1. Which Door Are You Picking?
2. SkelePets
3. Macro3D
4. Your Birth Month
5. Doctor AI - if you want to have that tiny doctor speaking, you can generate him here:https://www.adobe.com/express/create/animation
6. https://www.youtube.com/@bingof1lms/shorts
7. Horrid Henry style: https://www.tiktok.com/@deenaienglish - you already know how to make consistent characters (via image references, check 6.1 Character Consistency), to animate this style of videos you can easily use Veo3 as it's much cheaper than Kling, both tools let you do a voiceover, you just have to include this voiceover in the Video Generator prompt (for example: Boy is screaming angrily in british accent "What the bloody hell?!", looks at his sister, his sister laughs and says "XYZ")

I'm gonna be adding new niches/subniches so check this page from time to time.
