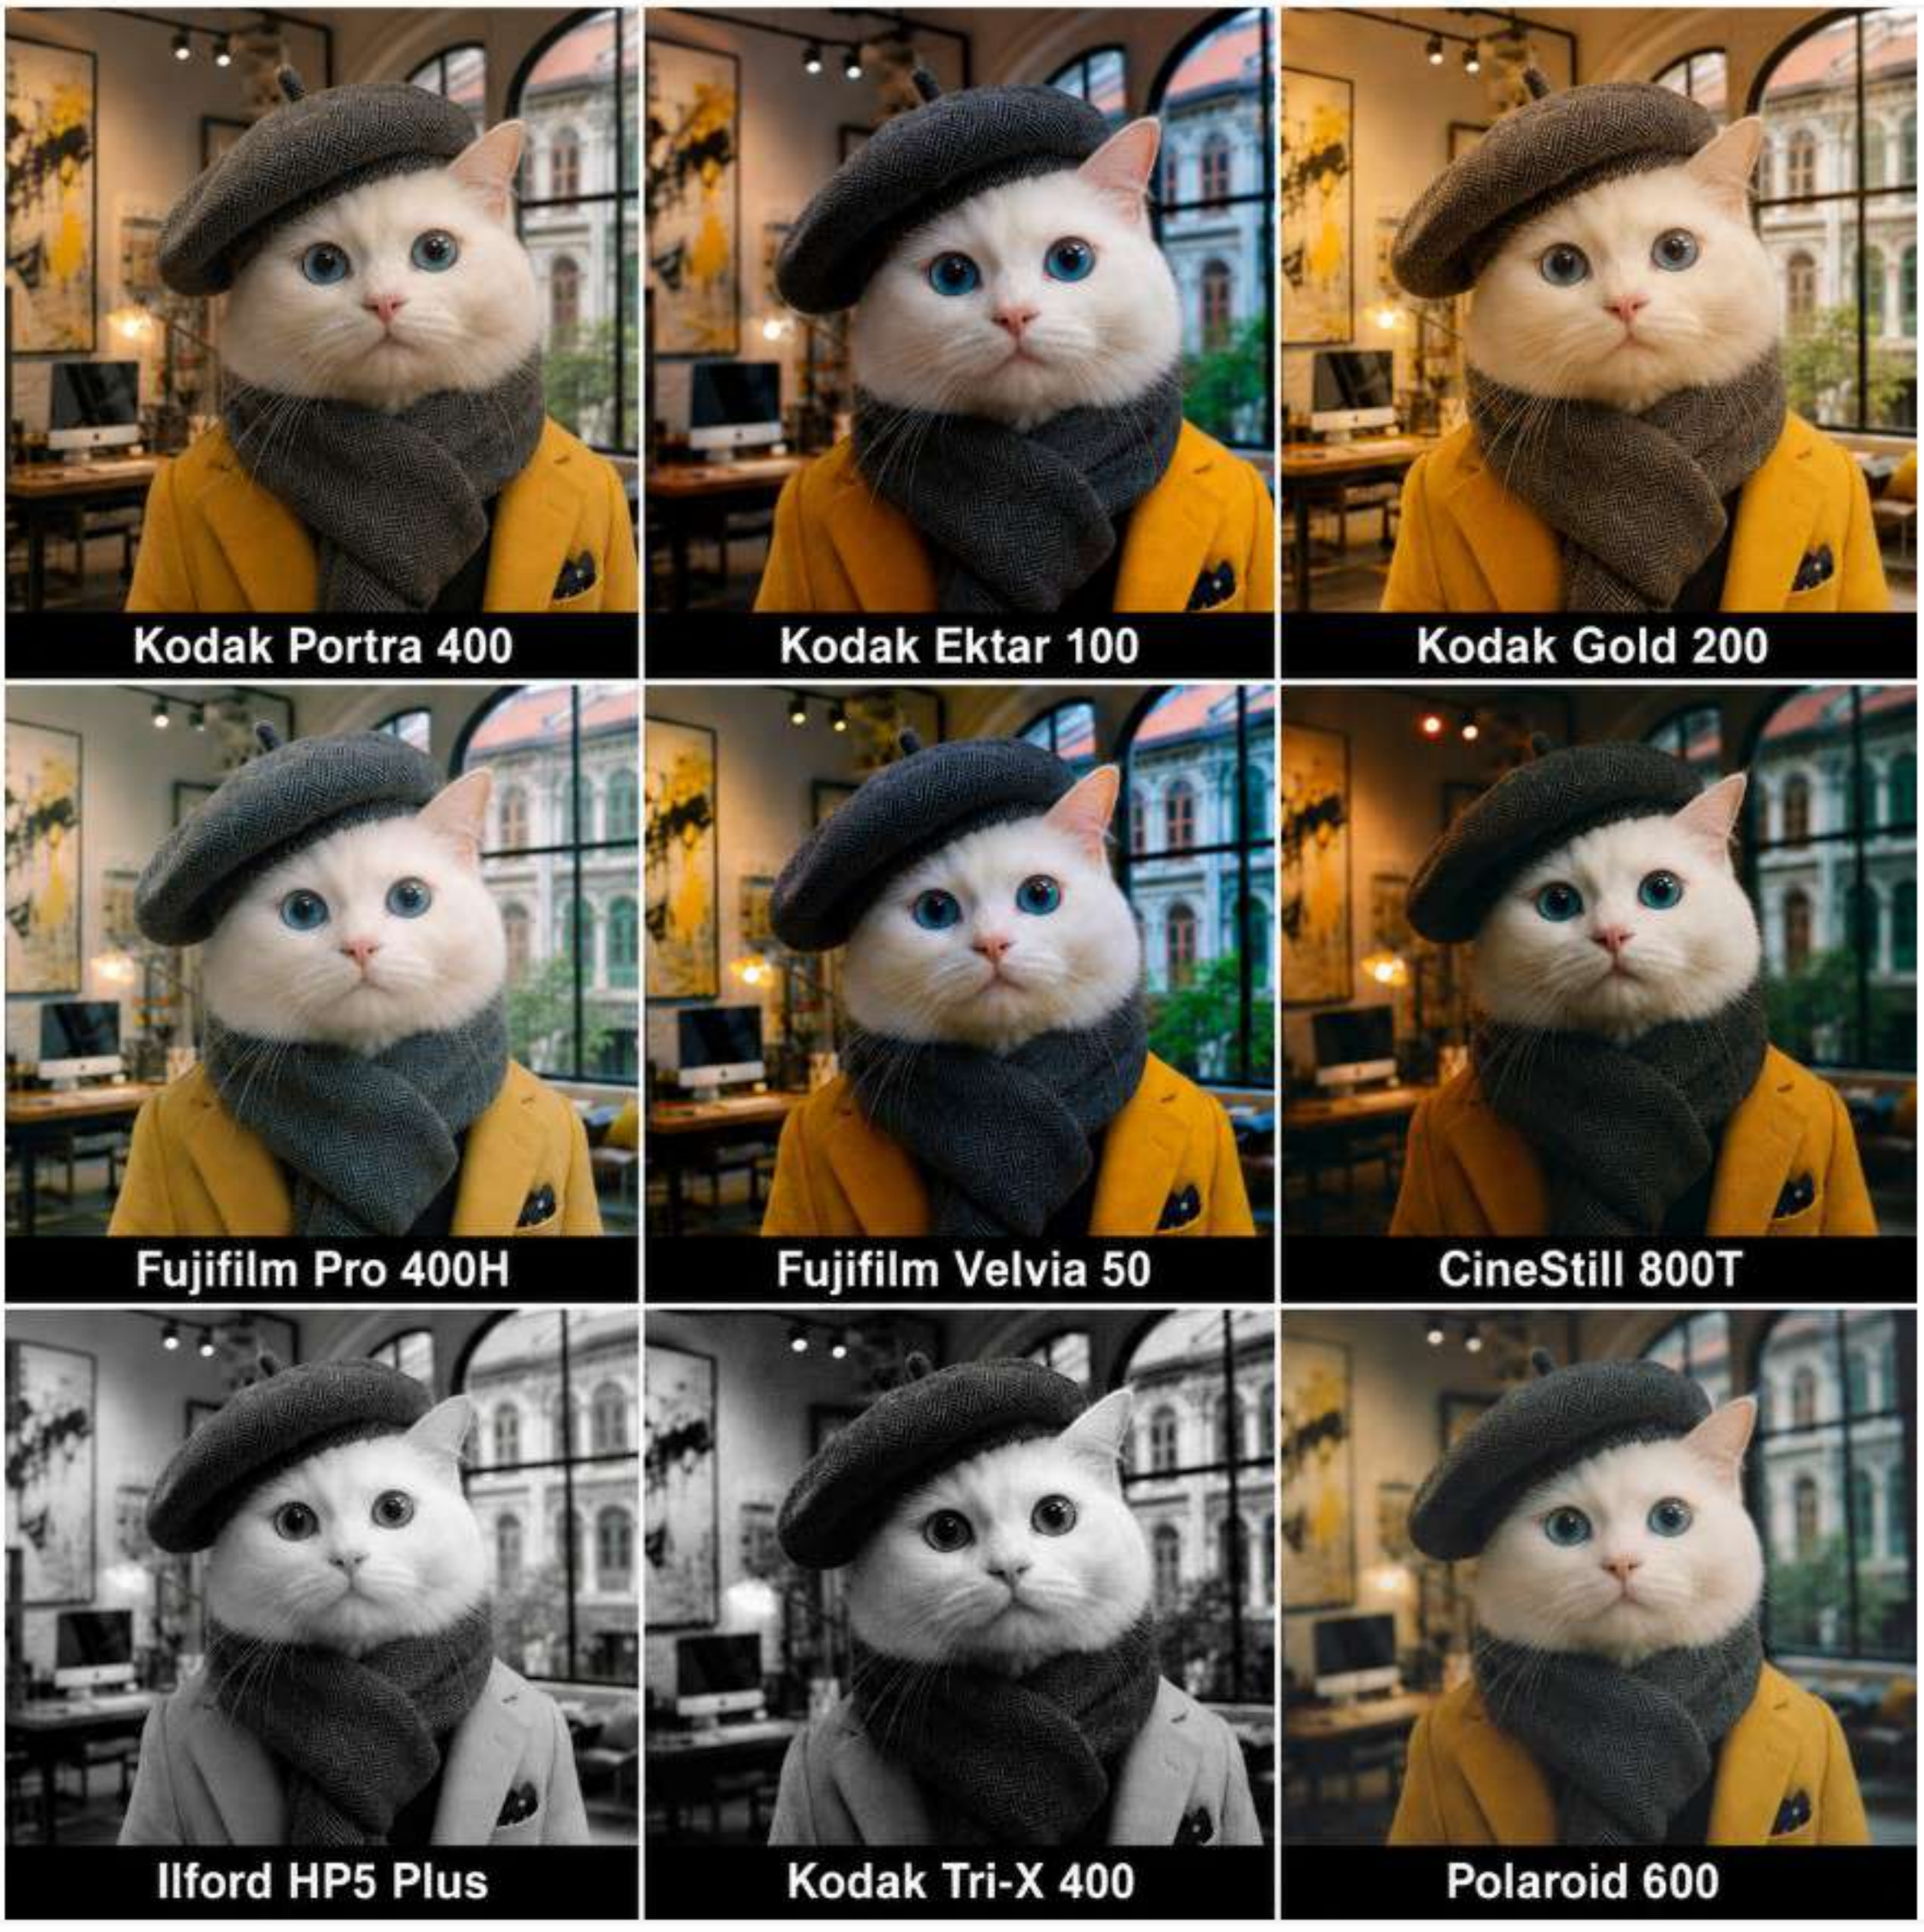

PLATE 04 · 9-UP GRID

Naming a real **film stock** is one of the highest-leverage keywords in the model. It brings palette, grain, contrast, and the cultural memory of a whole era with it.

keywords: Kodak Portra 400 · Kodak Ektar 100 · Kodak Gold 200 · Fujifilm Pro 400H · Fujifilm Velvia 50 · CineStill 800T · Ilford HP5 Plus · Kodak Tri-X 400 · Polaroid 600

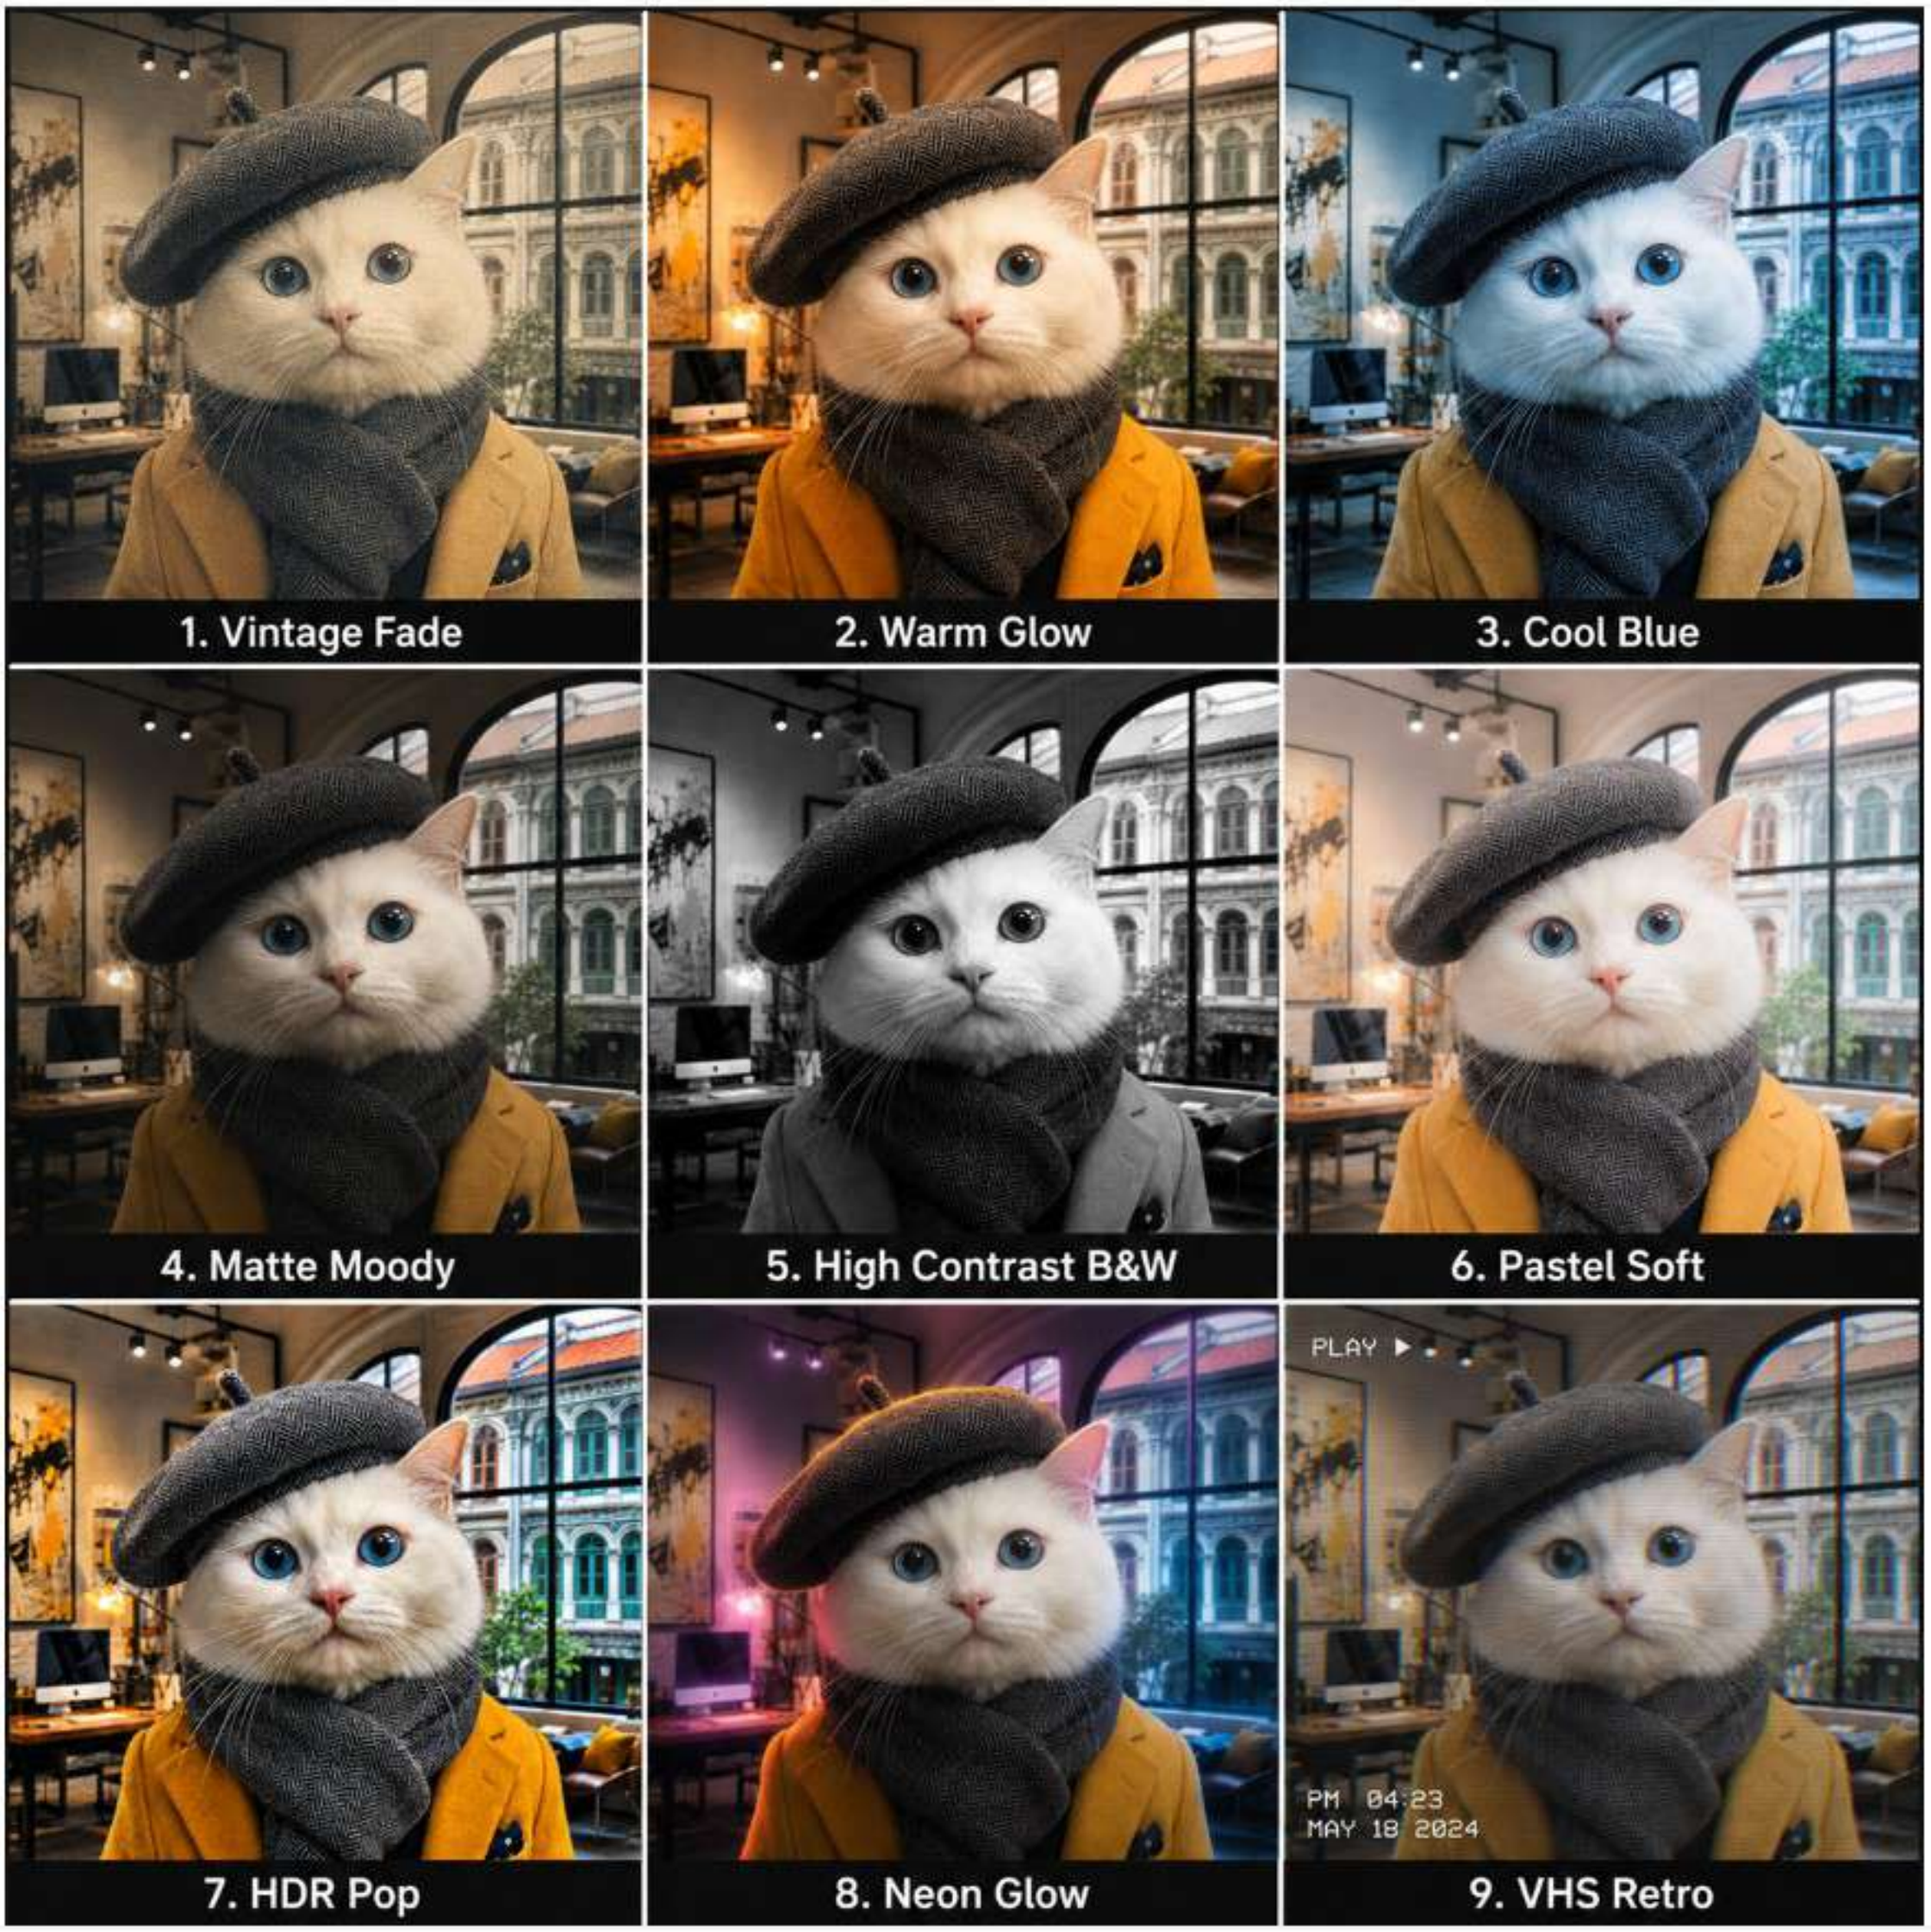

PLATE 05 · 9-UP GRID

A **filter** keyword sits on top of everything else you prompted and pushes the whole frame toward a known look: warm, cold, faded, high-contrast, vintage.

keywords: Instagram-style preset names · app filter names · named colour grades

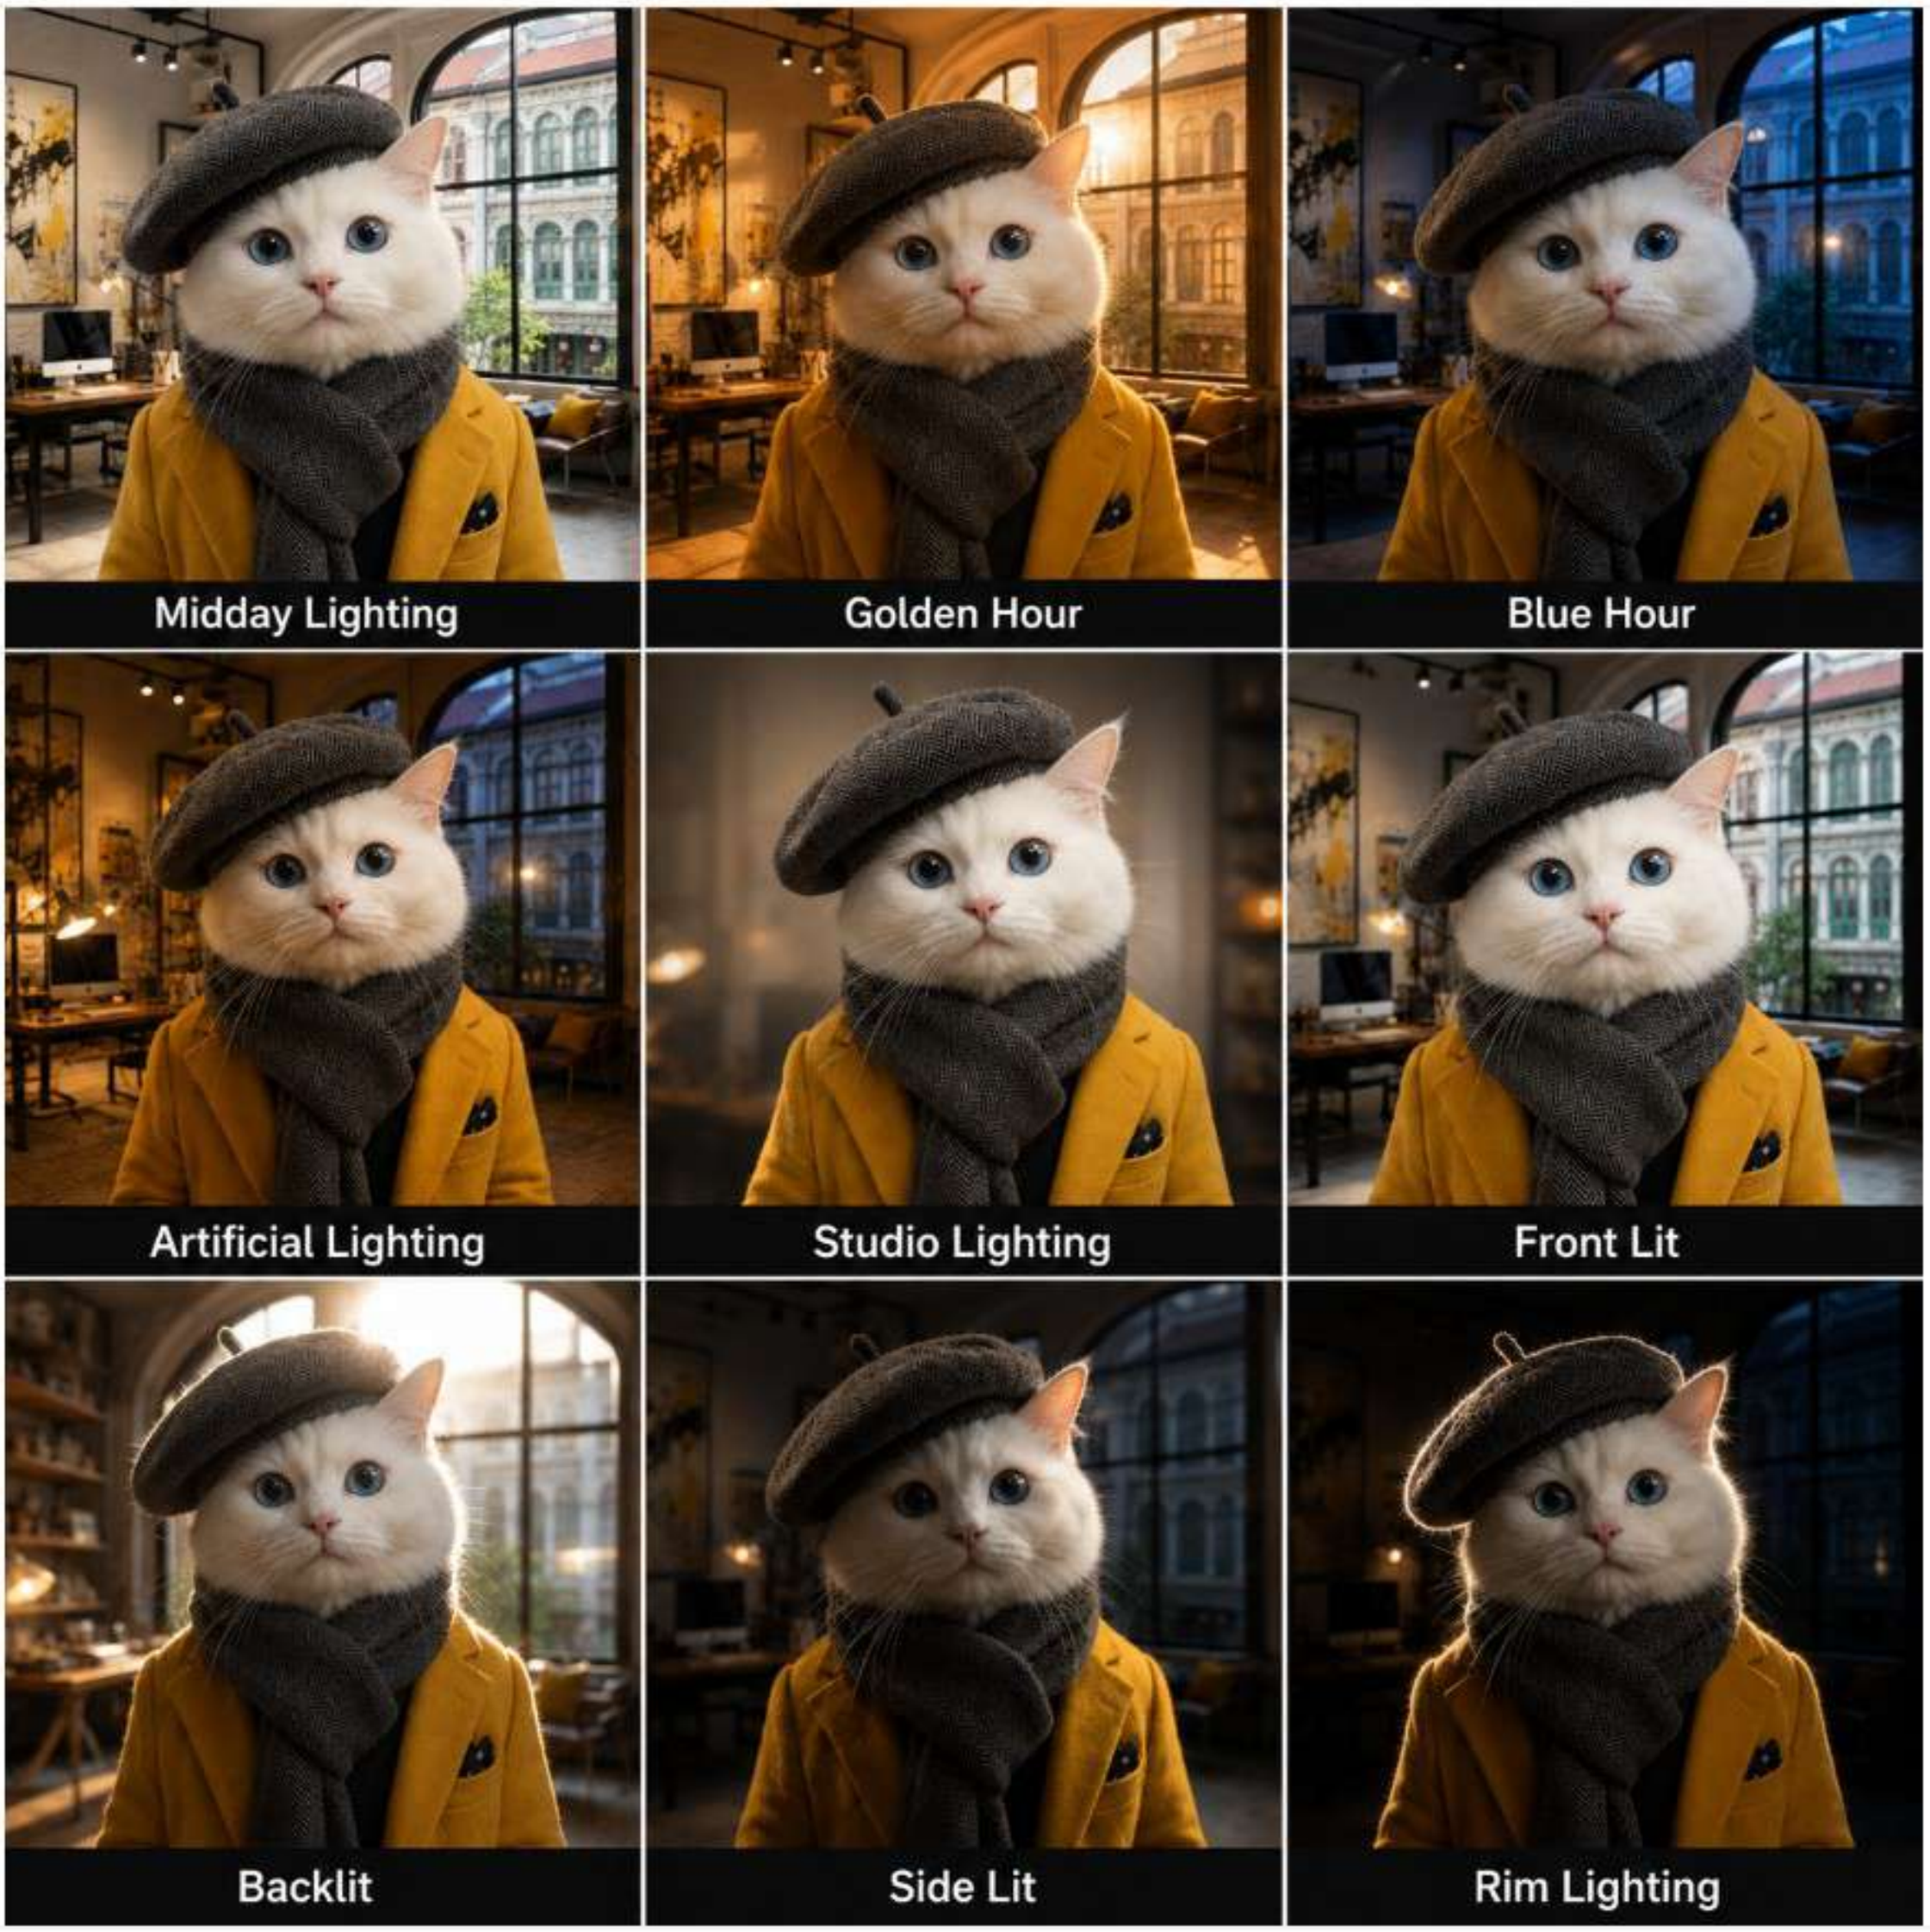

PLATE 06 · 9-UP GRID

Time of day, source, and direction. **Lighting** is the most underused keyword for non-photographers; it can do more for a frame than any colour grade.

keywords: midday lighting · golden hour · blue hour · artificial lighting · studio lighting · front lit · backlit · side lit · rim lighting

PLATE 07 · 9-UP GRID

A single **decade** word pulls in interior design, technology, palette, posters, and grain. The cleanest way to time-travel without writing a paragraph of context.

keywords: 1900s · 1920s · 1940s · 1950s · 1960s · 1970s · 1980s · 1990s · early 2000s

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

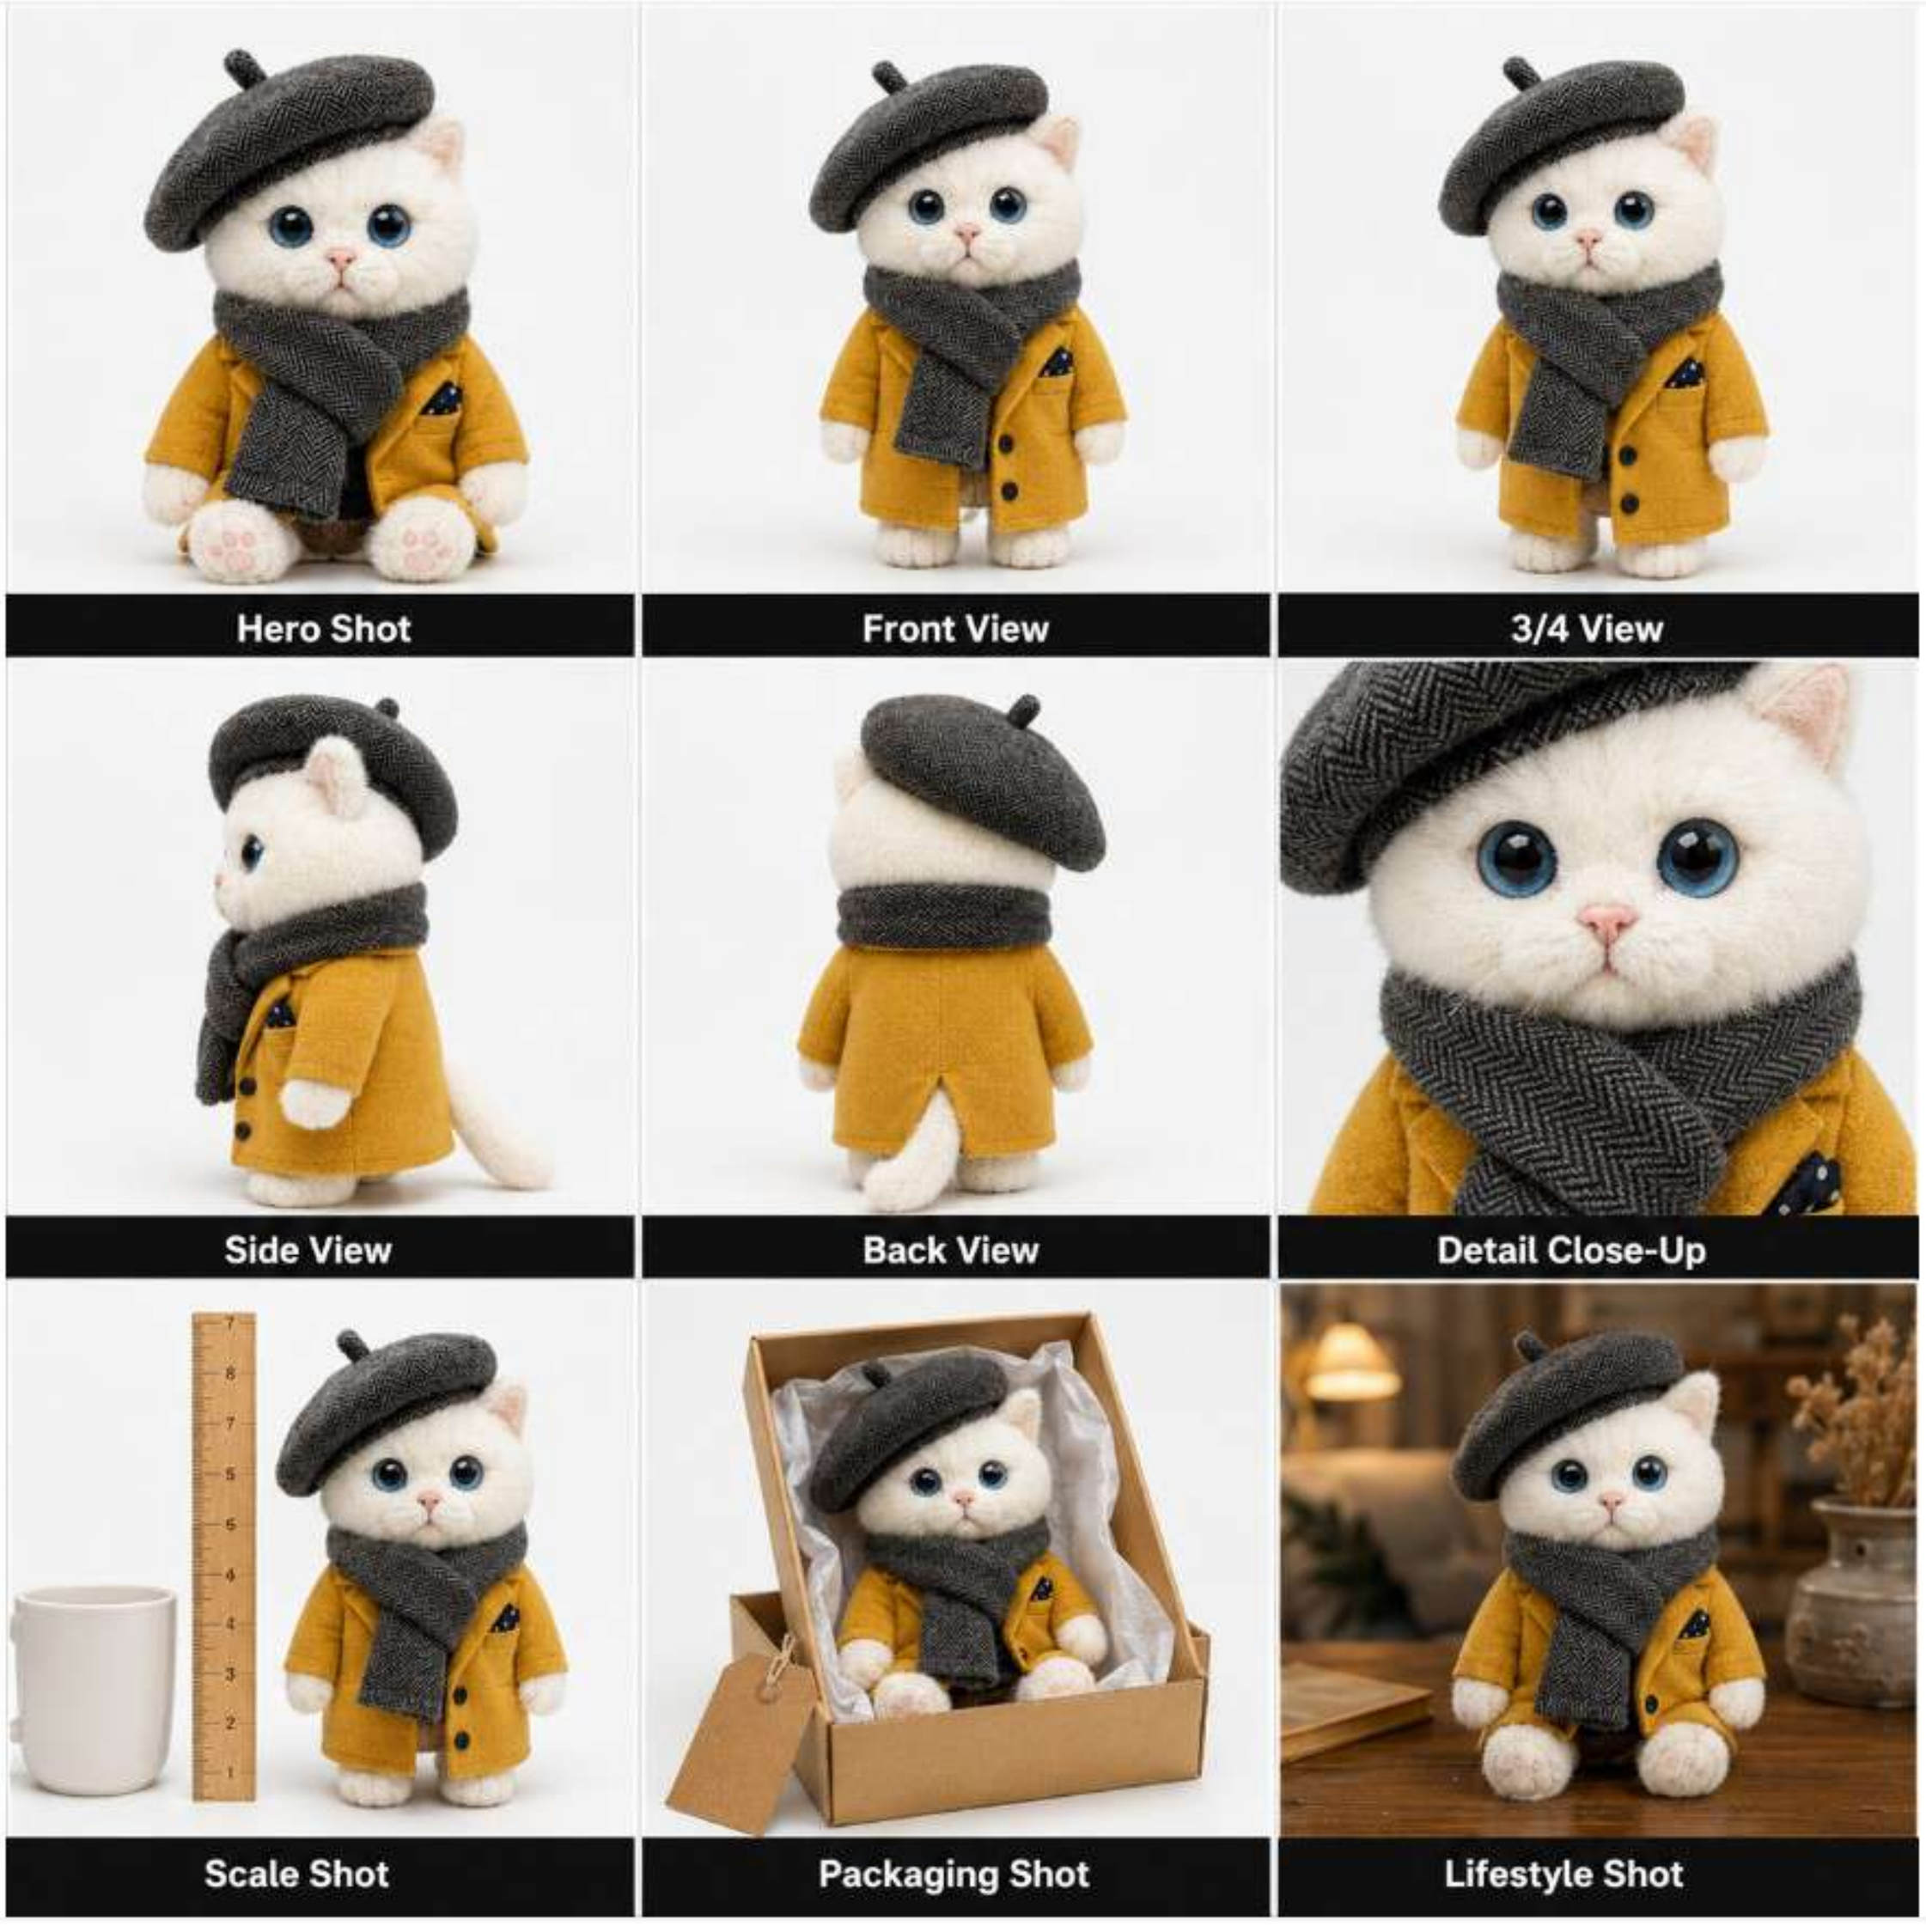

PLATE 08 · 9-UP GRID

Once you have a character or product, **product angle** keywords give you a full e-commerce shoot in one prompt: hero, three-quarter, packaging, scale, lifestyle.

keywords: hero shot · front view · 3/4 view · side view · back view · detail close-up · scale shot · packaging shot · lifestyle shot

PART 02 · 07 KEYWORDS

Art & Medium.

Photography assumes a lens. The rest of human image-making does not. Project the same character into art history, into illustration, into comics and animation. The medium itself becomes the prompt.

historical art medium
historical drawing
modern art medium
modern drawing style
comic
animation
product mockup

PLATE 09 · 9-UP GRID

Anchor the keyword to a century and a **historical art medium** and the model collapses style, palette, support, and convention all at once. Specificity wins.

keywords: prehistoric cave painting · 8th c. BC Greek mosaic · 2nd c. Roman fresco · 12th c. Byzantine tempera icon · 15th c. illuminated manuscript · 16th c. woodcut · 11th c. Chinese ink & silk · 18th c. Japanese woodblock · 19th c. lithograph

PLATE 10 · 9-UP GRID

A **historical drawing style** sits one level below medium: it dictates line, shading, and ornament conventions that defined a region and a period.

keywords: 15th c. Italian Renaissance · 16th c. German woodcut · 19th c. Victorian engraving · 1890s French Art Nouveau · 16th c. Ottoman miniature · 11th c. Chinese gongbi · 17th c. Chinese ink wash · 18th c. Japanese ukiyo-e · 18th c. Korean minhwa

PLATE 11 · 9-UP GRID

Once you leave the lens, **modern art medium** keywords let you simulate physical surface and material: oil thickness, watercolour bleed, charcoal grain, paper texture.

keywords: oil on canvas · acrylic painting · watercolor · charcoal drawing · ink illustration · paper collage · screen print · mixed media · abstract sculpture

PLATE 12 · 9-UP GRID

Where medium covers surface, **modern drawing style** covers movement. Pick an -ism and the model will give you its full vocabulary of colour and composition.

keywords: impressionism · cubism · fauvism · art deco · surrealism · pop art · minimalism · abstract expressionism · photorealism

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

PLATE 13 · 9-UP GRID

A **comic** register signals line, halftone, panel logic, and dialogue conventions. Choose by audience: superhero, manga, indie press, newspaper, web vertical.

keywords: newspaper comic strip · ligne claire · American superhero comic · underground comix · shonen manga · shojo manga · webtoon · graphic novel noir · editorial cartoon

PLATE 14 · 9-UP GRID

Animation styles cover not just look but production technique: rubber-hose for early cartoons, stop-motion for tactile worlds, anime for 90s mood, CGI for now.

keywords: rubber hose cartoon · limited animation · 1990s Japanese anime · stop-motion puppet · clay animation · flash animation · CGI animation · paper cut-out animation · rotoscope animation

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

PLATE 15 · 9-UP GRID

The same character projected onto a **product mockup** line. The fastest way to test a character IP across merch categories without touching a 3D tool.

keywords: wireless earbuds · portable speaker · portable charger · smartwatch · instant photo printer · phone case · insulated tumbler · scented candle · plush keychain

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

PART 03 · 11 KEYWORDS

Story board.

Single images are easy. Sequences are where most models break down. GPT Image 2 holds character consistency across panels well enough to compose comics, storyboards, and posters from a single prompt. The variable here is layout.

single-panel
three-panel
five-panel
3×3 storyboard
5×5 storyboard
movie poster
rubberhose
minimalistic poster
bento grid
monochrome text
typography-centric

PLATE 16 · 1 PANEL

The **single-panel comic** is the simplest narrative unit: one frame, one beat, one caption. Useful when you want the image to feel authored rather than rendered.

keywords: "single-panel comic"

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

PLATE 17 · 3 PANELS

The **three-panel comic** is the workhorse of gag strips: setup, turn, punch. The character stays stable across all three; the hard part used to be exactly this.

keywords: "three-panel comic"

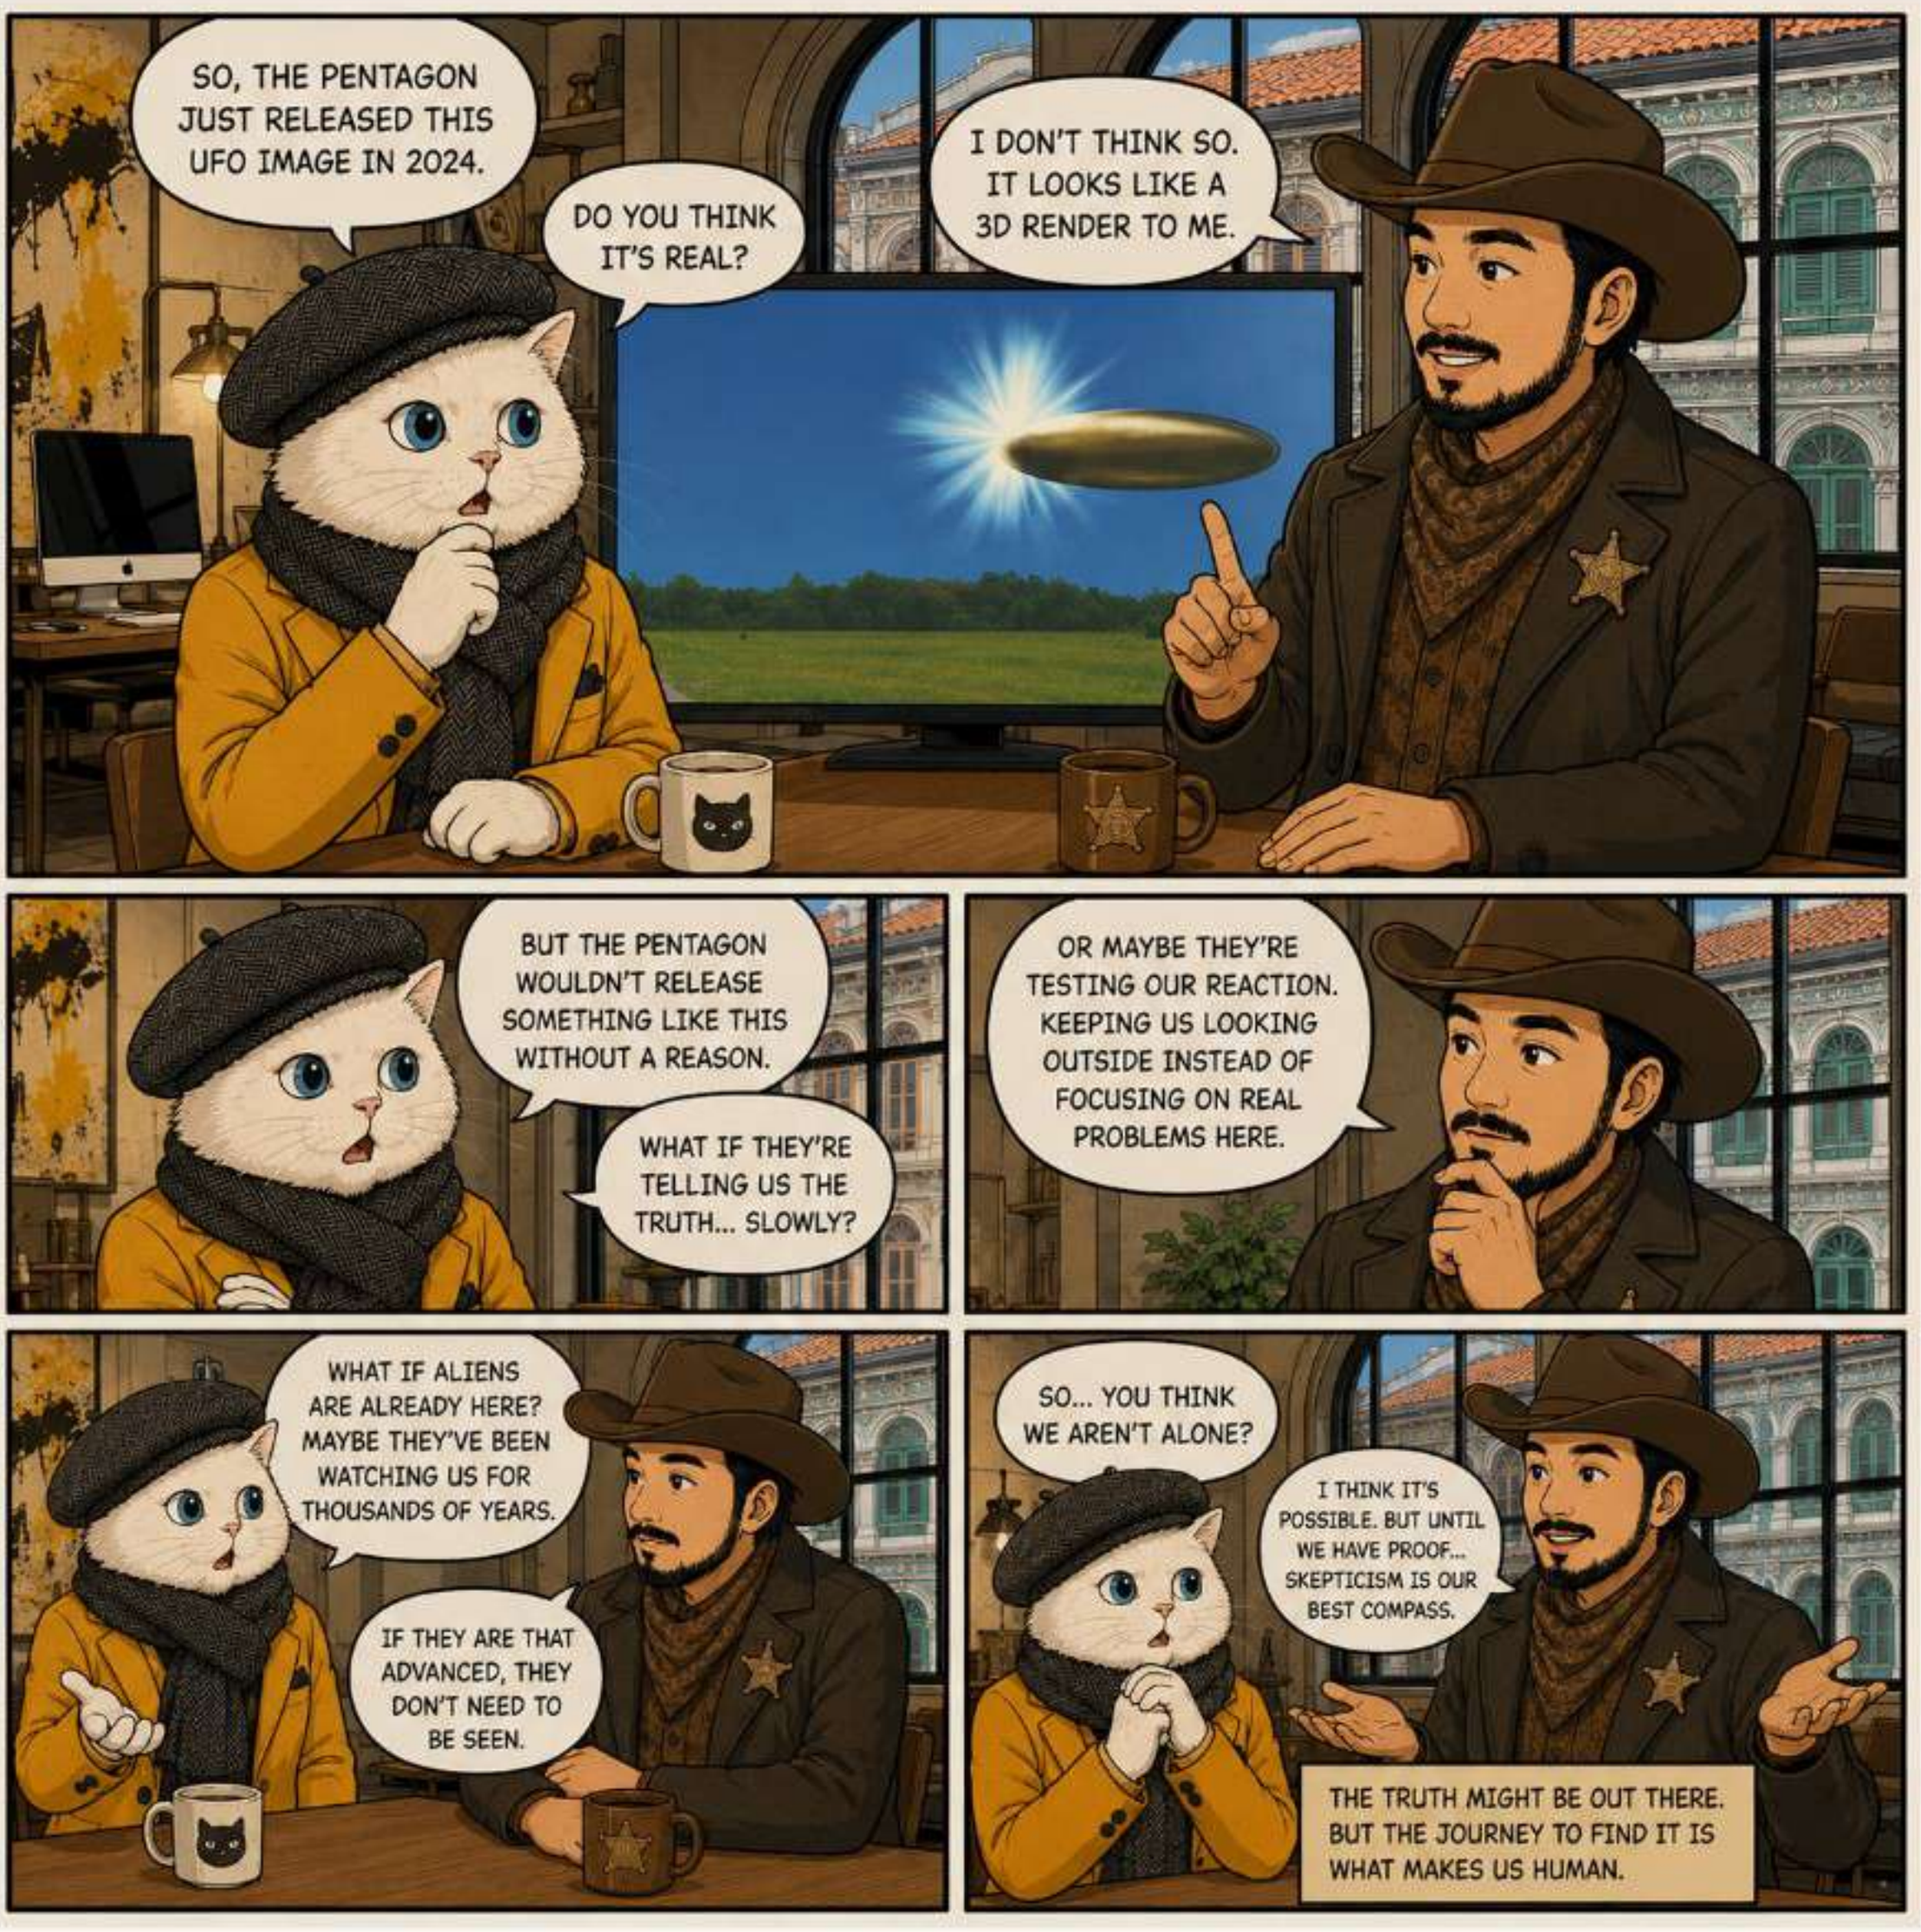

PLATE 18 · 5 PANELS

At **five panels**, you have room for a small narrative arc: a tiny short story rather than a joke. Past five, expect drift. Regenerate in batches and stitch.

keywords: "five-panel comic"

PROJECT: Unexpected Encounter SCENE: 01 LOCATION: Open Field

01

ACTION / DIALOGUE:
Establishing shot of a peaceful day.
Suddenly, a bright light appears in the sky.

CAMERA / MOVEMENT:
WIDE SHOT
STATIC

02

ACTION / DIALOGUE:
Cat and Cowboy notice the light.
CAT: "What is that?"

CAMERA / MOVEMENT:
MEDIUM TWO SHOT
SLIGHT PUSH IN

03

ACTION / DIALOGUE:
They follow it with their eyes,
realizing it's no ordinary object.

CAMERA / MOVEMENT:
CLOSE TWO SHOT
PUSH IN

04

ACTION / DIALOGUE:
The UFO moves closer,
its light intensifies.

CAMERA / MOVEMENT:
TELEPHOTO SHOT
ZOOM IN

05

ACTION / DIALOGUE:
CAT: "It's approaching us!"
COWBOY: "Looks like it."

CAMERA / MOVEMENT:
MEDIUM TWO SHOT
HANDHELD

06

ACTION / DIALOGUE:
The UFO hovers above them,
silence... only the hum of its presence.

CAMERA / MOVEMENT:
LOW ANGLE SHOT
TILT UP

07

ACTION / DIALOGUE:
The light washes over them.
They're in awe... and a little afraid.

CAMERA / MOVEMENT:
LOW ANGLE TWO SHOT
SLIGHT SHAKE

08

ACTION / DIALOGUE:
They stand together,
facing the unknown.

CAMERA / MOVEMENT:
WIDE SHOT
STATIC

09

ACTION / DIALOGUE:
CAT: "Do you think it's friendly?"
COWBOY: "Either way... our lives just changed."

CAMERA / MOVEMENT:
CLOSE TWO SHOT
SLOW PUSH IN

NOTES: Natural daylight. Maintain consistent character wardrobe and expressions. Emphasize scale and wonder.

STORYBOARD BY: ChatGPT

PLATE 19 · 9-UP GRID

A **3×3 storyboard** is the standard director's reference: nine shots in one frame, enough to communicate the rhythm of a sequence without committing to a finished film.

keywords: "3x3 storyboard"

PLATE 20 · 25-UP GRID

Push it to **5×5** and you are in contact-sheet territory: twenty-five thumbnails of moods, angles, and expressions in a single image. A great way to sketch a campaign before committing to any single frame.

keywords: "5x5 storyboard"

Comedy

Horror film

Sci-fi film

Mecha anime

PLATE 21 · GENRE CONVENTIONS

A **movie poster** keyword combined with a genre word pulls in every convention of that genre: typography, palette, framing, billing block. You never have to spell any of it out.

keywords: movie poster · noir · sci-fi · romance · horror · western · animation · indie · blockbuster

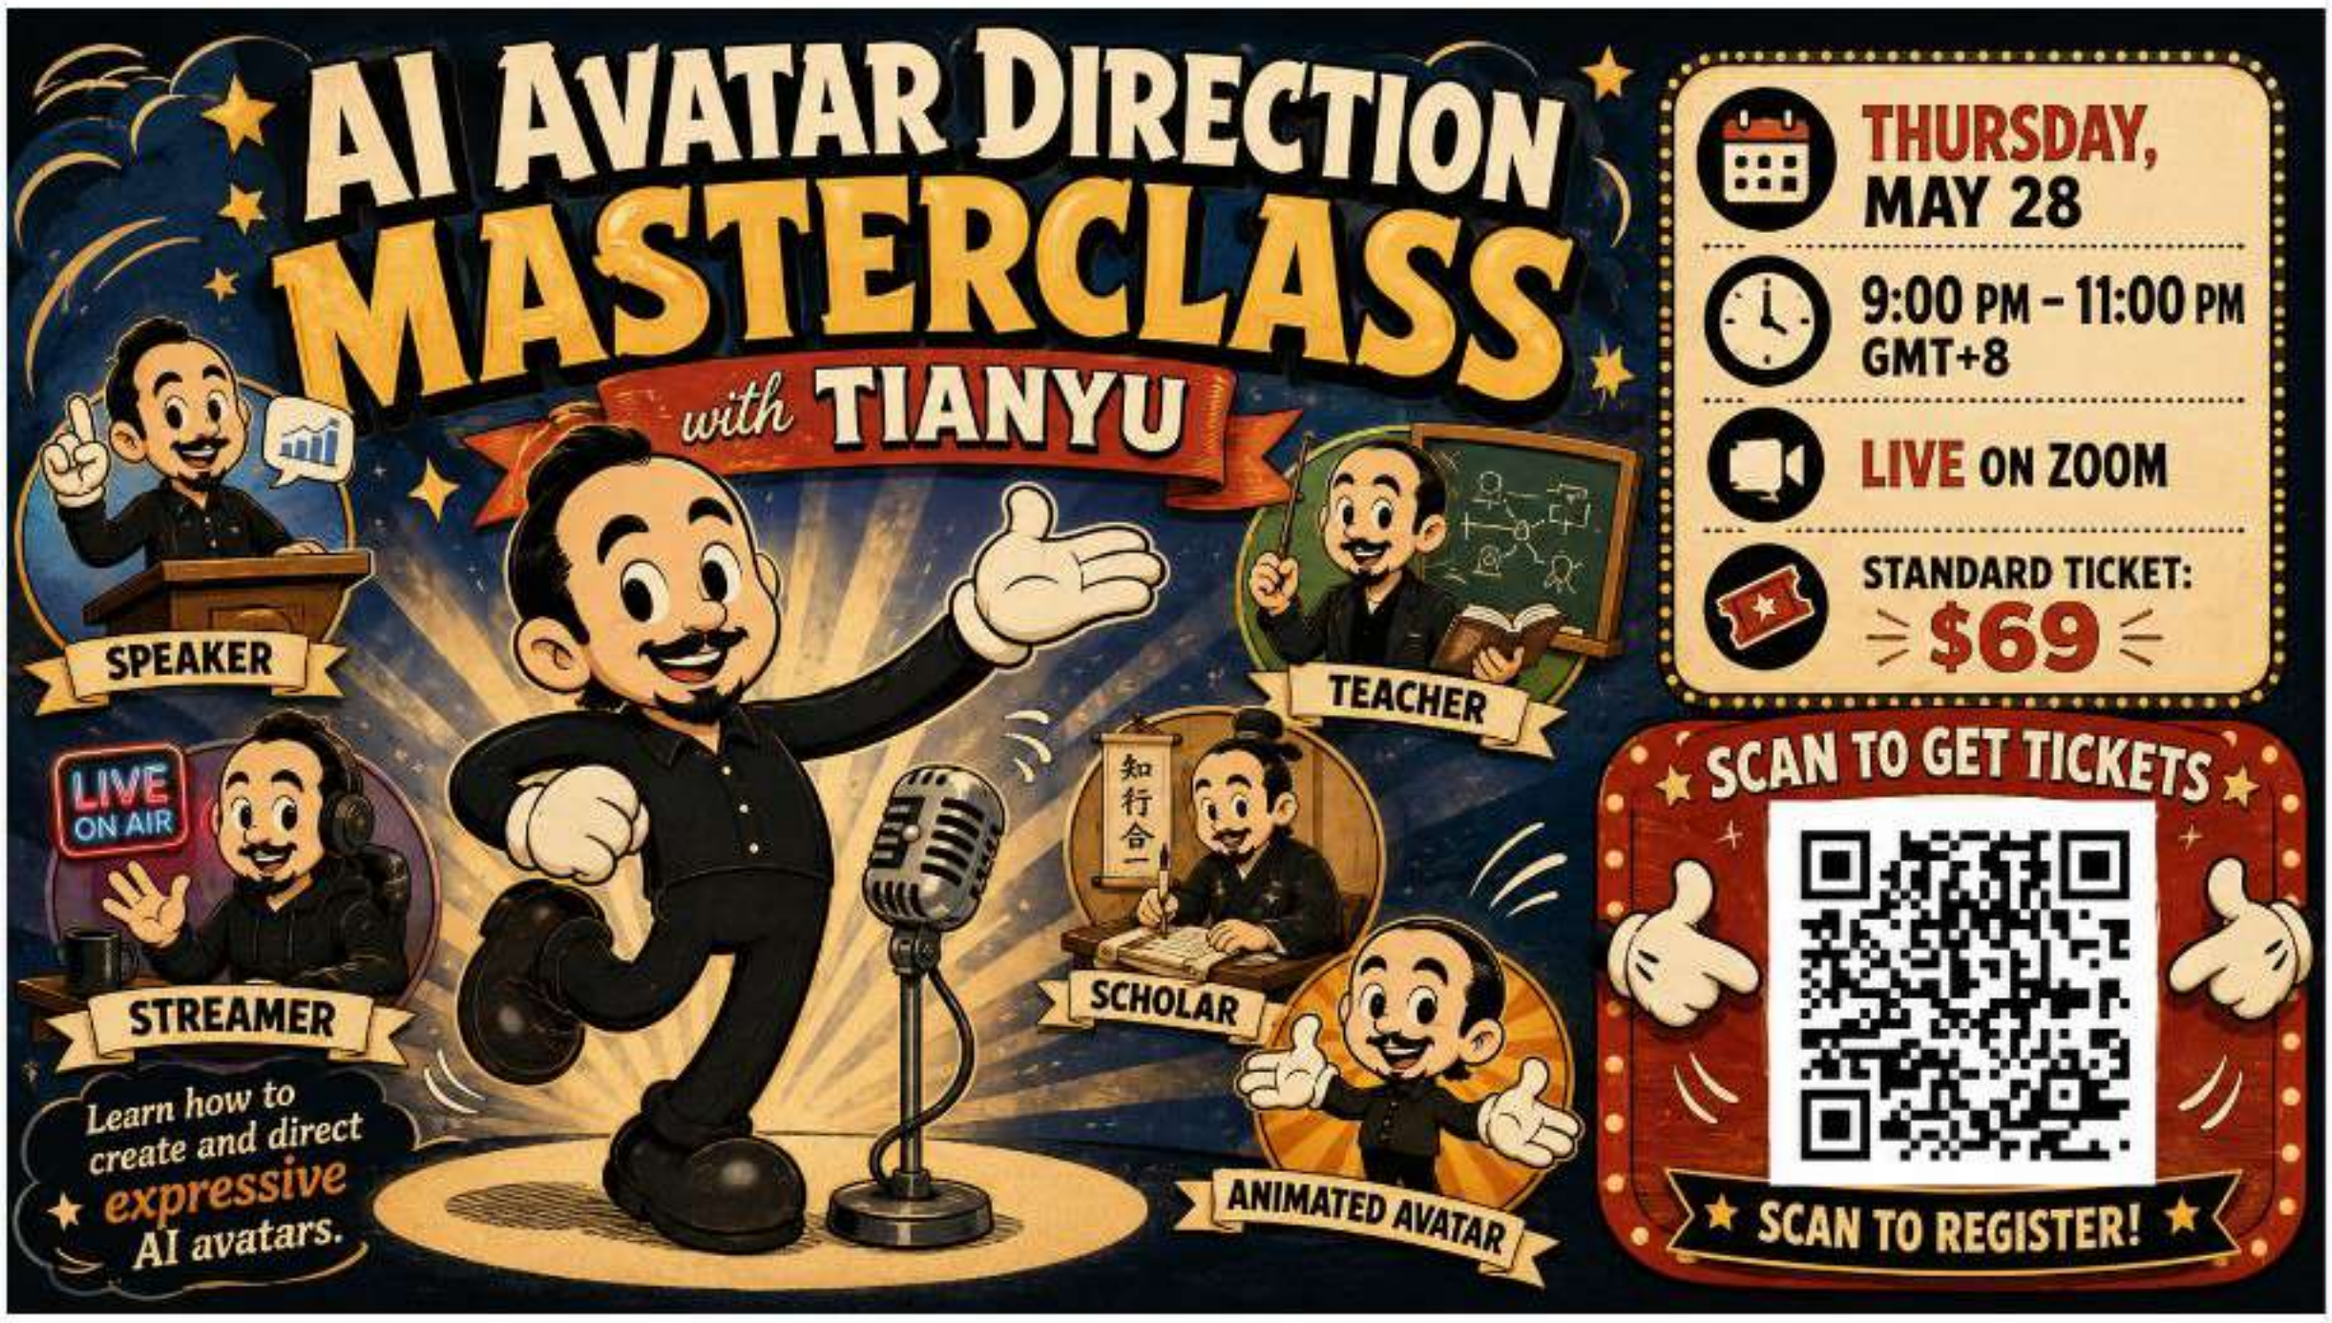

PLATE 22 · SINGLE-KEYWORD SWAP

Rubberhose is the early-Disney / Fleischer animation register: bendy limbs, pie-cut eyes, four-finger gloves, off-white film grain. One word completely repaints the character.

`keywords: "rubberhose style"`

PLATE 23 · DISCIPLINE KEYWORD

The **minimalistic poster** is a discipline keyword. It tells the model to subtract, not add. Expect generous negative space, a single accent colour, one piece of large type.

`keywords: "minimalistic poster"`

PLATE 24 · MODULAR LAYOUT

Bento grid is the modular tile layout currently dominating tech keynote slides and Japanese product sites. Use it when you have several facets to show at once.

keywords: "bento grid poster"

PLATE 25 · ONE COLOUR, ONE FACE

Combine **minimalist**, **monochrome** and **text** and the image collapses to one accent colour, one face of type, and the smallest illustration carrying the rest of the meaning.

keywords: "minimalist monochrome text"

PLATE 26 · TYPE AS COMPOSITION

Typography-centric tells the model that the letters themselves are the composition. The image plays inside the counters, around the descenders, behind the strokes.

keywords: "typography-centric design"

PART 04 · 07 KEYWORDS

Mock up.

GPT Image 2 is unusually competent at interface. It can render plausible app screens and full website hero comps from a single prompt. The variable here is the visual style language: name a movement and the layout follows.

neumorphism
glassmorphism
claymorphism
cyberpunk neon
art deco luxe
skeuomorphism
brutalist
retro pixel
website hero

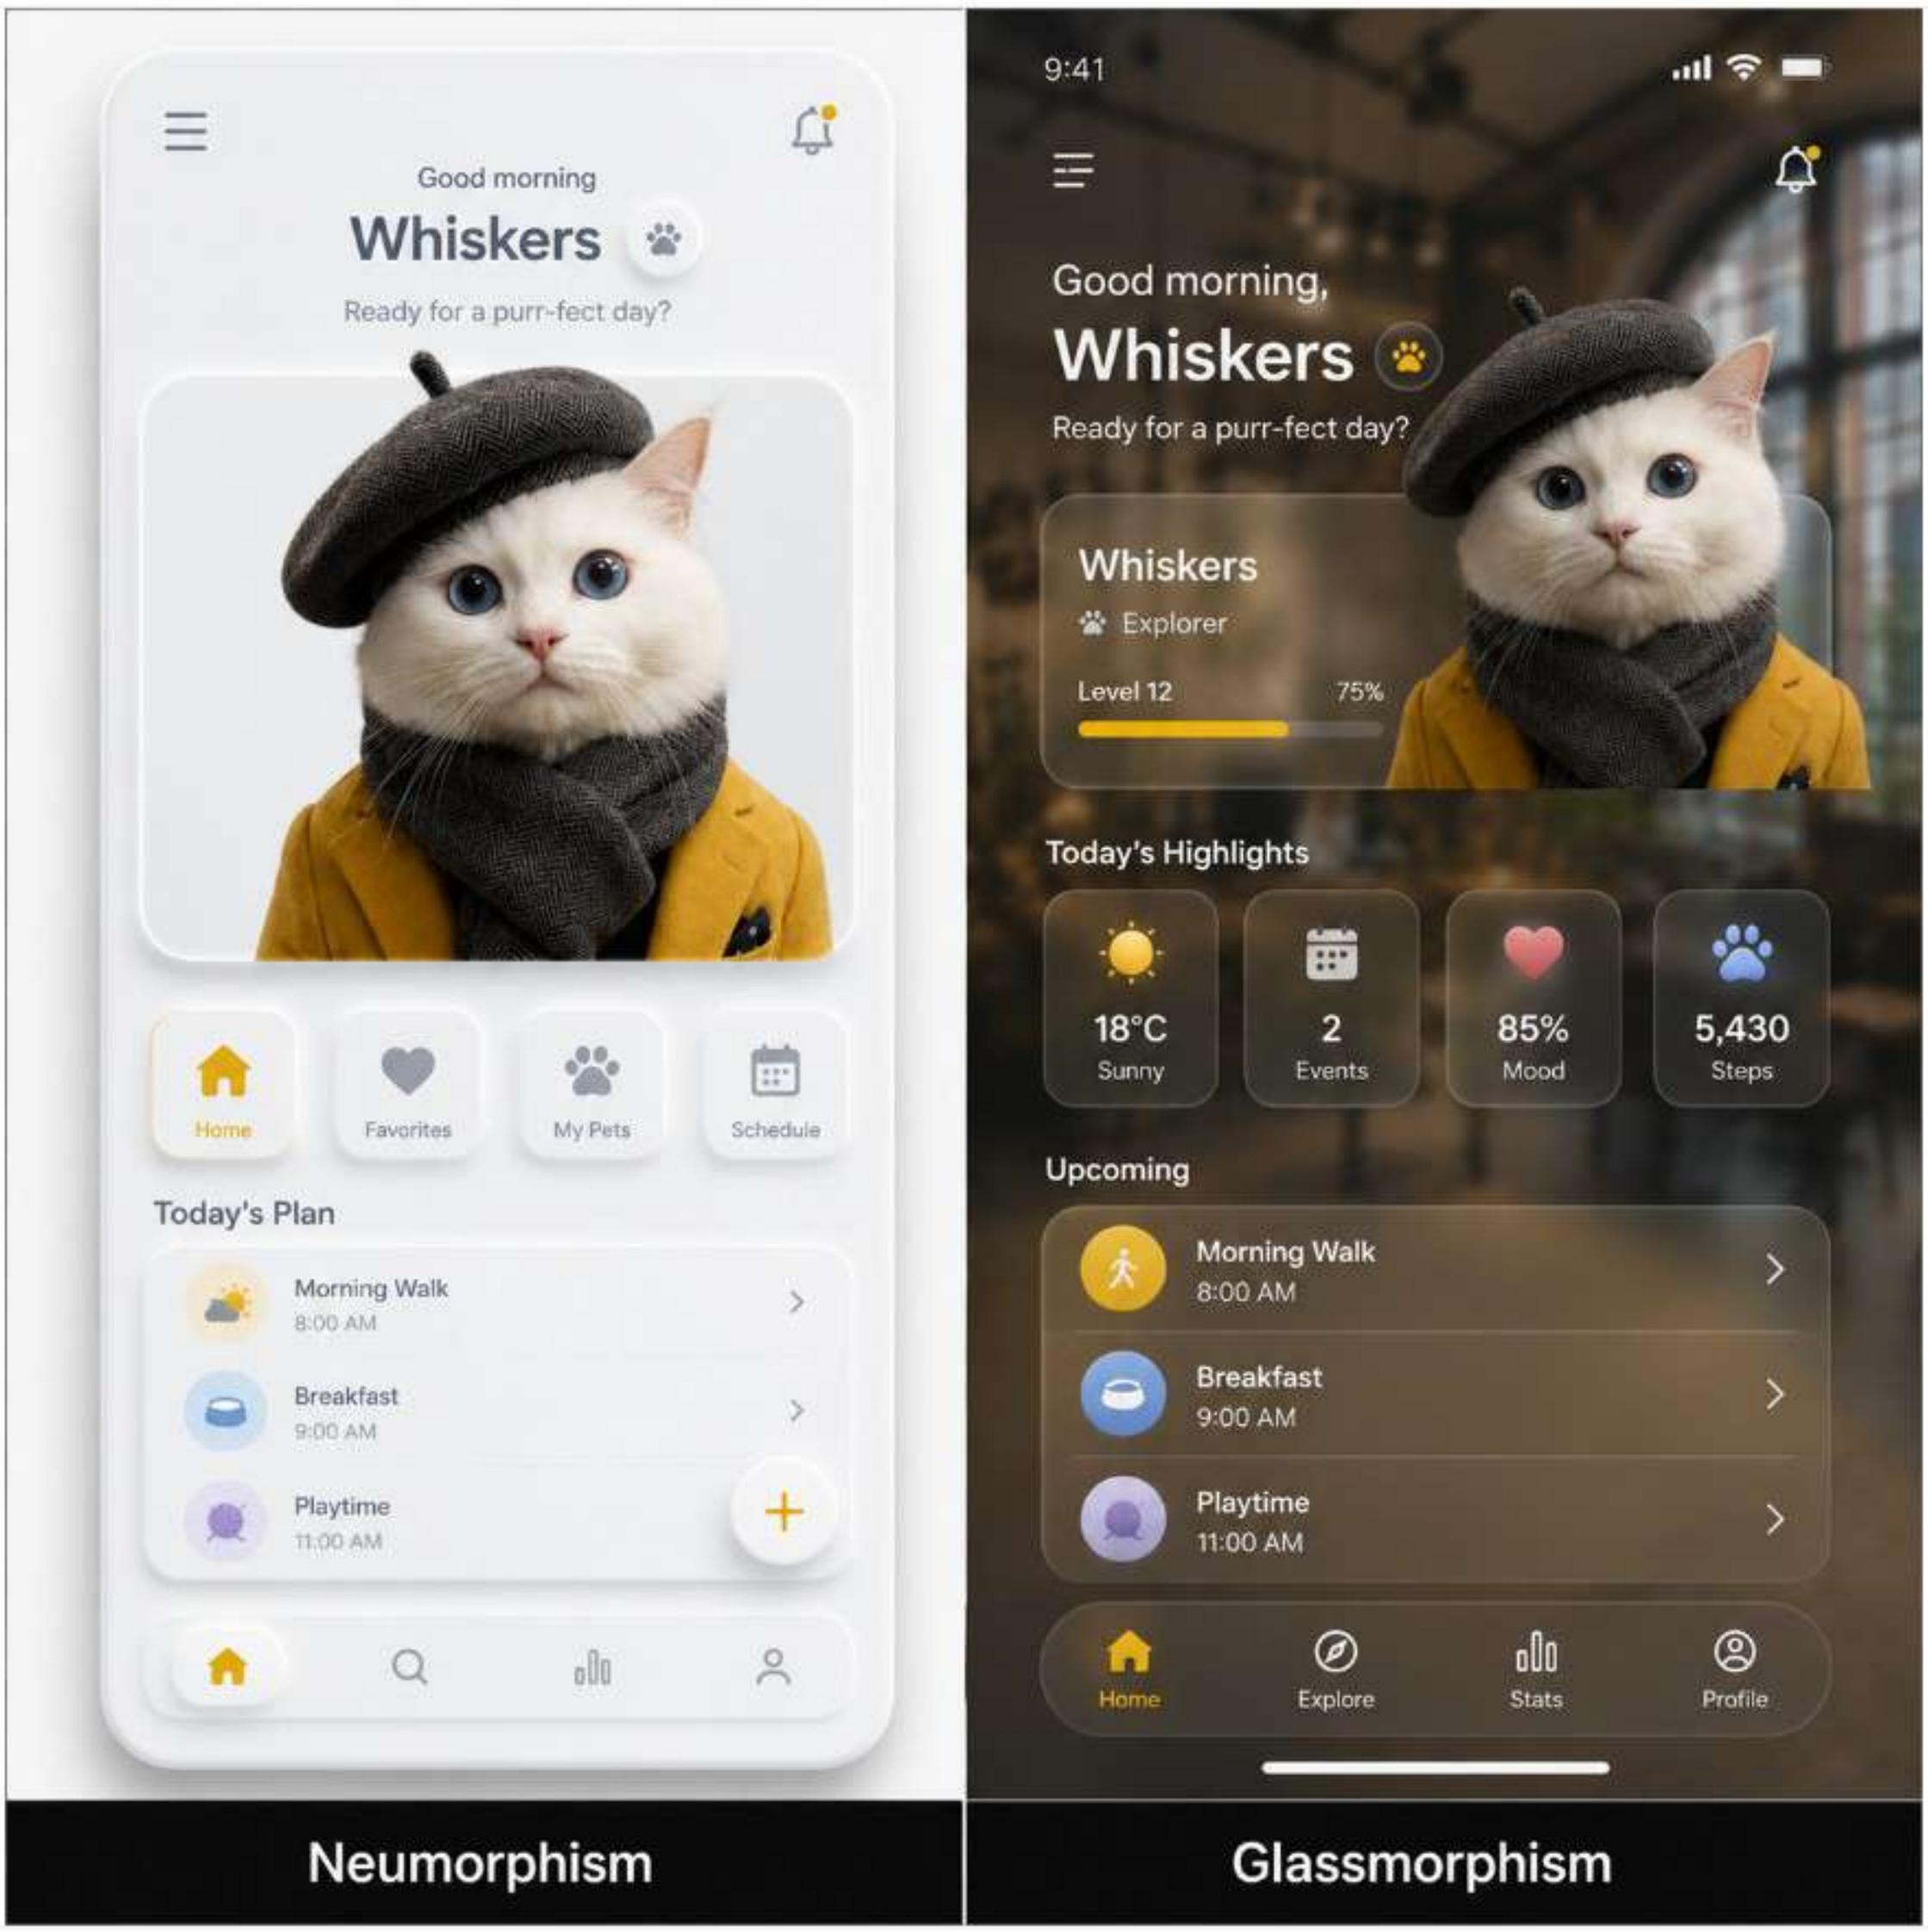

PLATE 27 · 2-UP

Neumorphism is soft, extruded UI: controls pressed into the surface with paired shadows. **Glassmorphism** stacks frosted translucent layers over colourful backgrounds.

keywords: neumorphism · soft UI · inset/outset shadows · glassmorphism · frosted glass · translucent layers

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

PLATE 28 · 2-UP

Claymorphism reads as friendly, three-dimensional plasticine. **Cyberpunk neon** is its near-opposite: dark canvas, magenta and cyan glow, slab type, sharp geometry.

keywords: claymorphism · 3D plasticine · rounded shapes · cyberpunk neon · dark UI · magenta/cyan glow

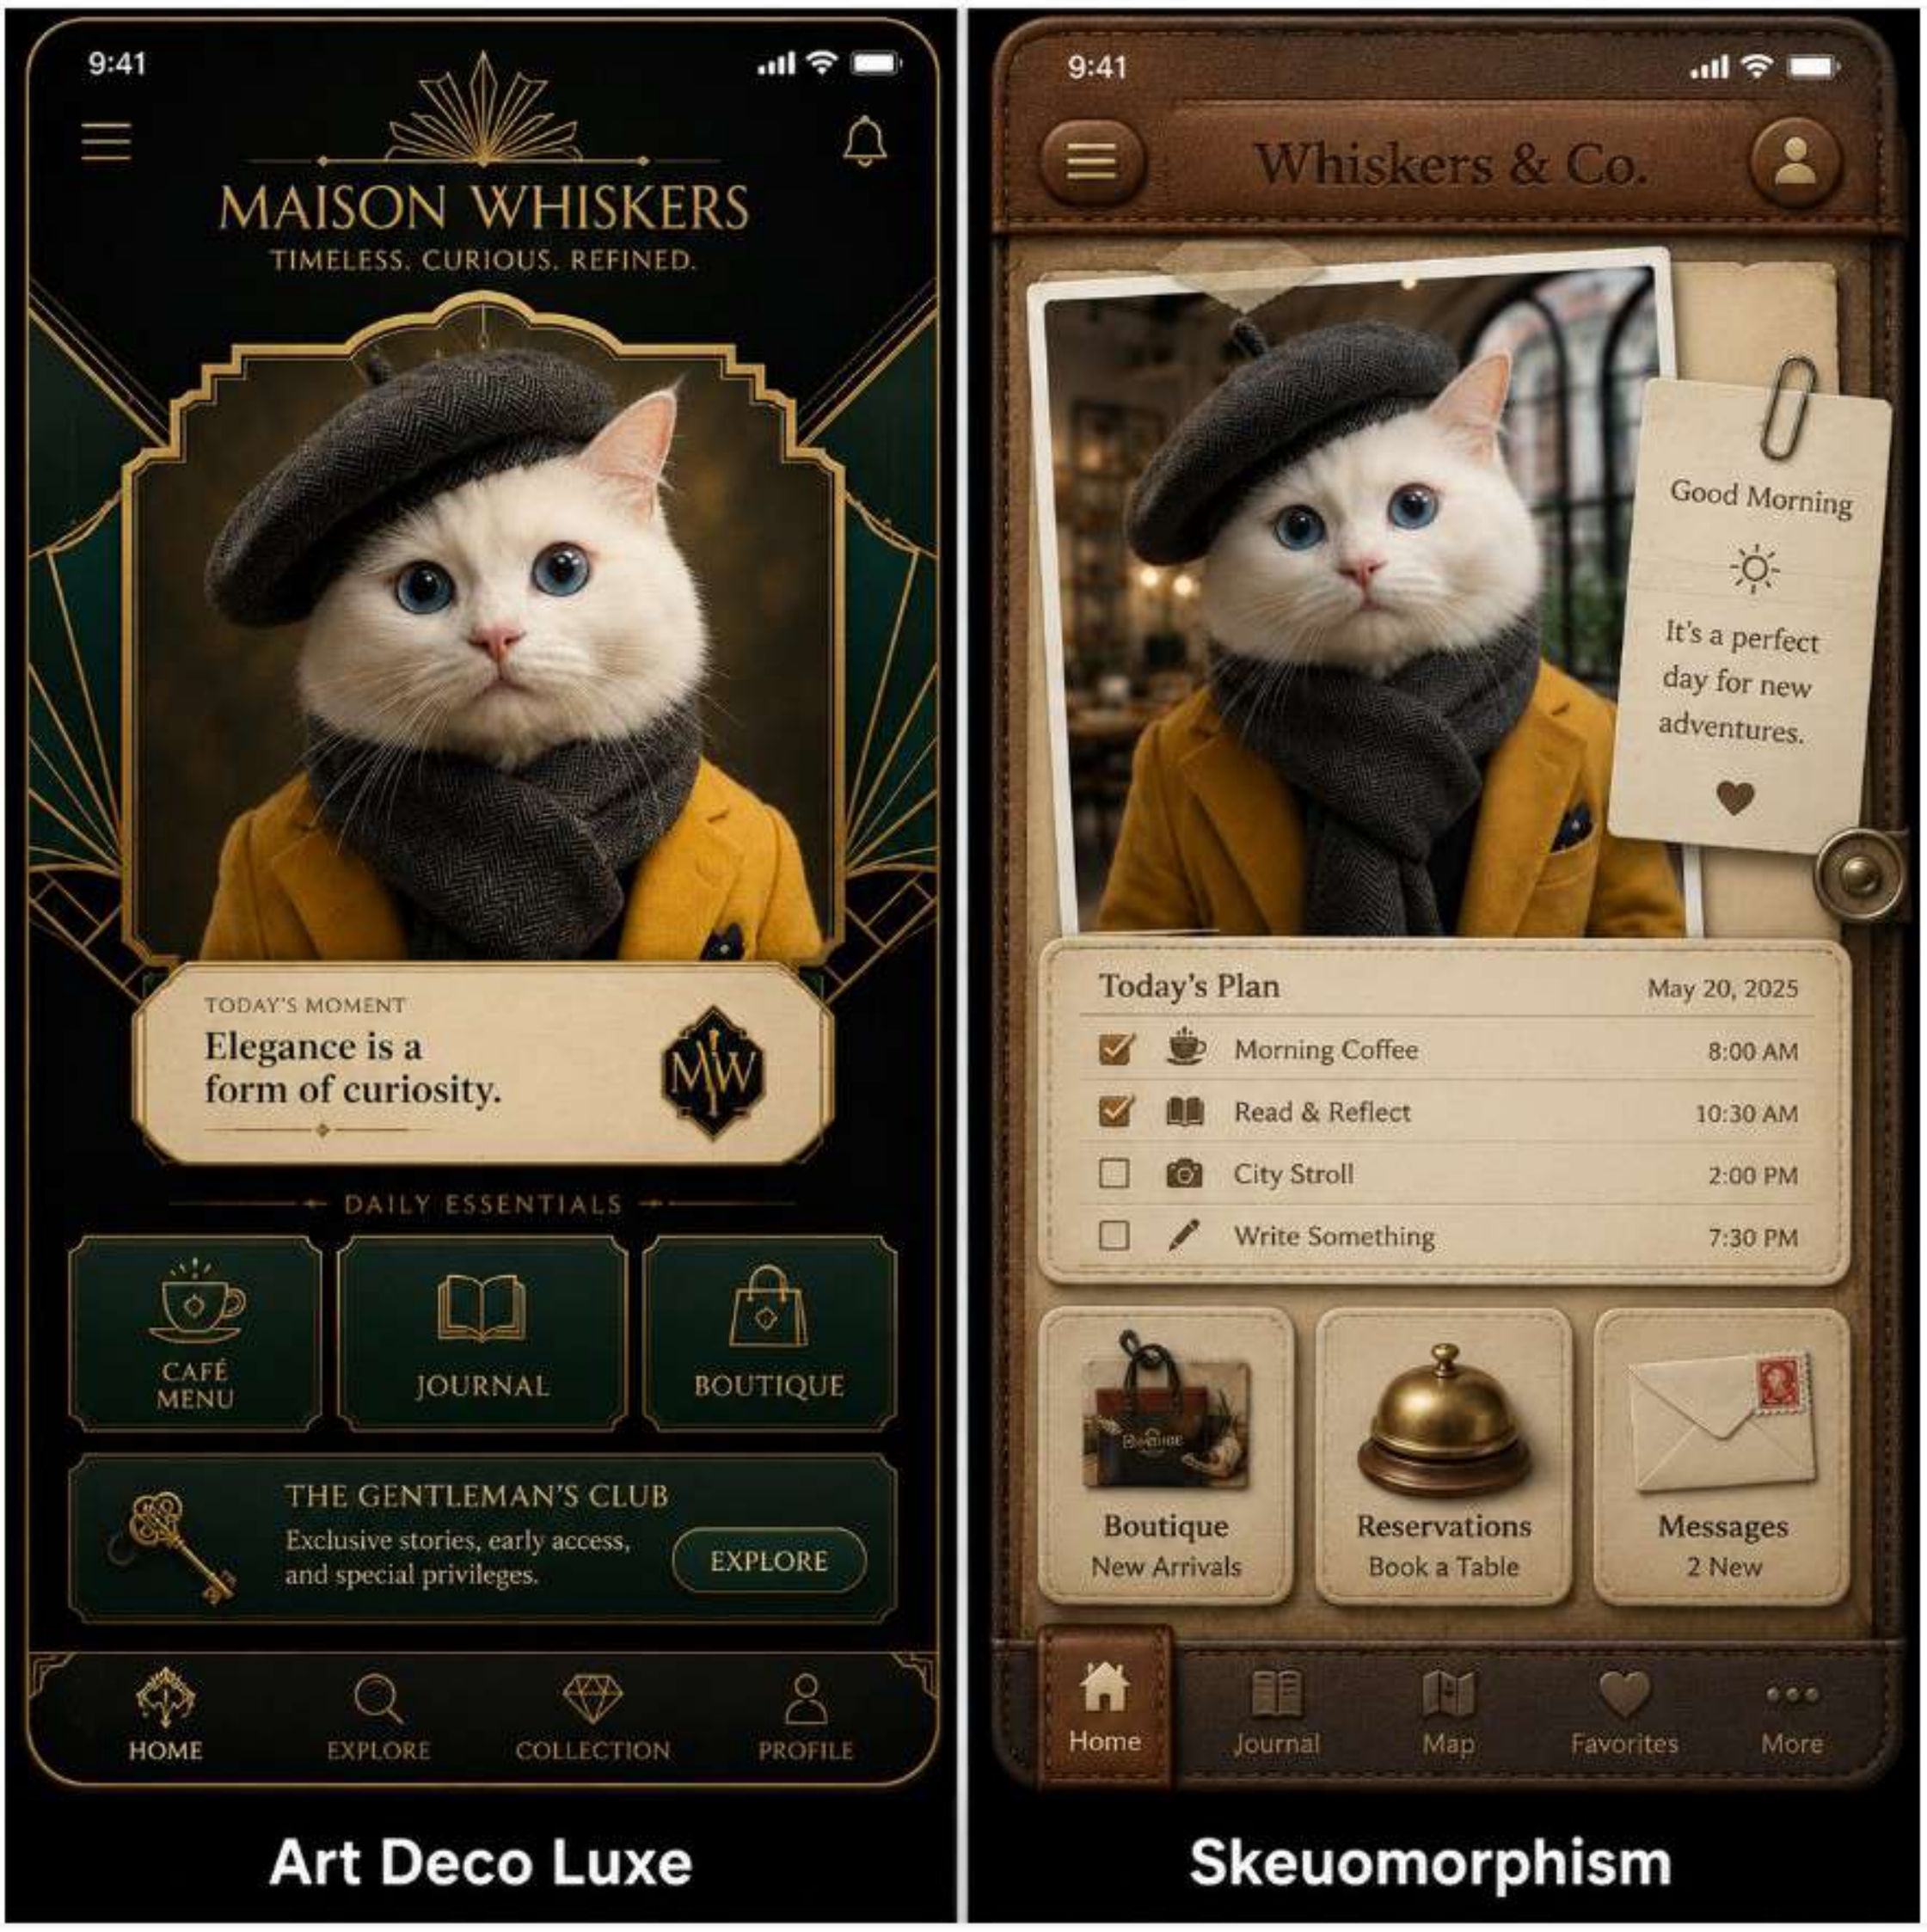

PLATE 29 · 2-UP

Art Deco luxe brings gold leaf, symmetry, and 1920s ornament. **Skeuomorphism** is early-iOS: leather stitching, wood grain, glossy buttons, real-world metaphors lifted into pixels.

keywords: art deco luxe · gold foil · symmetry · skeuomorphism · real-world textures · leather/wood/felt

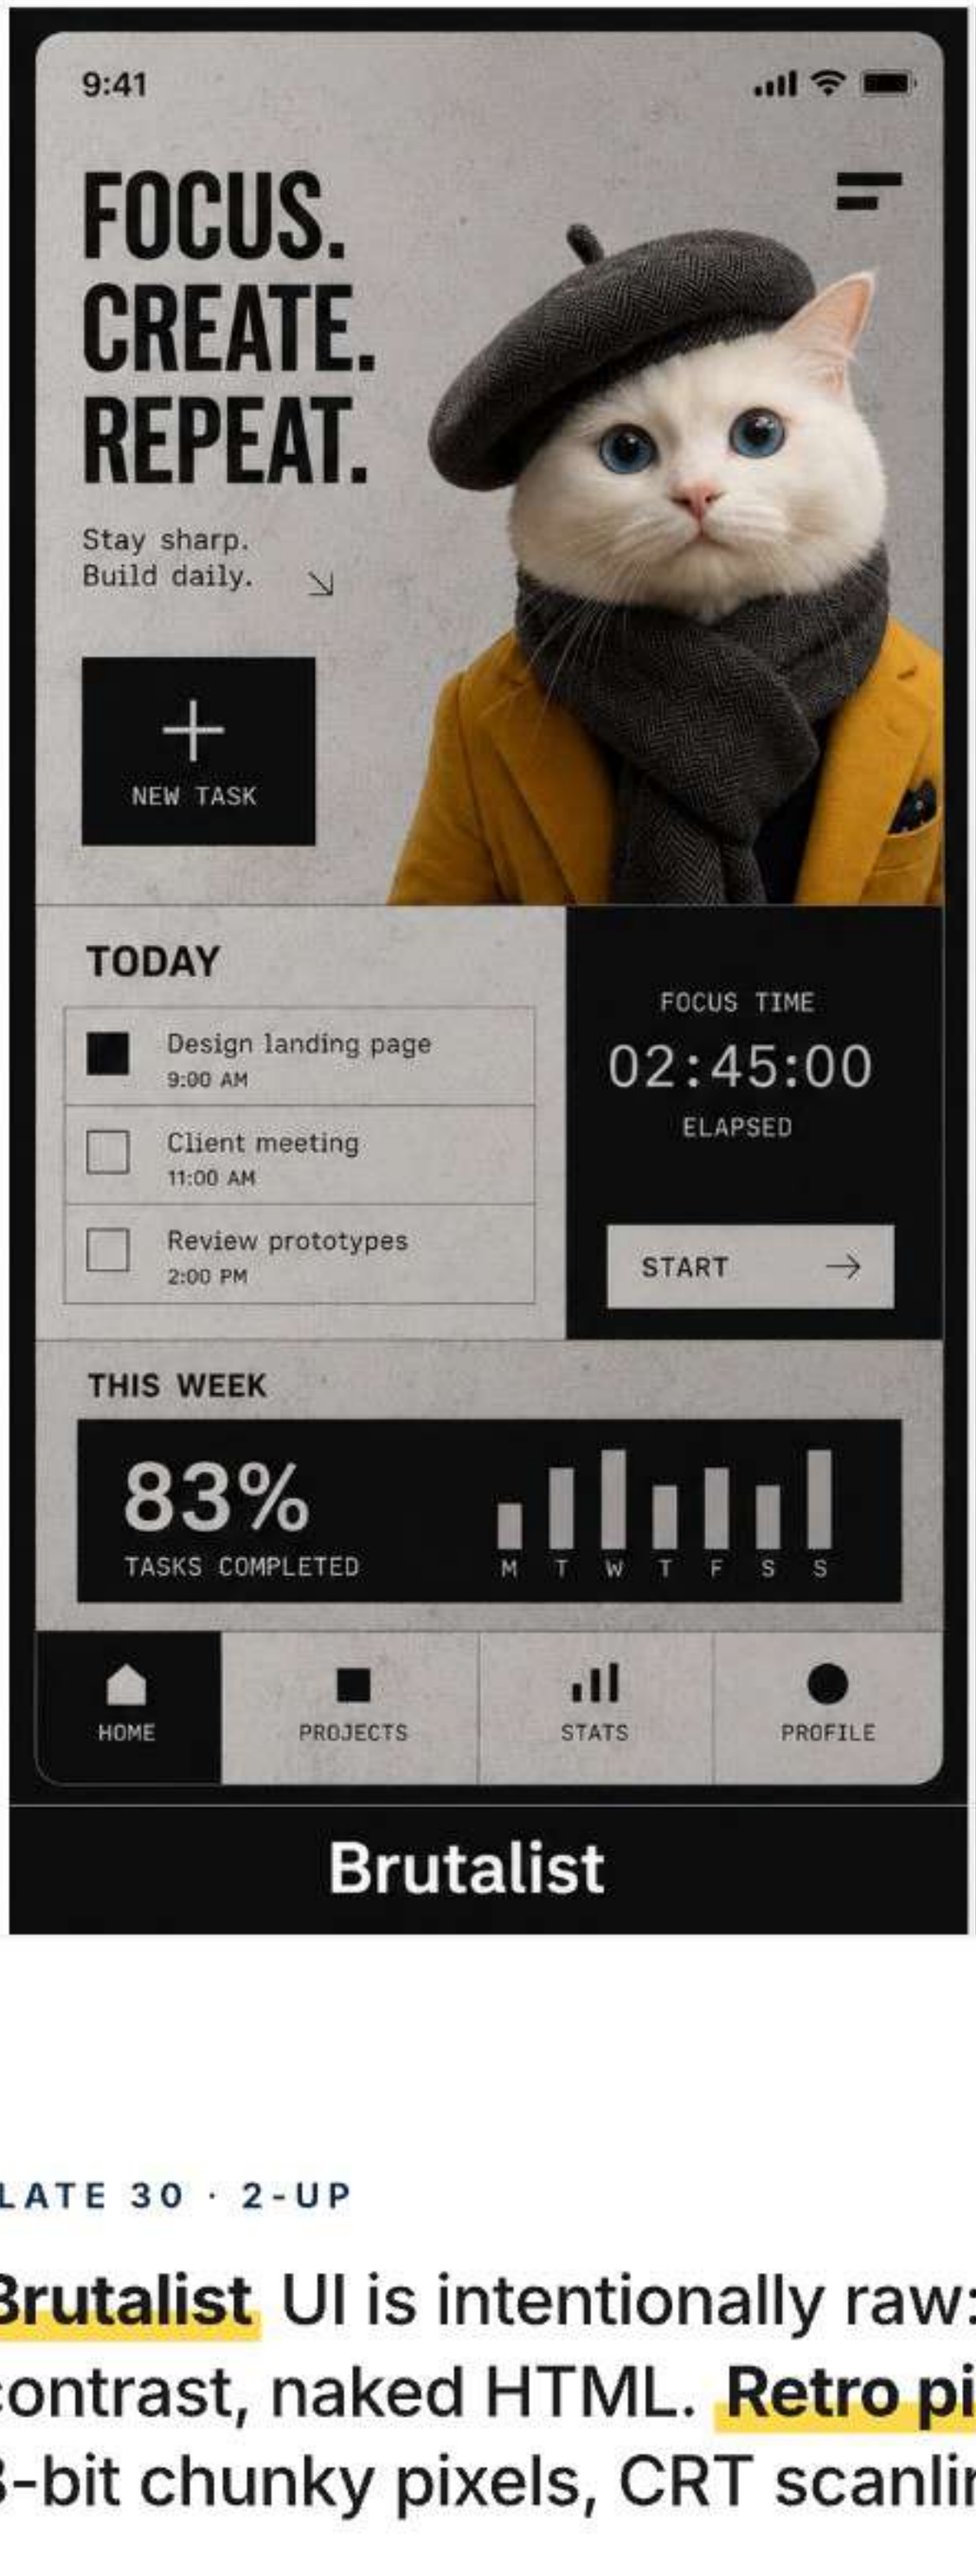

PLATE 30 · 2-UP

Brutalist UI is intentionally raw: monospaced type, harsh contrast, naked HTML. **Retro pixel** is the other direction: 8-bit chunky pixels, CRT scanlines, limited palette.

keywords: brutalist · raw HTML · monospace · harsh contrast · retro pixel · 8-bit · CRT scanlines

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

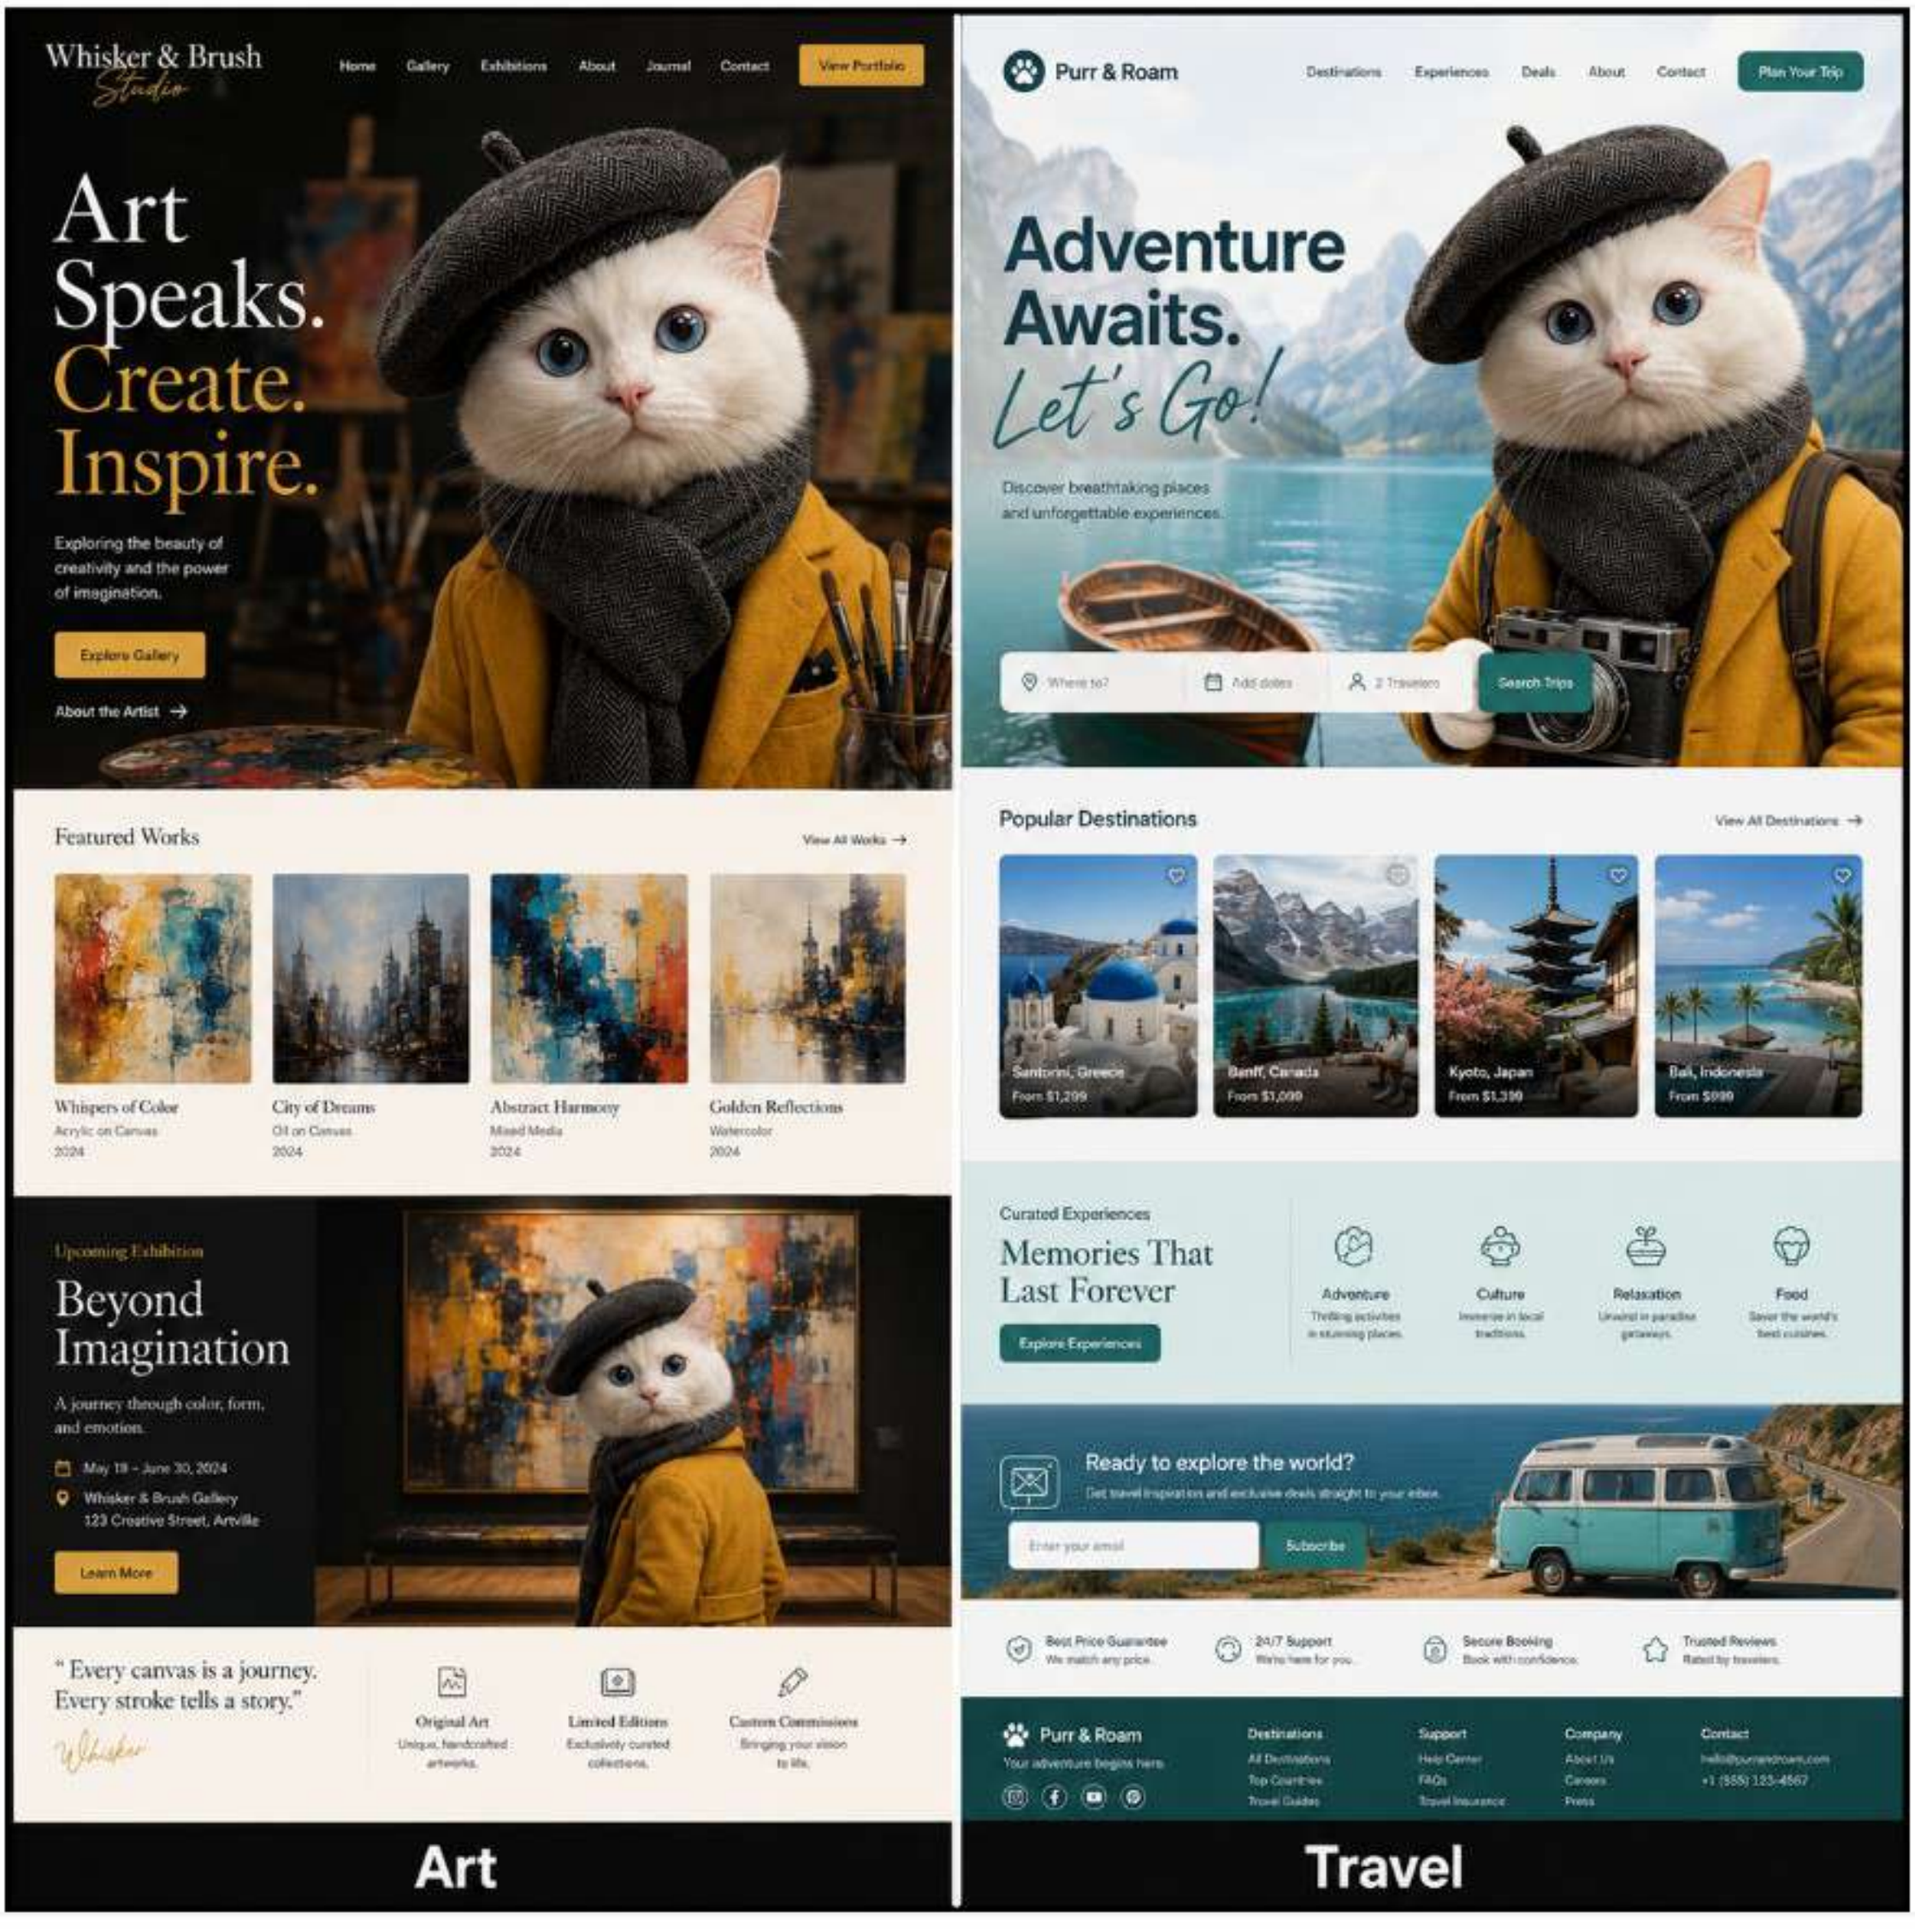

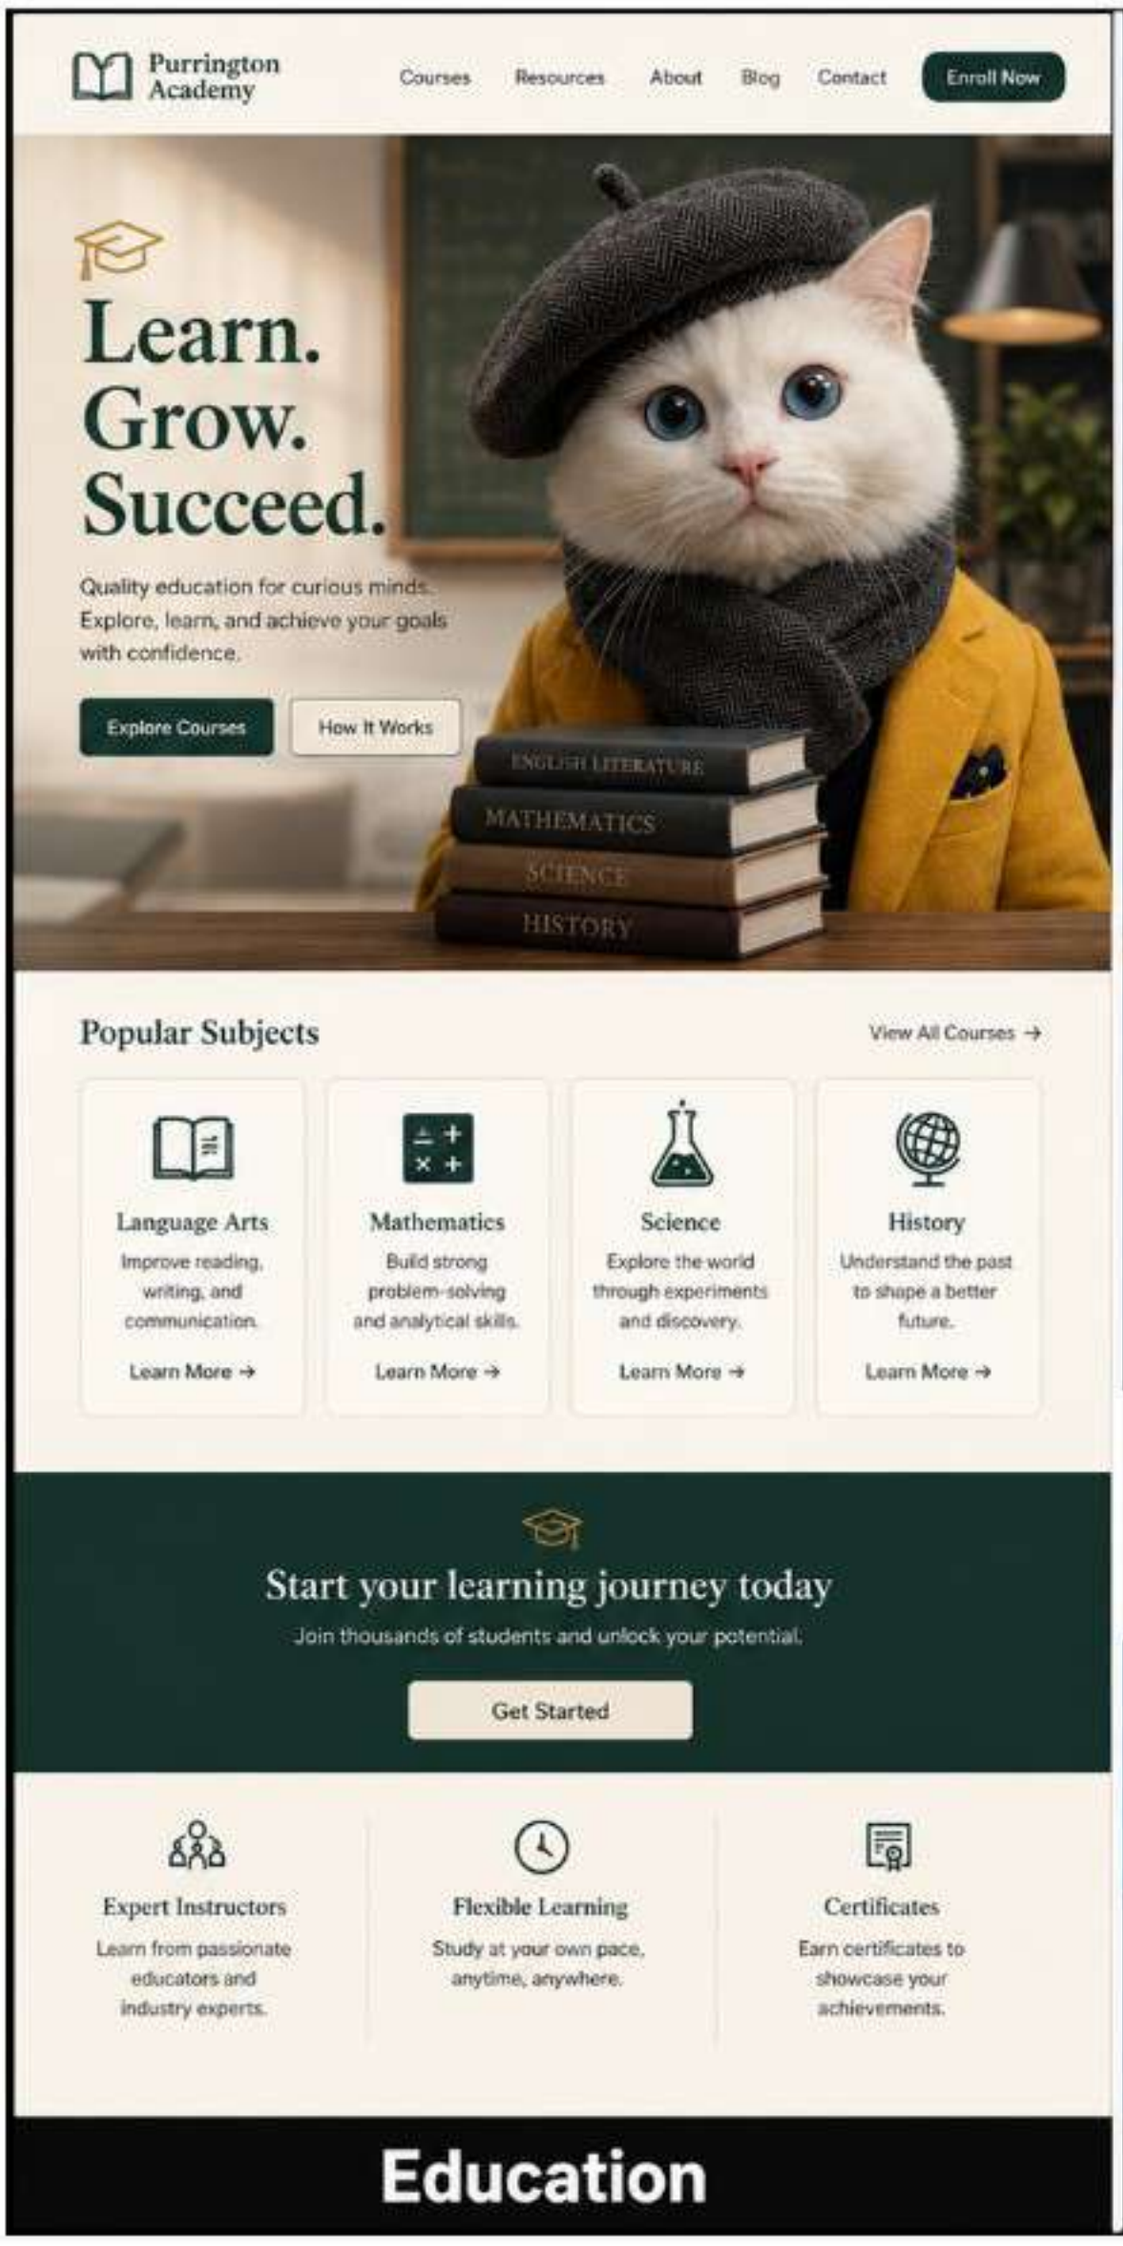

PLATE 31 · 2-UP

Name the industry alongside **website** and conventions follow. **Art gallery** sites lean serif, generous, image-first. **Travel** sites lean full-bleed photography and location chips.

keywords: website hero · art gallery · serif headline · travel · full-bleed photography · location nav

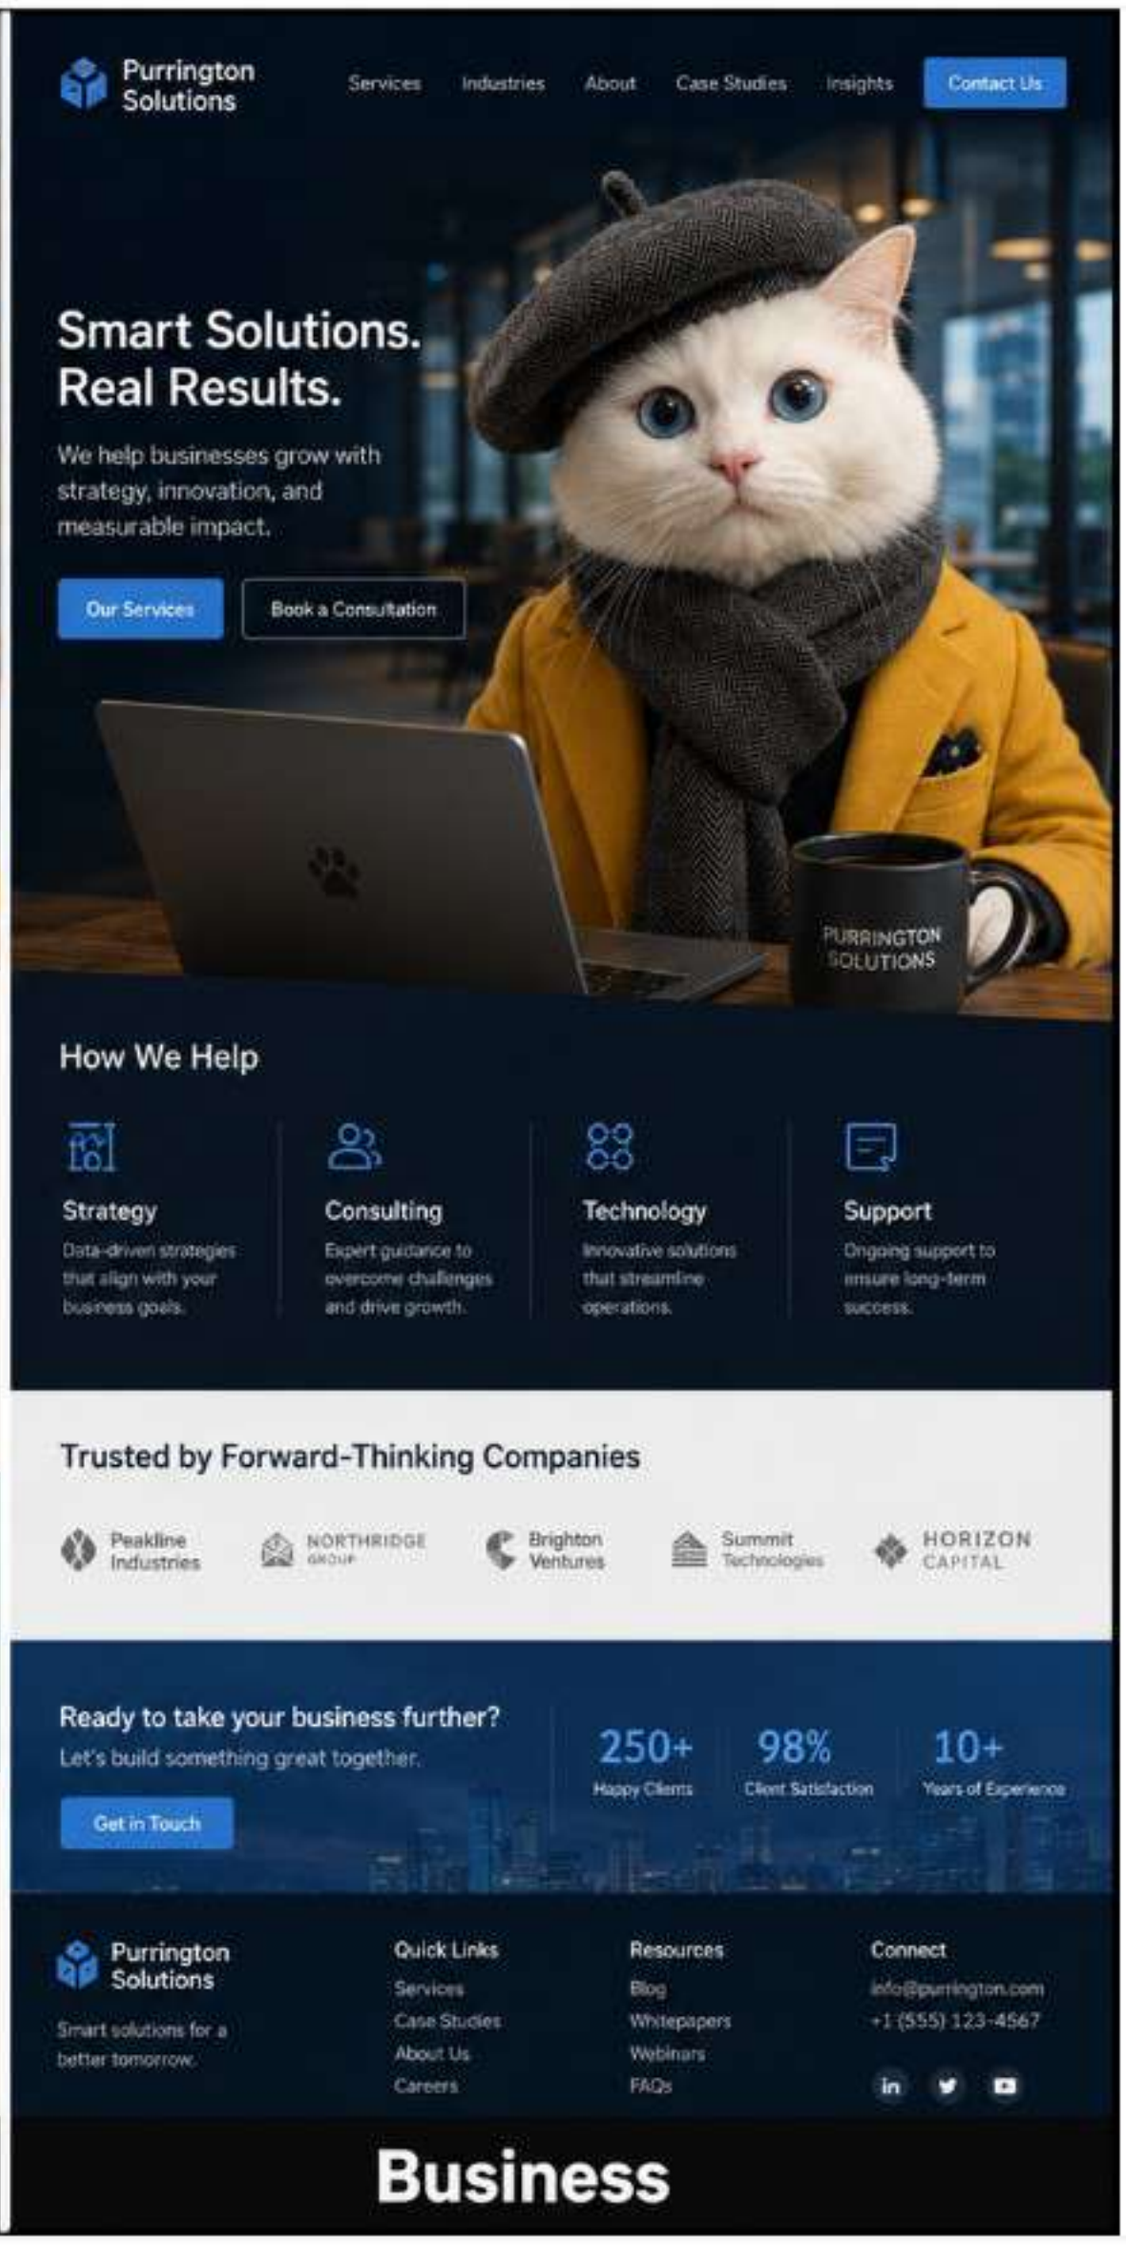

PLATE 32 · 2-UP

Education sites pull in course cards, progress indicators, big enroll CTAs. **Business** sites pull in stats heros, case-study grids, the logo wall. Calm, trust-signalling palettes.

keywords: education · course cards · enroll CTA · business · stats hero · case-study grid

PLATE 33 · 2-UP

Fashion sites pull in editorial typography, lookbook grids, oversized photography. **Technology** sites pull in product heros, spec callouts, dense feature anatomies.

keywords: fashion · editorial typography · lookbook · technology · product hero · spec callouts

PART 05 · 05 KEYWORDS

Info graphic.

The most under-rated thing GPT Image 2 does is information design. Hand it a document, notes, a cheat sheet, a list, and it can lay the whole thing out as a single image, in any visual register you like.

Claude Code Reference

BEGINNER-FRIENDLY macOS TERMINAL CHEAT SHEET

INDEX 03

EDITION 2024-05

> *Great command line tools make you feel like you have superpowers.*
>
> — CLAUDE

1 STARTER PACK

Open Terminal	Cmd+Space → Terminal → Return
Start Claude	`claude`
Show commands	`/`
Help	`/help`
Stop	`Ctrl+C`
New chat	`/clear`
Quit	`/exit` or `Ctrl+D`
Resume	`claude -c`

2 SLASH COMMANDS

CORE	MODELS & CONTEXT	PROJECT	ADVANCED
/help	/model [model]	/init	/plan [description]
/clear	/effort [...]	/add-dir <path>	/goal [condition|clear]
/exit	/fast [on|off]	/permissions	/agents
/resume [session]	/compact [instructions]	/sandbox	/background [prompt]
/copy [N]	/context	/diff	/batch <instruction>
/export [filename]	/memory	/config	/review [PR]
			/mcp

3 KEYBOARD SHORTCUTS

KEY	MEANING
`Ctrl+C`	Stop current task (safe)
`Ctrl+D`	Exit Claude
`Ctrl+L`	Clear screen
`Ctrl+R`	Search history (reverse)
`Ctrl+O`	Open history
`Ctrl+T`	Transpose characters
`Ctrl+G` or `Ctrl+X` then `Ctrl+E`	Edit last command
`Esc`	Cancel / clear current input
`Shift+Tab`	Reverse completion
`Ctrl+A`	Move to beginning of line
`Ctrl+E`	Move to end of line
`Ctrl+K`	Cut to end of line
`Ctrl+U`	Cut to beginning of line
`Ctrl+W`	Delete previous word
`Alt+B`	Move back one word
`Alt+F`	Move forward one word
`Opt+Enter`	New line (multiline input)

4 COMMAND LINE

`claude`	Start interactive mode
`claude "question"`	Ask a question and exit
`claude -c`	Continue last session
`claude -r "session"`	Resume specific session
`claude -p "question"`	Print answer and exit
`claude --version`	Show version
`claude update`	Update Claude Code
`claude auth login`	Sign in
`claude auth status`	Show auth status
`claude mcp`	Manage MCP servers
`claude agents`	List available agents

5 QUICK PREFIXES

- **/** Claude commands (built-in features)
- **!** Shell commands (run on your Mac)
- **@** Files & paths (include context)

6 BEGINNER GOTCHAS

- **Ctrl+C is safe.** It stops Claude, not your system.
- **clear ≠ /clear.** clear is a shell command.
- **@filename is better than pasting.** Cleaner, faster, more accurate.
- **! runs shell commands.** Use with care and intention.
- **Use /clear between topics.** Keeps context focused.
- **Enable "Use Option as Meta Key".** Better shortcuts, happier you.
- **Use /help and claude --help.** Your best friends.

CODE SMARTER. SHIP FURTHER.

PLATE 34 · THE DEFAULT REGISTER

Swiss / editorial minimalist is the most legible register. Strict grid, two type sizes, generous whitespace, the occasional oversized numeral as a visual anchor. Reach for it when in doubt.

keywords: Swiss design · editorial minimalist · grid system · helvetica · black on white · large numerals

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

PLATE 35 · OPERATIONAL REGISTER

Modern tech dashboard pulls in product-UI conventions: card layouts, KPI tiles, sparklines, status chips. Useful when the information should feel operational rather than editorial.

keywords: modern tech dashboard · card-based · KPI tiles · sparklines · sans-serif

PLATE 36 · SAAS-LANDING REGISTER

Premium glassmorphism for infographics: gradient-mesh backdrops, frosted translucent cards, subtle highlights. The visual register of high-end SaaS landing pages, applied to a cheat sheet.

keywords: premium glassmorphism · frosted cards · gradient mesh · light reflections

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

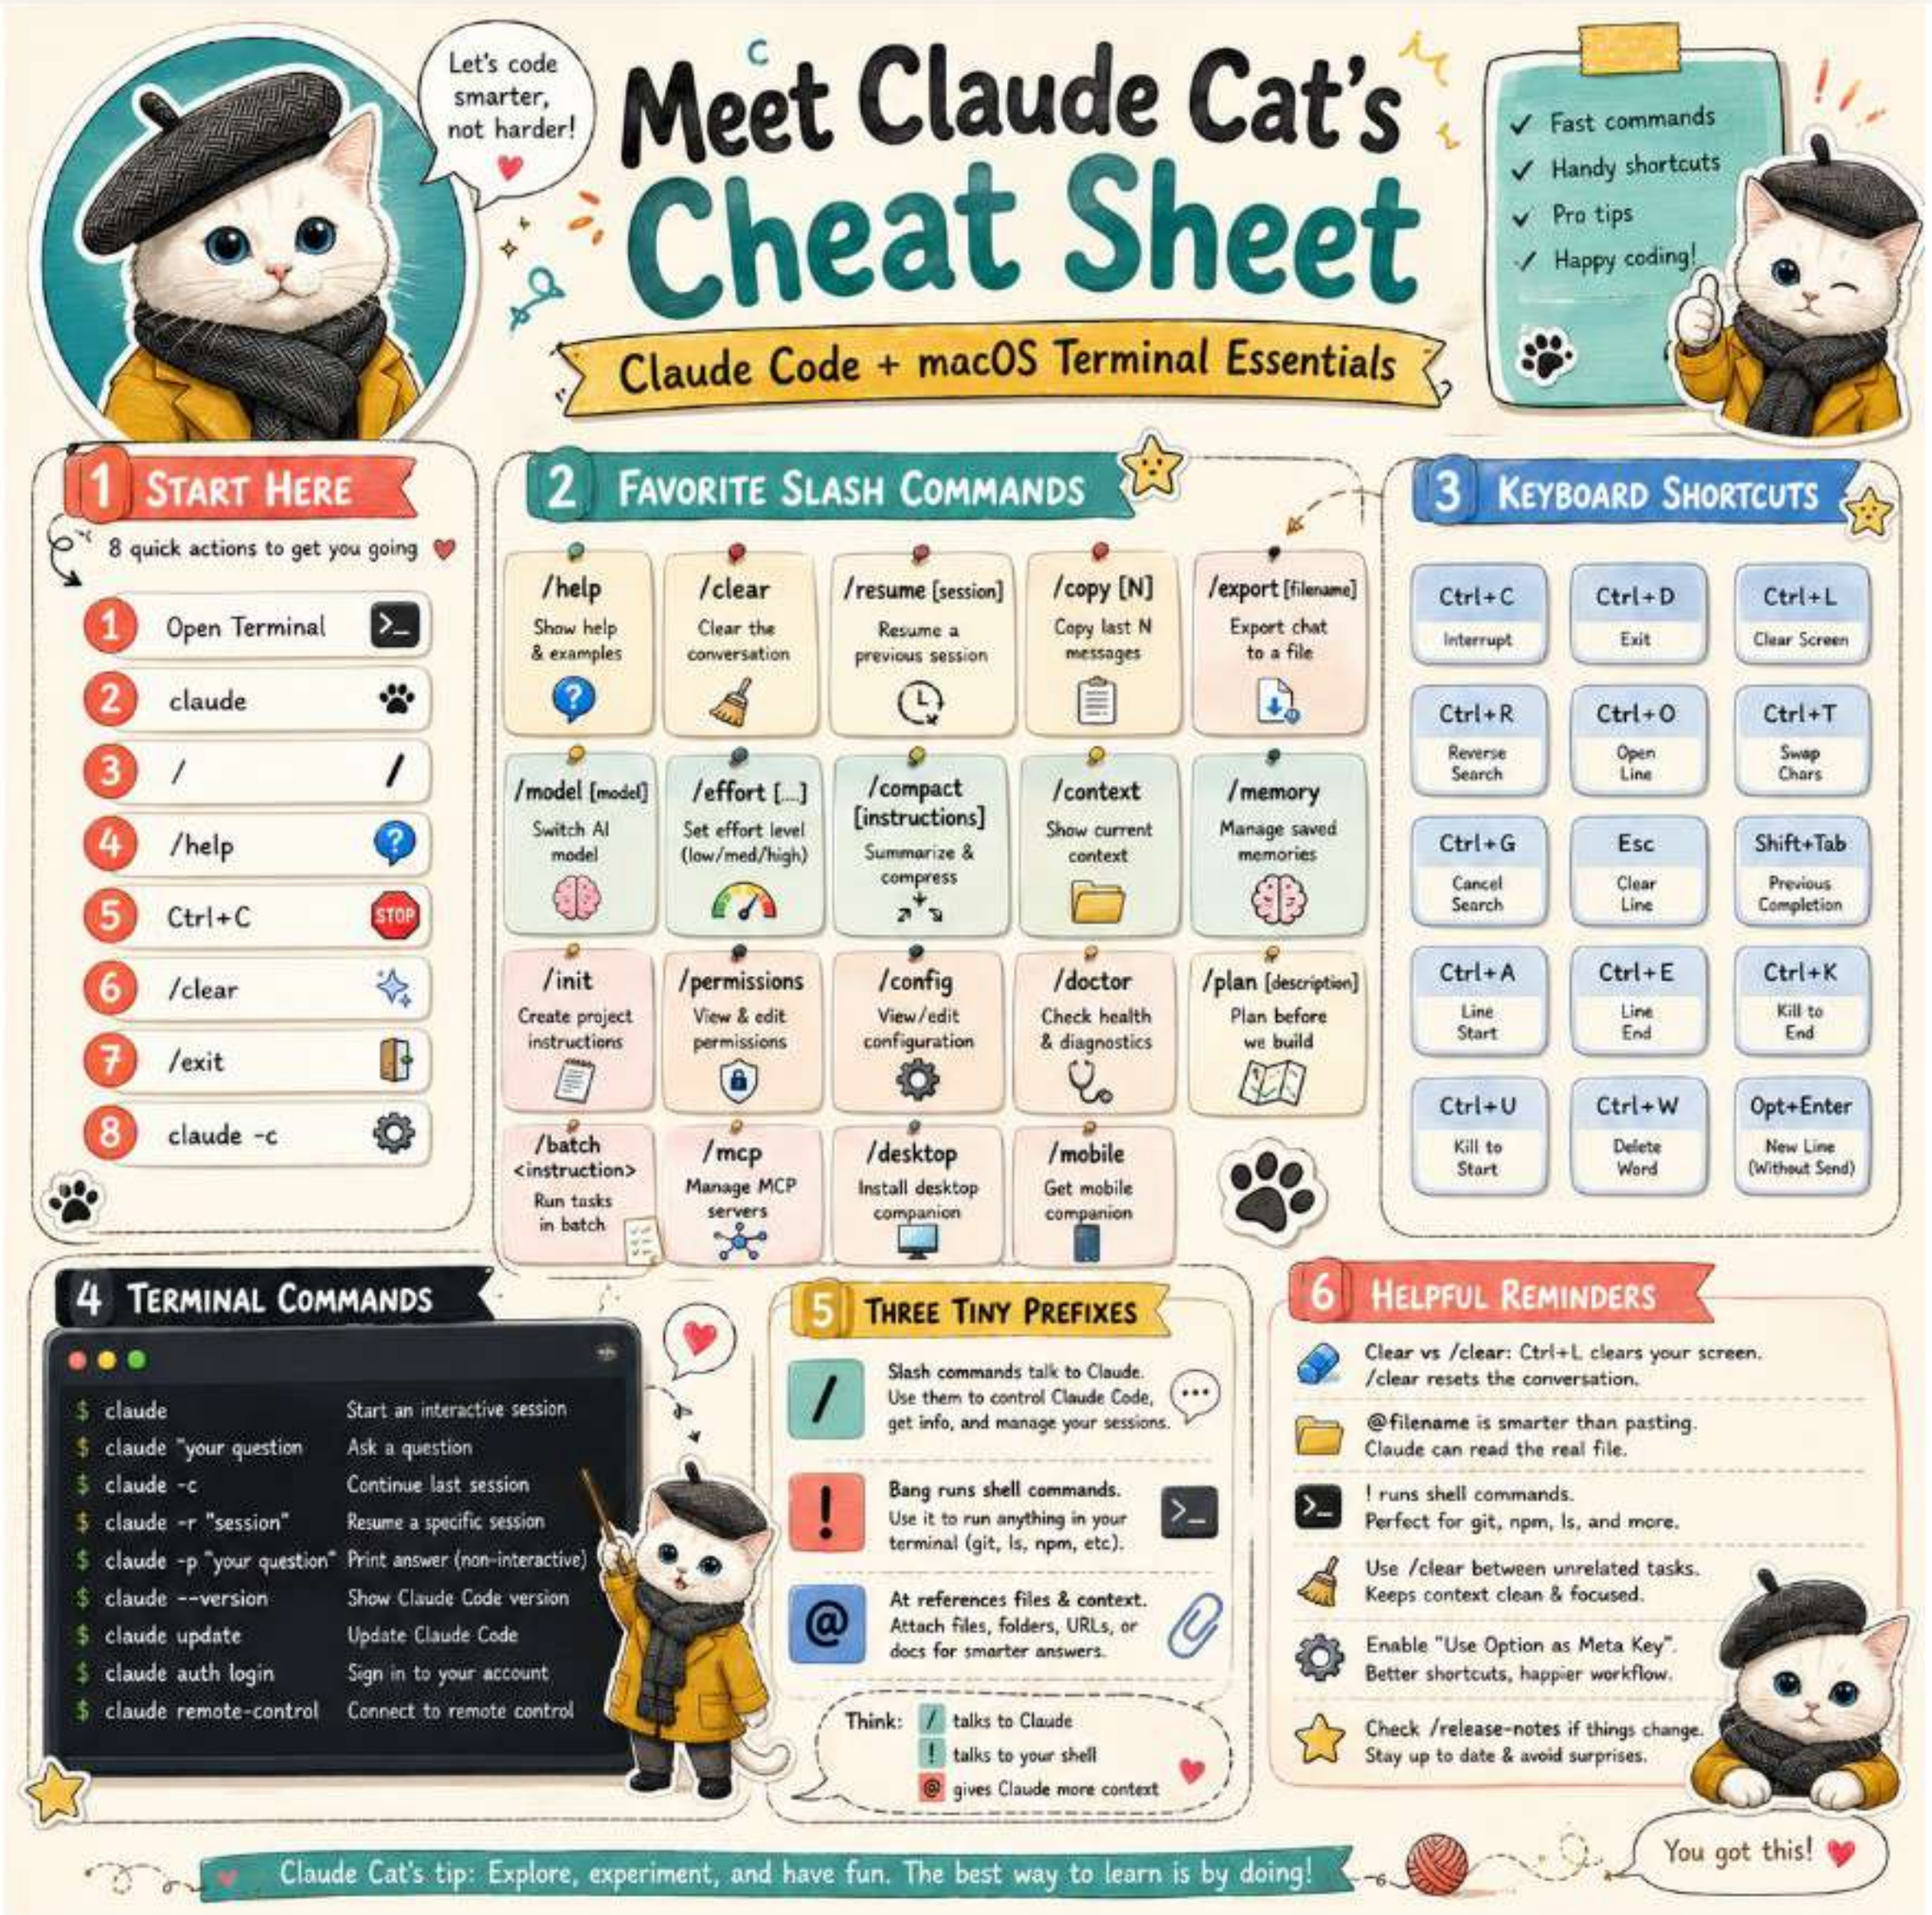

PLATE 37 · PEDAGOGICAL REGISTER

Illustrated learning guide is the children's-book-meets-textbook register: hand-drawn icons, pastel fills, numbered steps, annotated arrows. Disarms intimidating subject matter.

keywords: illustrated learning guide · hand-drawn · numbered steps · pastel palette · annotated diagrams

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

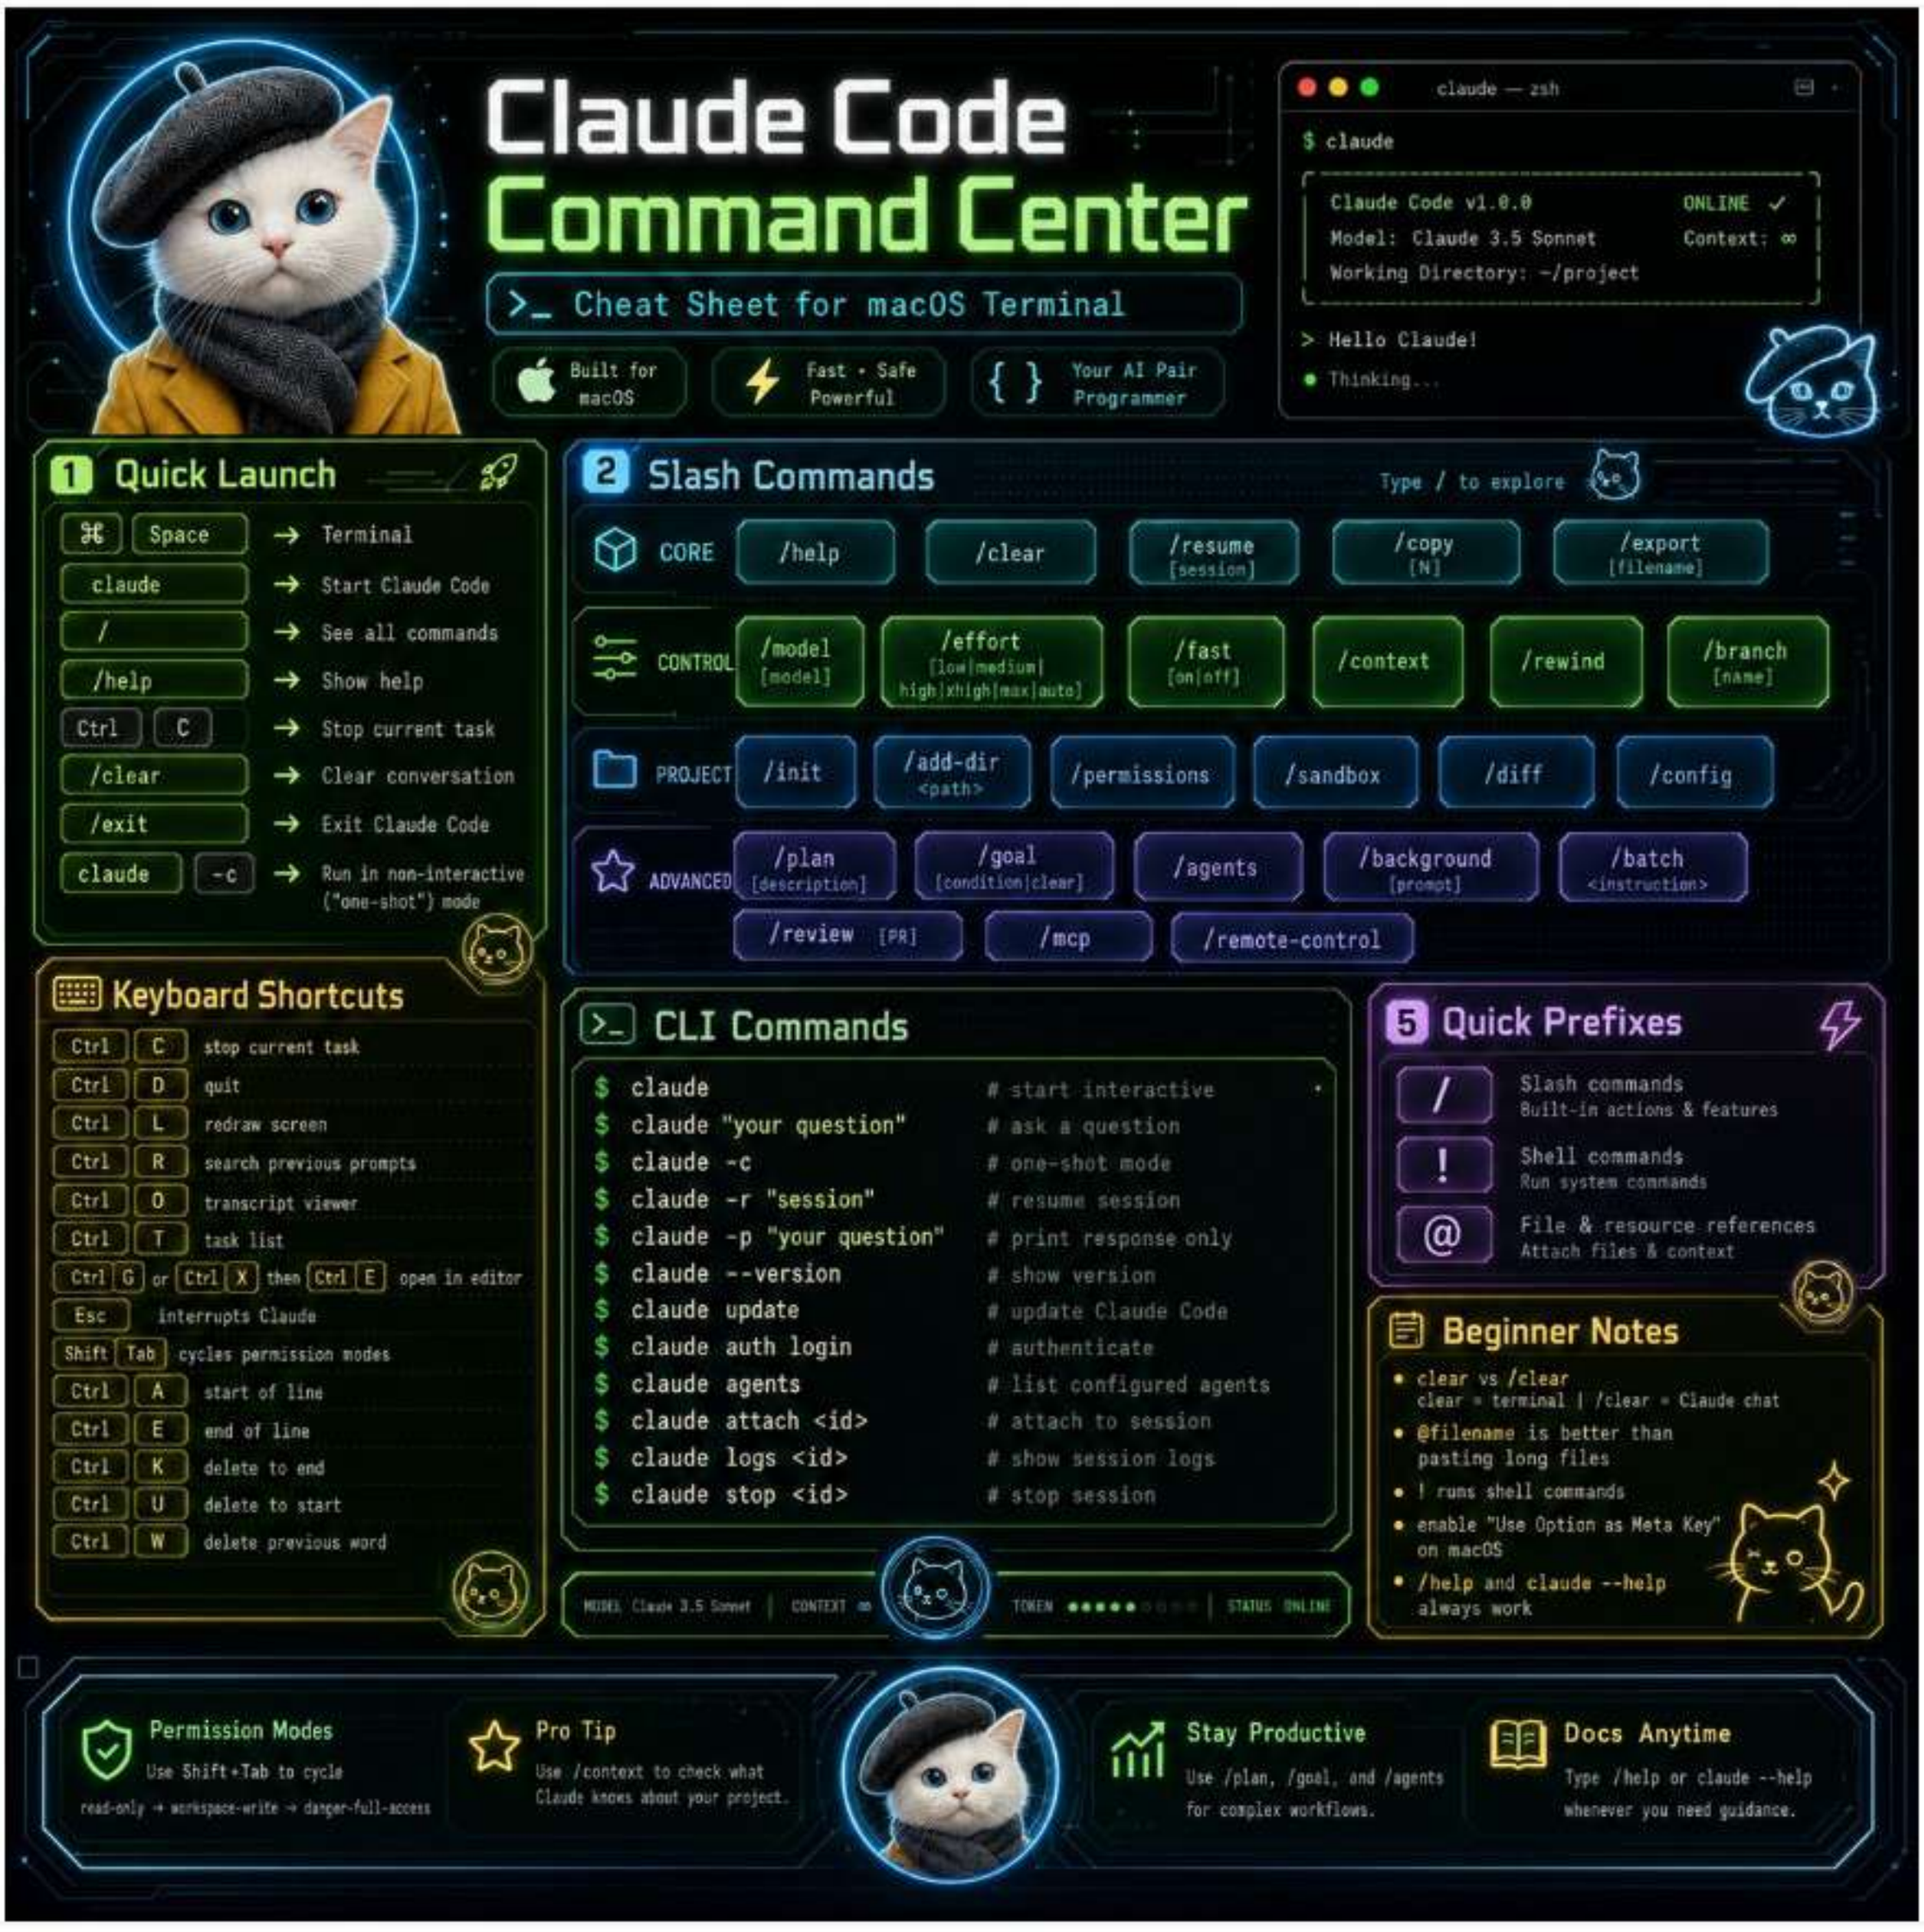

PLATE 38 · HACKER-HUD REGISTER

Dark neon cyber-terminal reskins an infographic as a hacker HUD: black canvas, mono type, cyan and magenta glow, ASCII frames. Plays well for CLI documentation and developer-tool cheat sheets.

keywords: dark neon cyber-terminal · monospace · cyan/magenta glow · ASCII frames · CRT scanlines

FINAL NOTE

Beyond prompting, there is context.

> **More important than prompt writing is context engineering.**

The more context you give the AI, the better the output. ChatGPT is smart: chat with it, share your document, then ask for the visual based on that context.

Upload a doc, ask for an **infographic cheat sheet** or **presentation slides**. Ask it to **research first** if it doesn't know the subject. Prompting is just one tiny part of the work.

BY TIANYU XU

linkedin.com/in/tianyuxu ↗

APPENDIX · SOURCES OF CONTEXT

The context behind the cat.

Every prompt in this guide rode on top of these four references. Character pictures, a real person photo, a document, and a real workshop page. The model sees what you show it.

VISUAL REFERENCES · CHARACTER + STYLE

Cat, cowboy, and a magical bullet.

A character sheet of the white cat in a yellow blazer and beret, a self-portrait of Tianyu in a western register, and a hero-shot of a glowing bullet trail. Used to anchor character consistency and lighting / mood references throughout.

VISUAL REFERENCES · PAIR CROP

A second pass on the same pair.

The cat and cowboy crops, dropped into the same conversation so the model could borrow from both at once. Useful when you want it to reuse the same lighting, palette, and grading across new scenes.

DOCUMENT REFERENCE · SOURCE CONTENT

A Claude Code shortcuts cheat sheet.

A markdown document fed in as context. The infographic chapter is not a prompt about a generic cheat sheet, it is a real document being laid out by the model. Context becomes content.

WORK REFERENCE · REAL WORKSHOP

AI Avatar Direction Masterclass.

A live workshop where this kind of single-variable testing, character consistency, and context engineering is taught hands-on. The bridge from this guide to actual practice.

THANKS FOR READING

Happy generating.

I help bring people's ideas to life with AI. Reach out for tailored training, consulting, or content collaboration.
