# Digital Products

With a format like Skeleton (or any strong AI-generated narrative format), you're not limited to platform monetization.

Ad revenue is just one layer.

There are multiple ways to earn beyond YouTube, TikTok and Facebook payouts.

---

## Affiliate Products

This format makes affiliate marketing extremely easy.

Especially in:

- Health-related videos
- Fitness topics
- Supplements
- Biohacking themes
- Educational tools

For example:

If you create a video about:
"What happens if you stop drinking water?"

You can naturally include:

- A hydration tracker app
- A water bottle brand
- A health-related product

---

## Promoting Mobile Apps

You can also promote:

- Your own mobile app
- Someone else's app for a revenue share

This niche works especially well for:

- Educational apps

- Health apps
- Brain training apps
- AI tools

Because your audience is already consuming informational content.

---

## Sponsorships

Brands are more likely to sponsor you if:

- Your content is clean
- Your audience is US-based
- Your niche is educational or health-related

This format allows you to integrate ads very naturally.

---

## Important

If you want sponsorships:

Make sure your business email is clearly visible on your socials.

- Add it to your bio
- Add it to your YouTube About section
- Make it easy to contact you

If brands can’t reach you, they won’t try.

---

## The Bigger Picture

Platform monetization is one income stream.

Digital products and sponsorships can often outperform ad revenue.
