Facebook Reality

Facebook works differently.

Previously, monetization was split between:

- Reels Ads
- In-Stream Ads
- Performance bonuses

Now, monetization is more unified under **Content Monetization**.

What Is Required?

Facebook monetization generally requires:

- Strong, consistent views
- Clean account history
- An eligible country

It is not automatic.

You must receive an **invitation** to join monetization.

And invitations come through:

- Growing your page
- Increasing followers
- Increasing views
- Posting consistently

The more you treat your page seriously, the faster you increase your chances.

Eligible Countries

Facebook Content Monetization is available in many countries:

Trust Score & Earnings

Earnings on Facebook are heavily influenced by your page's **trust score**.

The cleaner your page history and the more consistent your content performance, the better.

RPM can vary significantly.

In strong cases, it can be very high.

Facebook is extremely underrated.

Many creators ignore it.

But re-uploading your content there costs you nothing.

And it can become a serious additional revenue stream on top of:

- TikTok
- YouTube

Same video.
Extra income.
